Streszczenie (Polish summary)	11
List of abbreviations	15
Note on text formatting	16
Introduction	17
Thesis statement	20
Chapter One: Theoretical framework	23
1.1 Aristotle and Quintilian's account of metaphor	23
1.2 Lakoff and Johnson's model of metaphor as a conceptual mapping	26
1.2.1 Image schemata	33
1.2.2 Functions of Image schemas	36
1.3 Classifications of metaphors based on their relation to similarity	37
1.4 Blending Theory as a specification of Conceptual Metaphor Theory	40
1.4.1 The structure of Blending Theory and its critique	41
1.4.2 Emergent structure	43
1.5 The capacity of metaphors to produce new, refined understanding of target domains	44
1.5.1 Example 1 – Generative Metaphor	44
1.5.2 Example 2 – Toolmaker's Paradigm	45
1.5.3 Example 3 – John 14:6	46
1.5.4 Example 4 – Bryson's tree	47
1.6 Constraints on metaphoric transfer	49
1.6.1 Embodiment Theory as a coarse constraint	50
1.6.2 Invariance Hypothesis as a more refined constraint	54
1.6.3 Inheritance Hypothesis	57
1.7 Problems in defining concepts	58
1.7.1 Defining in lexicography	59
1.7.2 Metaphoric language and literal language – the role of metaphors in defining concepts	60
1.8 Szwedek's Objectification Theory	62
1.8.1 Categorization and learning as the bases of Objectification	64
1.9 Concluding Remarks	68
Chapter Two: Nouns, nominalization, and abstraction	71
2.1 Etymology	72
2.2 Approaches to nouns and nominalization	73
2.2.1 Jespersen's substantives	73

2.2.2	John Lyons – A semantically grounded approach	74
2.2.3	Morphological classifications of nouns	76
2.2.4	Syntactic classifications	78
2.3	A definition of nouns in Cognitive Linguistics	79
2.3.1	Langacker’s approach to nominalization	80
2.3.2	The role of Bounding in Langacker’s conception	82
2.3.3	Constructing abstract nouns: Conceptual reification	83
2.4	Highly abstract nouns – a remaining problem area	84
2.5	The case system of Slavic languages	85
2.6	Inheritance of features by target domains	90
2.7	Concluding remarks	92
Chapter Three: Analysis of linguistic material		95
3.1	Division into concrete and abstract conceptual domains; its motivation	97
3.2	Metaphoric transfer into concrete domains	101
3.2.1	Image-based target domains as a special case	102
3.2.2	Other concrete target domains	104
3.3	Metaphoric transfer into lower-order abstract domains	105
3.3.1	Examples and discussion	109
3.4	Higher-order abstract domains and their special status	112
3.4.1	Examples and discussion	114
3.5	The case of luck and the role of valuation	119
3.5.1	The role of valuation	123
3.6	The case of advertising and the function of metaphoric mappings	126
3.6.1	The role of function	129
3.7	Concluding remarks	131
Conclusions		133
References		137
	Primary sources and sources of linguistic examples	137
	Secondary sources	137

List of Tables

Table 1.	Examples of Aristotelian metaphors	24
Table 2.	Quintilian's classification of metaphors, based on ontological criteria	25
Table 3.	Examples of common metaphoric mappings	28
Table 4.	Listings of Image Schemas found in Johnson (1987) and Jäkel (2003) in alphabetical order	34
Table 5.	Division of metaphors according to degree of entrenchment and frequency of usage	39
Table 6.	Entailments of the Conduit Metaphor	45
Table 7.	Most common adjectival collocations of the nouns <i>tree/trees</i> found in the BNC in alphabetical order	48
Table 8.	Jespersen's exemplification of nouns (substantives)	74
Table 9.	Lyons' classification of nouns (substantives), according to their level of abstraction	75
Table 10.	An example of a morphological classification of nouns	77
Table 11.	An onomasiological analysis of Slavic noun cases	86
Table 12.	A semasiological analysis of Slavic noun cases	87
Table 13.	Results of a pilot study: Collocations of <i>mind</i> divided according to the underlying metaphor/metonymy relationship	91
Table 14.	Metaphors underlying specific emotions in OE texts	99
Table 15.	Various uses of the word <i>emotion</i> , organized according to underlying conceptualizations	100
Table 16.	A corpus-based listing of most frequent adjectival collocations with the word <i>tool</i>	109
Table 17.	A corpus – based listing of most frequent adjectival collocations of the word <i>gadget</i>	111
Table 18.	Frequent collocations of <i>emotion</i> organized by thematic roles and alphabetically	115
Table 19.	Frequent collocations of <i>feeling</i> organized by thematic roles and alphabetically	115
Table 20.	Frequent collocations of <i>relationship</i> organized by thematic roles and alphabetically	116
Table 21.	Frequent collocations of <i>information</i> organized by thematic roles and alphabetically	116
Table 22.	Hierarchical classification of object properties inherited by abstract concepts	117
Table 23.	Adjectival collocations of <i>luck</i> (search phrase: [aj*] + [luck])	122
Table 24.	Nominal collocations of <i>luck</i> (search phrase: [n*] + [luck])	123
Table 25.	Potential absolute valuations attributed to the concept of MIND	125
Table 26.	Adjectival collocations of the word <i>advertising</i> as found in the BNC, organized alphabetically	127

List of Figures

Figure 1. A Schematic representation of a mapping from a source domain to a similarly structured target domain	27
Figure 2. A Schematic representation of a mapping from a source domain to an unstructured (abstract) target domain	33
Figure 3. Example analysis of Examples (6) and (7) under Blending Theory	42
Figure 4. A graphic representation of Reddy's Toolmaker Paradigm and its entailments	46
Figure 5. An image consistent with the common understanding of the concept of TREE	47
Figure 6. A schematic diagram illustrating long term potentiation in a neuron	67
Figure 7. Classification of nouns based on a combination of syntax and semantics	78
Figure 8. Schematic representation of the process signified by the verb <i>to extract</i> vs. the bound object signified by <i>extraction</i>	81
Figure 9. Rudimentary outlines of geometric shapes forcing the recognition of complete shapes	83
Figure 10. Example of two construals of the same event, by means of sequential scanning (left) and summary scanning (right)	84
Figure 11. Langacker-style schematic representation of a profiled bounded object with no internal structure of its own	121
Figure 12. An example of an advertisement in which ADVERTISING is used as a target domain	128
