

Contents

1	Introduction	1
1.1	Puzzle 1: Finding Missing Numbers	1
1.2	Puzzle 2: Fishing	3
1.3	Puzzle 3: Pointer and Chaser	6
1.4	Lessons	8
2	Map	9
3	The Data Stream Phenomenon	11
4	Data Streaming: Formal Aspects	15
4.1	Data Stream Models	15
4.2	Motivating Scenarios	20
4.3	Other Data Streaming Applications	24
4.4	Other Applications for Data Stream Models	26
5	Foundations: Basic Mathematical Ideas	29
5.1	Sampling	29
5.2	Random Projections	40

6 Foundations: Basic Algorithmic Techniques	51
6.1 Group Testing	51
6.2 Tree Method	54
6.3 Other Algorithmic Techniques	62
7 Foundations: Summary	67
7.1 Lower Bounds	67
7.2 Summary and Data Stream Principles	69
8 Streaming Systems	73
9 New Directions	77
9.1 Related Areas	77
9.2 Functional Approximation Theory	78
9.3 Data Structures	85
9.4 Computational Geometry	86
9.5 Graph Theory	88
9.6 Databases	91
9.7 Hardware	95
9.8 Streaming Models	96
9.9 Data Stream Quality Monitoring	101
9.10 Fish-Eye View	103
10 Historic Notes	109
11 Concluding Remarks	111
Acknowledgements	113
