

## TABLE OF CONTENTS

### THEORY AND MEASURING METHODS

HOCKEY, G.R.J.

The maintenance of vigilance: A state control analysis . . . . . 13

DOUCHAMPS, M.J.

A metatheoretical approach of operational performance . . . . . 23

GALLEY, N., BOLDT, M., GROETZNER, C. and STRZELETZ, P.

Vigilance measurements on an eye movement task . . . . . 35

GROS, E. and MEHNERT, P.

Rhythmicity components and compensatory activities  
in reaction time data . . . . . 45

SCHENK, G.K.

Bioelectrical brain potentials indicating event related sensory,  
cognitive and motor mechanisms: A new approach to investigate  
cerebral input and output functions in vigilance research . . . . . 57

### TRANSPORT OPERATIONS

AKERSTEDT, T., TORSVAL, L. and GILLBERG, M.

Ambulatory measurements of vigilance . . . . . 73

ANGERMAN, K.

Are there uniform trends in physiological performance data in complex  
real life tasks? . . . . . 81

KNAUTH, P., CONDON, R., COLQUHOUN, W.P., PLETT, R., SCHMIDT, K.-H., and  
RUTENFRANZ, J.

Test performance measures of watchkeeping personnel during long  
distance ship voyages . . . . . 91

O'HANLON, J.F. and VOLKERTS, E.R.

Driving performance decrement following sedative drugs . . . . . 99

## TABLE OF CONTENTS

### MONOTONY

EYSENCK, M.W.

Individual differences, arousal, and monotonous work . . . . . 111

LEONARD, J.P.

Experimental models of vigilance regulation: Accelerated and decelerated sleep onset under the control of monotonous stimulation . . . . . 119

COBLENTZ, A., IGNAZI, G., MOLLARD, R., and SAUVIGNON, M.

Effect of monotony on vigilance and biomechanical behaviour . . . . . 129

MUZET, A., LIBERT, J.P., and BORBELY, A.

Variation in daily body motility under high ambient temperature in a confined environment with repetitive and monotonous activity . . . . . 137

### CHRONOBIOLOGY

WEVER, R.A.

Circadian control of vigilance . . . . . 149

ZULLEY, J. and BAILER, J.

Polyphasic sleep/wake patterns and their significance to vigilance . . . 167

EILERS, K., HÄNECKE, K., PEPPER, J. and NACHREINER, F.

Time of day effects in vigilance performance . . . . . 181

KIESSWETTER, E.

Different shift systems and adaptation: Systematic changes to diurnal courses of psychophysiological arousal . . . . . 191

## TABLE OF CONTENTS

### REGULATIVE MECHANISMS

PARMEGGIANI, P.L.

Physiological basis of the interaction between thermoregulation  
and vigilance . . . . . 201

HORNE, J.

Sleep need and sleepiness . . . . . 209

DELMONTE, M.M.

Vigilance: Enhancing the observer status and promoting well-being . . . 217

MORRIS, H. and GALE, A.

Smoking and vigilance: A critical appraisal of research . . . . . 227

CRAIG, A.

Self-control over performance in situations that demand vigilance . . . 237

Correspondence addresses . . . . . 247
