

## CONTENTS

PREFACE . . . . .	VII
CHAPTER 1. GENERAL INTRODUCTION . . . . .	1
References . . . . .	7
CHAPTER 2. LAKES, LAKE DISTRICTS AND THEIR ORIGIN . . . . .	13
2.1. Introduction . . . . .	13
2.2. Tectonic origin (not including volcanic activity). . . . .	13
2.3. Volcanic origin . . . . .	15
2.4. Glacial activity . . . . .	16
2.5. Solution of rocks . . . . .	20
2.6. River action and landslides. . . . .	20
References . . . . .	23
CHAPTER 3. CHEMICAL COMPOSITION . . . . .	24
3.1. Introduction; physical properties of the water molecule . . . . .	24
3.2. Dissolved compounds . . . . .	27
3.2.1. General composition (quantities and origin) . . . . .	27
3.2.2. Case studies . . . . .	32
3.3. The calcium bicarbonate system . . . . .	35
3.3.1. Chemical considerations . . . . .	35
3.3.2. Biological considerations . . . . .	39
3.4. Determination of total CO <sub>2</sub> . . . . .	41
References . . . . .	43
CHAPTER 4. PRIMARY PRODUCTION IN RELATION TO PHOTOSYNTHESIS UNDER NATURAL CONDITIONS. . . . .	45
4.1. Introduction . . . . .	45
4.2. Physical energy supply . . . . .	46
4.2.1. Total solar energy . . . . .	46
4.2.2. Diurnal changes . . . . .	47
4.2.3. Light penetration . . . . .	49
4.3. Photosynthesis, energy and nutrient supply, and adaptation . . . . .	54
4.3.1. Relationship between photosynthesis, energy and nutrient supply . . . . .	54
4.3.2. Light saturation, the meaning of $I_k$ and adaptation . . . . .	61
4.4. Intracellular conversions and extracellular products . . . . .	63
4.5. Quantitative measurements of primary production . . . . .	68
4.5.1. O <sub>2</sub> and <sup>14</sup> C method . . . . .	68
4.5.2. O <sub>2</sub> versus <sup>14</sup> C method . . . . .	70
4.6. Calculation of net production; respiration and mineralisation losses . . . . .	72
4.7. Variations of photosynthesis in time and space . . . . .	73
4.7.1. Geographical effects . . . . .	73
4.7.2. Diurnal effects . . . . .	75
4.7.3. Seasonal effects . . . . .	81
4.7.4. Local effects . . . . .	83
References . . . . .	84

<b>CHAPTER 5. THE PHOSPHATE CYCLE</b> . . . . .	87
5.1. Occurrence of phosphate in lakewater . . . . .	87
5.2. Sources of phosphate . . . . .	88
5.3. The phosphate cycle in lakewater . . . . .	89
5.3.1. Introduction . . . . .	89
5.3.2. The metabolic phosphate cycle . . . . .	90
5.3.3. The geochemical phosphate cycle . . . . .	93
5.4. Concluding remarks . . . . .	96
References . . . . .	97
 <b>CHAPTER 6. NITROGEN CYCLE AND BLUE-GREEN ALGAE</b> . . . . .	 99
6.1. Introduction . . . . .	99
6.2. Interconversions of the different forms of nitrogen. . . . .	100
6.2.1. Oxidation of ammonia . . . . .	100
6.2.2. Synthesis of cellular nitrogen . . . . .	101
6.2.3. Denitrification . . . . .	102
6.3. Mineralisation of cellular nitrogen . . . . .	103
6.4. Nitrogen fixation and blue-green algae . . . . .	104
6.4.1. Occurrence of N <sub>2</sub> fixation . . . . .	104
6.4.2. Site of N <sub>2</sub> fixation in blue-green algal cells . . . . .	107
6.5. Physiological properties of blue-green algae which may stimulate their bloom . . . . .	109
6.5.1. Growth in dim light . . . . .	109
6.5.2. Presence of gas vacuoles . . . . .	113
6.5.3. Organic substances including toxins . . . . .	114
6.5.4. Concluding remarks . . . . .	117
6.6. The N cycle . . . . .	117
References . . . . .	119
 <b>CHAPTER 7. SILICON AND ITS COMPOUNDS — CHEMISTRY, BIOCHEMISTRY AND PHYSIOLOGY OF UPTAKE BY DIATOMS</b> . . . . .	 124
7.1. Introduction . . . . .	124
7.2. Inorganic chemistry . . . . .	125
7.3. Biochemistry and physiology . . . . .	127
References . . . . .	132
 <b>CHAPTER 8. RECYCLING OF NUTRIENTS AND MINERALISATION</b> . . . . .	 134
8.1. Introduction . . . . .	134
8.2. Culture experiments . . . . .	134
8.3. Mineralisation under natural conditions in lakes. . . . .	138
8.3.1. Oxidative mineralisation . . . . .	138
8.3.2. Anaerobic mineralisation: the [H] donor and the carbon sources . . . . .	140
References . . . . .	143
 <b>CHAPTER 9. STRATIFICATION IN DEEP LAKES</b> . . . . .	 145
9.1. Introduction; physical aspects . . . . .	145
9.2. Meromictic lakes . . . . .	148
9.3. Destratification . . . . .	151
9.4. Chemical stratification resulting from physical stratification . . . . .	152
9.4.1. O <sub>2</sub> consumption and CO <sub>2</sub> production . . . . .	152
9.4.2. The oxidation-reduction (redox) sequences . . . . .	156
9.4.3. The pH sequence . . . . .	163
9.4.4. Secondary chemical stratification . . . . .	164
9.5. Adsorption on sediments . . . . .	168
9.6. Transport from hypolimnion to epilimnion . . . . .	170
References . . . . .	171

CHAPTER 10. ALGAL CULTURES AND GROWTH EQUATIONS . . . . .	174
10.1. Introduction . . . . .	174
10.2. The culture solution . . . . .	175
10.3. Growth equations . . . . .	178
10.4. Batch cultures . . . . .	183
10.5. Continuous cultures . . . . .	184
10.5.1. Theoretical considerations . . . . .	184
10.5.2. Experimental results using continuous-culture methods . . . . .	189
10.6. Synchronous cultures . . . . .	191
10.7. Algal bioassays . . . . .	194
References . . . . .	196
CHAPTER 11. TRACE ELEMENTS . . . . .	199
11.1. Introduction . . . . .	199
11.2. Chelation of trace elements . . . . .	201
11.3. Availability of iron . . . . .	205
11.4. Trace elements as factors limiting algal growth . . . . .	205
11.5. Pollution due to heavy (trace) elements . . . . .	209
References . . . . .	212
CHAPTER 12. ORGANIC MATTER . . . . .	215
12.1. Introduction . . . . .	215
12.2. The general properties of organic matter . . . . .	217
12.3. Coloured organic matter . . . . .	220
12.3.1. Occurrence and structure . . . . .	220
12.3.2. Fractionation . . . . .	224
References . . . . .	231
CHAPTER 13. ALGAE AND THEIR PIGMENTS . . . . .	233
13.1. Structure and occurrence . . . . .	233
13.2. Absorption spectra and functions . . . . .	238
13.3. Ratio between carotenoids and chlorophyll . . . . .	240
13.4. The photosynthetic unit . . . . .	244
References . . . . .	247
CHAPTER 14. SEASONAL PERIODICITY OF PHYTOPLANKTON . . . . .	248
14.1. Introduction . . . . .	248
14.2. The diatom spring maximum . . . . .	250
14.2.1. Physical and chemical factors . . . . .	250
14.2.2. Competition . . . . .	258
14.3. Competitive exclusion . . . . .	261
14.4. Other factors controlling algal succession . . . . .	266
14.4.1. Turbulence . . . . .	267
14.4.2. Other chemical factors such as phosphate or nitrogen supply . . . . .	268
14.4.3. Predation, grazing, parasitism . . . . .	270
References . . . . .	273
CHAPTER 15. ENERGY AND MASS TRANSPORT THROUGH FOOD CHAINS . . . . .	275
15.1. Introduction . . . . .	275
15.2. The organisms in the food chain between fish and phytoplankton . . . . .	280
15.2.1. Introduction . . . . .	280
15.2.2. Copepoda . . . . .	280
15.2.3. Cladocera (often called waterfleas) . . . . .	282
15.2.4. Rotatoria . . . . .	282

15.3.	Study of zooplankton in the food chain . . . . .	282
15.3.1.	Feeding of zooplankton . . . . .	283
15.3.2.	Field studies (population dynamic approach) . . . . .	292
15.3.3.	Measurement of $t$ and $B$ . . . . .	293
15.3.4.	Measurement of daily increases . . . . .	297
15.4.	The larger animals . . . . .	306
15.5.	Some case histories . . . . .	308
15.5.1.	Lake George . . . . .	308
15.5.2.	Loch Leven . . . . .	314
15.6.	Concluding remarks . . . . .	320
	References . . . . .	321
<b>CHAPTER 16. BACTERIAL LIMNOLOGY . . . . .</b>		<b>325</b>
16.1.	Introduction . . . . .	325
16.2.	Chemolithotrophic bacteria . . . . .	328
16.2.1.	Introduction . . . . .	328
16.2.2.	Sulphur bacteria . . . . .	331
16.2.3.	Hydrogen bacteria . . . . .	332
16.2.4.	Iron bacteria . . . . .	332
16.2.5.	Methane-oxidising bacteria . . . . .	333
16.2.6.	Nitrifying bacteria . . . . .	333
16.2.7.	<i>Desulphovibrio</i> . . . . .	335
16.3.	Chemoorganotrophic bacteria . . . . .	337
16.4.	Phototrophic bacteria . . . . .	340
16.4.1.	Introduction . . . . .	340
16.4.2.	Photolithotrophic bacteria . . . . .	341
16.4.3.	Photoorganotrophic bacteria (purple, non-sulphur bacteria) . . . . .	345
16.5.	The problem of adaptation . . . . .	347
16.6.	Measuring activities in natural conditions . . . . .	348
	References . . . . .	354
<b>CHAPTER 17. NUTRIENT BUDGETS AND EUTROPHICATION . . . . .</b>		<b>357</b>
17.1.	Introduction . . . . .	357
17.2.	Nutrient budget calculations . . . . .	358
17.2.1.	Theoretical models . . . . .	358
17.2.2.	Individual lake models (field data) . . . . .	362
17.2.3.	Concluding remarks . . . . .	366
17.3.	Eutrophication . . . . .	366
17.3.1.	Definitions and causes of eutrophication . . . . .	366
17.3.2.	Nitrogen and phosphate supplies as causes of eutrophication . . . . .	368
17.3.3.	Other assumed causes of eutrophication . . . . .	379
17.3.4.	Nutrient losses from soils . . . . .	383
17.3.5.	Conclusions and cures . . . . .	384
17.4.	Case studies . . . . .	386
17.4.1.	The St. Lawrence Great Lakes . . . . .	386
17.4.2.	Lake Washington . . . . .	390
17.4.3.	Swiss and Austrian alpine lakes . . . . .	391
17.4.4.	French alpine lakes . . . . .	393
17.4.5.	Lake Kinneret . . . . .	394
17.5.	Consequences and classifications of the state of eutrophication . . . . .	396
	References . . . . .	399

<b>CHAPTER 18. SEDIMENTS . . . . .</b>	<b>403</b>
18.1. Introduction . . . . .	403
18.2. Erosion and chemical weathering . . . . .	403
18.2.1. Origin and chemical nature of erosion products . . . . .	403
18.2.2. Erosion of silicates . . . . .	406
18.2.3. Chemical nature of silt . . . . .	407
18.2.4. Adsorption of metals on silt . . . . .	413
18.2.5. Quantities and transport of silt . . . . .	414
18.3. Lake sediment profiles . . . . .	418
References . . . . .	427
 <b>CHAPTER 19. WATER MANAGEMENT PROBLEMS — WATER SUPPLY, REC- REATION, SEWAGE DISPOSAL, AND MAN-MADE LAKES . . . . .</b>	 <b>430</b>
19.1. Water balance and quality problems . . . . .	430
19.2. Drinking of tapwater . . . . .	434
19.3. Waste water . . . . .	436
19.4. Recreational use of water bodies . . . . .	440
19.5. Man-made lakes . . . . .	441
19.5.1. Introduction . . . . .	441
19.5.2. Russian and East-European reservoirs . . . . .	442
19.5.3. African reservoirs . . . . .	444
19.5.4. Spanish reservoirs . . . . .	446
19.5.5. U.S.A. reservoirs . . . . .	447
19.5.6. Mismanagement and concluding remarks . . . . .	448
References . . . . .	450
 <b>APPENDIX . . . . .</b>	 <b>454</b>
 <b>REFERENCES INDEX . . . . .</b>	 <b>457</b>
 <b>SUBJECT INDEX . . . . .</b>	 <b>469</b>
