

# Table of Contents

<b>I</b>	<b>Fundamentals of Photography</b>	<b>1</b>
<b>1.</b>	<b>Photography Based on Silver Halides. An Overview</b>	<b>3</b>
1.1	Photographic Processes . . . . .	3
1.1.1	Black-and-White Photographic Process . . . . .	3
1.1.2	Color Photographic Process . . . . .	5
1.2	Multilayer Structure of Photographic Materials . . . . .	7
1.2.1	Multilayer Structure of Color Papers . . . . .	7
1.2.2	Multilayer Structure of Color Films . . . . .	17
1.2.3	Other Multilayer Structure of Color Films . . . . .	25
1.3	Chemicals for Color Photography . . . . .	35
	References . . . . .	37
<b>2.</b>	<b>Photographic Emulsions</b>	<b>39</b>
2.1	Silver Halides—Fundamental Chemical Properties . . . . .	39
2.1.1	Precipitation of Silver Halides . . . . .	39
2.1.2	Silver Complexes . . . . .	41
2.2	Gelatin—Fundamental Chemical Properties . . . . .	44
2.2.1	Merits of Gelatin as Binder . . . . .	44
2.2.2	Manufacture of Gelatin . . . . .	45
2.2.3	Side-Chain Groups of Gelatin . . . . .	46
2.3	Preparation of Photographic Emulsions . . . . .	47
2.3.1	Preparation With and Without Ammonia . . . . .	47
2.3.2	Examples of Procedures . . . . .	48
2.4	Precipitation . . . . .	49
2.4.1	Crystal Growth . . . . .	49
2.5	Washing . . . . .	52

2.6	After-Ripening and Chemical Sensitization . . . . .	52
2.6.1	Sulfur Sensitization . . . . .	53
2.6.2	Reduction Sensitization . . . . .	54
2.6.3	Gold Sensitization . . . . .	54
2.6.4	Example of Chemical Sensitization . . . . .	55
2.7	Industrial Manufacture of Silver Halide Emulsions . . . . .	56
	References . . . . .	57
<b>3.</b>	<b>Silver Halide Crystals. Fundamental Properties</b>	<b>59</b>
3.1	Crystal Structures of Silver Halides . . . . .	59
3.1.1	Dimension of Crystal Lattices . . . . .	59
3.1.2	Solid Solutions . . . . .	61
3.2	Shapes of Silver Halide Crystals . . . . .	61
3.2.1	Representation of Shapes . . . . .	61
3.2.2	Controlling Crystal Shapes of Silver Halides . . . . .	63
3.3	Lattice Defects in Crystals . . . . .	64
3.3.1	Kinds of Lattice Defects . . . . .	64
3.3.2	Intrinsic Point Defects . . . . .	65
3.3.3	Extrinsic Point Defects . . . . .	67
3.3.4	Linear Defects—Dislocations . . . . .	67
3.3.5	Kink and Jog Sites . . . . .	69
3.3.6	Twinned Crystals . . . . .	70
3.4	Spectral and Electronic Properties of Silver Halide Crystals . . . . .	71
3.4.1	Band Theory . . . . .	71
3.4.2	Optical Absorption . . . . .	72
	References . . . . .	73
<b>4.</b>	<b>Silver Halide Crystals. Photo-Sensitivity</b>	<b>75</b>
4.1	Mechanism of Latent-Image Formation . . . . .	75
4.1.1	Mechanism for Electronic Process . . . . .	77
4.1.2	Mechanism for Ionic Process and Silver Clusters . . . . .	80
4.1.3	Mechanism for Photo-Hole Process . . . . .	81
4.1.4	Formation of Photo-Electrons . . . . .	81
4.1.5	Overall Chemical Sensitizations . . . . .	82
4.2	Tabular Grains . . . . .	84
4.2.1	Tabular Grains for Color Negative Films . . . . .	84
4.2.2	$\Sigma$ -Grains . . . . .	87
4.2.3	Example for Preparing Tabular Grains . . . . .	88
4.2.4	Crystal Habit Controlling Agents . . . . .	89
	References . . . . .	90
<b>5.</b>	<b>Photographic Development and Developers</b>	<b>93</b>
5.1	Photographic Development . . . . .	93
5.2	Photographic Developers . . . . .	94
5.2.1	Hydroquinones and Related Compounds . . . . .	94

5.2.2	Aminophenols and Related Compounds . . . . .	94
5.2.3	Hydrazine Derivatives . . . . .	95
5.2.4	Hydroxylamine Derivatives . . . . .	95
5.2.5	Ascorbic Acid and Related Compounds . . . . .	95
5.2.6	Heterocyclic Developers . . . . .	96
5.2.7	Kendall's Rule . . . . .	96
5.3	Electrochemistry of Development . . . . .	97
5.3.1	Redox Reactions . . . . .	97
5.3.2	The Silver Electrode Potential . . . . .	97
5.3.3	Developer Potential . . . . .	98
5.3.4	Effect of Semiquinone Formation . . . . .	99
	References . . . . .	101

## II Principles of Color Photography 103

6.	Color Reproduction . . . . .	105
6.1	Color and Absorption . . . . .	105
6.2	Additive and Subtractive Color Reproduction . . . . .	106
6.2.1	Additive Color Reproduction . . . . .	106
6.2.2	Subtractive Color Reproduction . . . . .	107
6.2.3	Negative and Positive Images . . . . .	108
6.3	Color Image Formation . . . . .	109
6.3.1	Principles of Color Image Formation . . . . .	109
6.3.2	Chromogenic (Dye-Forming) Process . . . . .	110
6.3.3	Dye-Bleaching Process . . . . .	110
6.3.4	Dye-Transfer Process . . . . .	110
	References . . . . .	112
7.	Spectral Sensitization and Sensitizing Dyes . . . . .	113
7.1	Background . . . . .	113
7.2	Chromophoric Systems of Sensitizing Dyes . . . . .	114
7.3	Cyanine Dyes . . . . .	117
7.4	Mechanism of Spectral Sensitization . . . . .	119
7.5	Syntheses of Sensitizing Dyes . . . . .	121
7.5.1	Symmetrically Substituted Sensitizing Dyes . . . . .	121
7.5.2	Unsymmetrical Sensitizing Dyes . . . . .	123
7.5.3	Chains Incorporating a Heterocyclic Ring . . . . .	123
7.6	Recent Topics . . . . .	125
7.6.1	Residual Color Due to Sensitizing Dyes . . . . .	125
7.6.2	Additional Sensitizing Layer . . . . .	126
7.6.3	Infrared-Sensitizing Dyes for Digital Printing . . . . .	128
7.6.4	Sensitizing Dyes Applied to CD-R . . . . .	130
	References . . . . .	132

<b>III Chromogenic Photography</b>	<b>135</b>
<b>8. History of Color Development</b>	<b>137</b>
8.1 Fischer's Pioneering Work . . . . .	137
8.2 Diffusible Couplers . . . . .	139
8.3 Non-diffusible Couplers . . . . .	143
8.3.1 Hydrophilic Couplers . . . . .	143
8.3.2 Oil- and Polymer-Protected Couplers . . . . .	144
8.4 Syntheses of Non-diffusible Couplers . . . . .	148
8.4.1 Syntheses of Hydrophilic Couplers . . . . .	148
8.4.2 Syntheses of Oil-Protected Couplers . . . . .	150
References . . . . .	153
<b>9. Color Developers</b>	<b>155</b>
9.1 Syntheses and Basic Properties . . . . .	155
9.2 Mechanism of Reactions . . . . .	157
9.2.1 Dye Formation . . . . .	157
9.2.2 Side Reactions . . . . .	160
References . . . . .	162
<b>10. Couplers</b>	<b>163</b>
10.1 Negative-Positive Process . . . . .	163
10.2 Couplers and Azomethine Dyes . . . . .	166
10.2.1 Dye-Forming Reactions . . . . .	166
10.2.2 Properties of Dyes . . . . .	168
10.2.3 Ballast Groups for Oil-Protection . . . . .	168
10.3 Cyan Couplers . . . . .	168
10.3.1 Naphthol Couplers . . . . .	169
10.3.2 Phenol Couplers . . . . .	173
10.3.3 Heterocyclic Cyan Couplers . . . . .	182
10.4 Magenta Couplers . . . . .	185
10.4.1 5-Pyrazolone Couplers . . . . .	185
10.4.2 Pyrazolotriazole Magenta Couplers . . . . .	188
10.5 Yellow Couplers . . . . .	206
10.5.1 Benzoylacetanilide Couplers . . . . .	206
10.5.2 Pivaloylacetanilide Couplers . . . . .	210
10.5.3 Cyclopropanecarbonylacetanilide Couplers . . . . .	212
10.5.4 Malondiamide Couplers . . . . .	214
10.5.5 Pyrroloylacetanilides and Related Couplers . . . . .	215
10.6 Polymer Couplers . . . . .	219
References . . . . .	220
<b>11. Two-Equivalent Couplers</b>	<b>225</b>
11.1 Merits of Two-Equivalent Couplers . . . . .	225
11.2 Two-Equivalent Cyan Couplers . . . . .	226

11.2.1	Two-Equivalent Cyan Couplers of Naphthol Type . . .	226
11.2.2	Two-Equivalent Cyan Couplers of Other Types . . .	229
11.3	Two-Equivalent Magenta Couplers . . . . .	230
11.3.1	Two-Equivalent 5-Pyrazolone Couplers . . . . .	230
11.3.2	Two-Equivalent Magenta Couplers of Other Types . .	236
11.4	Two-Equivalent Yellow Couplers . . . . .	238
11.4.1	Earlier Two-Equivalent Yellow Couplers . . . . .	238
11.4.2	Acylacetanilide Couplers . . . . .	239
	References . . . . .	244
<b>12.</b>	<b>Colored Couplers</b>	<b>247</b>
12.1	Color Masking . . . . .	247
12.1.1	Azomethine Dyes From Azo Dyes . . . . .	247
12.1.2	Azo Dyes as Colored Couplers . . . . .	249
12.2	Colored Cyan Couplers . . . . .	252
12.2.1	Magenta-Colored Cyan Couplers . . . . .	252
12.2.2	Yellow-Colored Cyan Couplers . . . . .	260
12.3	Colored Magenta Couplers . . . . .	262
12.3.1	Yellow-Colored Magenta Couplers . . . . .	262
12.3.2	Hydrophilic Yellow-Colored Magenta Couplers . . .	264
12.4	Colored Yellow Couplers . . . . .	266
12.4.1	Magenta-Colored Yellow Couplers for Movie Films .	266
12.4.2	Magenta-Colored Yellow Couplers for Color Negative Films . . . . .	267
	References . . . . .	269
<b>13.</b>	<b>DIR Couplers and Related Compounds</b>	<b>271</b>
13.1	Development-Inhibitor Releasing . . . . .	271
13.1.1	Development Inhibitors . . . . .	271
13.1.2	Timing and Imagewise Releasing . . . . .	274
13.2	Effects of DIR Couplers . . . . .	278
13.2.1	Intralayer Effects . . . . .	278
13.2.2	Interlayer Effects . . . . .	279
13.3	DIR Couplers of Direct-Releasing Type . . . . .	280
13.3.1	Releasing Thiolic Development Inhibitors . . . . .	281
13.3.2	Releasing Heterocyclic Development Inhibitors . . .	283
13.3.3	Deactivatable DIR Couplers . . . . .	288
13.4	Timing DIR Couplers . . . . .	291
13.4.1	Timing Due to Hydrolysis . . . . .	291
13.4.2	Timing Due to Intramolecular Attacks . . . . .	293
13.4.3	Timing Due to Quinone-Methide Formation . . . . .	296
13.4.4	Multi-Timing DIR Couplers . . . . .	300
13.5	DAR Couplers . . . . .	303
13.6	BAR Couplers . . . . .	306
	References . . . . .	308

<b>14. DIR Hydroquinones and Related Compounds</b>	<b>311</b>
14.1 DIR Hydroquinones . . . . .	311
14.1.1 DIR Hydroquinones for Reversal Color Process . . . . .	311
14.2 DIR Hydroquinones with Additional Functions . . . . .	315
14.2.1 Timing DIR Hydroquinones . . . . .	315
14.2.2 DIRR Couplers . . . . .	315
14.3 DIR Hydrazines . . . . .	321
14.3.1 Applications to Chromogenic Photography . . . . .	321
14.3.2 Application to Graphic Arts Films . . . . .	321
References . . . . .	324
<b>IV Diffusion Transfer Photography</b>	<b>327</b>
<b>15. Silver-Salt Diffusion Transfer Photography</b>	<b>329</b>
15.1 B&W Diffusion Transfer Process . . . . .	329
15.1.1 DTR Copy Print . . . . .	329
15.1.2 Instant B&W Photography . . . . .	330
15.1.3 DTR Plate . . . . .	332
15.2 Additive Color Photography . . . . .	334
15.2.1 Instant Color Movie . . . . .	334
