Contents

Part I: Analysis and Methodology

On Moment Stability of Linear Systems with a Stochastic Delay Variation
Erik I. Verriest, Wim Michiels 3

Stability Analysis of Neutral Systems: A Delay-Dependent Criterion
Tudor C. Ionescu, Radu Ştefan 15

Frequency Stability Analysis of Linear Systems with General Distributed Delays
Vladimir L. Kharitonov, Sabine Mondié, Gilberto Ochoa 25

Robust Control for Multiple Time Delay MIMO Systems with Delay - Decouplability Concept
Kamran Turkoglu, Nejat Olgac 37

On Stability of Linear Retarded Distributed Parameter Systems of Parabolic Type
Yury Orlov, Emilia Fridman 49

Lyapunov Matrices for Neutral Type Time Delay Systems
Gilberto Ochoa, Juan E. Velázquez, Vladimir L. Kharitonov, Sabine Mondié 61

Stability of Coupled Differential-Difference Equations with Block Diagonal Uncertainty
Yi Liu, Hongfei Li, Keqin Gu 73

On Pole Assignment and Stabilizability of Neutral Type Systems
Rabah Rabah, Grigory M. Sklyar, Alexander V. Rezounenko 85

Part II: Numerical Methods and Algorithms

SOS Methods for Stability Analysis of Neutral Differential Systems
Matthew M. Peet, Catherine Bonnet, Hitay Özbay 97

Nonlinear Time-Delay Systems: A Polynomial Approach Using Ore Algebras
Miroslav Halás 109

Stable Periodic Solutions of Time Delay Systems Containing Hysteresis Nonlinearities
Alexander M. Kamachkin, Alexander V. Stepanov 121

SOS for Nonlinear Delayed Models in Biology and Networking
Antonis Papachristodoulou, Matthew M. Peet 133

TRACE-DDE: A Tool for Robust Analysis and Characteristic Equations for Delay Differential Equations
Dimitri Breda, Stefano Maset, Rossana Vermiglio 145

Analysis of Numerical Integration for Time Delay Systems
Alfredo Bellen, Stefano Maset 157

On Algebraic Simplifications of Linear Functional Systems
Thomas Cluzeau, Alban Quadrat 167

OREMORPHISMS: A Homological Algebraic Package for Factoring, Reducing and Decomposing Linear Functional Systems
Thomas Cluzeau, Alban Quadrat 179

Part III: Controlling and Observing Delay Systems

Integral Action Controllers for Systems with Time Delays
Hitay Özbay, A. Nazli Gündeş 197

Stabilization of Neutral Time-Delay Systems
Michaël Di Loreto, Catherine Bonnet, Jean Jacques Loiseau 209

Robust Stabilization and H_∞ Control of Uncertain Distributed Delay Systems
Ulrich Münz, Jochen M. Rieber, Frank Allgöwer 221

Observer Design for Systems with Non Small and Unknown Time-Varying Delay
Alexandre Seuret, Thierry Floquet, Jean-Pierre Richard, Sarah Spurgeon 233

Input-Output Representation and Identifiability of Delay Parameters for Nonlinear Systems with Multiple Time-Delays
Milena Anguelova, Bernt Wennberg 243

Time Optimal and Optimal Impulsive Control for Coupled Differential Difference Point Delay Systems with an Application in Forestry
Erik I. Verriest, Pierdomenico Pepe 255

Part IV: Propagation and Flows

On the Stability of AQM Controllers Supporting TCP Flows
Daniel Melchor-Aguilar 269

A Robust State Feedback Control Law for a Continuous Stirred Tank Reactor with Recycle
Pierdomenico Pepe 281

Functional Differential Equations Associated to Propagation
Vladimir Răsvan 293

Design, Modelling and Control of the Experimental Heat Transfer Set-Up
Tomáš Vyhlídal, Pavel Zítek, Karel Paulů 303

Optimal Identification of Delay-Diffusive Operators and Application to the Acoustic Impedance of Absorbent Materials
Céline Casenave, Gérard Montseny 315

Part V: Delays in Interconnected Systems and Networks

Controlling Across Complex Networks: Emerging Links Between Networks and Control
Aaron Clauset, Herbert G. Tanner, Chaouki T. Abdallah, Raymond H. Byrne 329

Inventory Dynamics Models of Supply Chains with Delays; System-Level Connection & Stability
Ismail Ilker Delice, Rifat Sipahi 349

Some Remarks on Delay Effects in Motion Synchronization in Shared Virtual Environments
Joono Cheong, Silviu-Iulian Niculescu, Yonghwan Oh, Irinel Constantin Morărescu 359

Control of Teleoperators with Time-Delay: A Lyapunov Approach
Emmanuel Nuño, Luis Basañez, Romeo Ortega 371

Synchronization and Amplitude Death in Coupled Limit Cycle Oscillators with Time Delays
Fatihcan M. Atay 383

Synchronization of Bidirectionally Coupled Nonlinear Systems with Time-Varying Delay
Toshiki Oguchi, Takashi Yamamoto, Henk Nijmeijer 391

Master-Slave Synchronization for Two Inverted Pendulums with Communication Time-Delay
Héctor Javier Estrada-García, Luis Alejandro Márquez-Martínez, Claude H. Moog 403

Subject Index 415
