<b>Preface</b>	<b>vii</b>
<b>Acknowledgments</b>	<b>ix</b>
<b>Credits</b>	<b>xi</b>

<b>Chapter 1</b> Selecting Cycling Equipment	<b>1</b>
--	----------

Chester R. Kyle, PhD

*Learn how the design of bicycle components can benefit cycling performance.*

<b>Chapter 2</b> Bicycle Suspension Systems	<b>45</b>
---	-----------

John Olsen, MSME

*Examine the goals and components of suspension systems in this overview of bike physics, engineering, and performance.*

<b>Chapter 3</b> Body Size and Cycling Performance	<b>65</b>
--	-----------

David P. Swain, PhD

*Explore how body size influences various aspects of cycling performance and how this can be described through the concept of “scaling.”*

<b>Chapter 4</b> Body Positioning for Cycling	<b>79</b>
---	-----------

Edmund R. Burke, PhD, and Andrew L. Pruitt, EdD

*Learn how you can minimize injuries and increase your efficiency, power, performance, and comfort through proper bicycle fit.*

**Chapter 5 Optimal Pedaling Cadence 101**

J. Richard Coast, PhD

*Explore the factors that contribute to optimal cadence in this overview of the concept of optimization.*

**Chapter 6 Cycling Optimization Analysis 117**

Steve A. Kautz, PhD, and Maury L. Hull, PhD

*Find out how the technique of analytical optimization has been used in an attempt to determine the optimal equipment adjustment for cycling.*

**Chapter 7 Cycling Biomechanics 145**

Jeffrey P. Broker, PhD, and Robert J. Gregor, PhD

*Read about the latest advances in cycling biomechanics, including instrumented pedals, new research into pedal loading, and the characteristics of the cycling “engine.”*

**Chapter 8 Energy Expenditure During Cycling 167**

James Hagberg, PhD, and Steve McCole, MS

*Learn how air resistance—the major force that cyclists must overcome—is affected by riding speed, body position, drafting, and aerodynamic equipment.*

**Chapter 9 Nutrition for Cycling 185**

W. Michael Sherman, PhD

*Discover how various manipulations of dietary carbohydrate intake have the potential to improve endurance cycling performance.*

**Chapter 10** Resistive Exercises for Off-Road Cycling **207**

Ronald P. Pfeiffer, EdD, ATC, and Shane R. Johnson, MS

*See how analysis of the joint and muscle actions of off-road cycling has helped provide a year-round strength training protocol for competitive off-road riding.*

**Chapter 11** Preventing Overuse Knee Injuries **251**

Maury L. Hull, PhD, and Patricia Ruby, MS

*Survey the latest scientific research aimed at developing preventive technologies for common overuse knee injuries.*
