Contents

	Preface	*page* xi
1	**Chernoff–Hoeffding Bounds**	1
1.1	What Is "Concentration of Measure"?	1
1.2	The Binomial Distribution	2
1.3	The Chernoff Bound	3
1.4	Heterogeneous Variables	5
1.5	The Hoeffding Extension	6
1.6	Useful Forms of the Bound	6
1.7	A Variance Bound	8
1.8	Pointers to the Literature	10
1.9	Problems	10
2	**Applications of the Chernoff–Hoeffding Bounds**	16
2.1	Probabilistic Amplification	16
2.2	Load Balancing	17
2.3	Skip Lists	18
2.4	Quicksort	22
2.5	Low-Distortion Embeddings	23
2.6	Pointers to the Literature	29
2.7	Problems	29
3	**Chernoff–Hoeffding Bounds in Dependent Settings**	34
3.1	Negative Dependence	34
3.2	Local Dependence	38
3.3	Janson's Inequality	39
3.4	Limited Independence	43
3.5	Markov Dependence	45

3.6	Pointers to the Literature	49
3.7	Problems	49
4	**Interlude: Probabilistic Recurrences**	51
4.1	Problems	56
5	**Martingales and the Method of Bounded Differences**	58
5.1	Review of Conditional Probabilities and Expectations	59
5.2	Martingales and Azuma's Inequality	61
5.3	Generalising Martingales and Azuma's Inequality	65
5.4	The Method of Bounded Differences	67
5.5	Pointers to the Literature	71
5.6	Problems	72
6	**The Simple Method of Bounded Differences in Action**	74
6.1	Chernoff–Hoeffding Revisited	74
6.2	Stochastic Optimisation: Bin Packing	74
6.3	Balls and Bins	75
6.4	Distributed Edge Colouring: Take 1	76
6.5	Models for the Web Graph	78
6.6	Game Theory and Blackwell's Approachability Theorem	80
6.7	Pointers to the Literature	82
6.8	Problems	82
7	**The Method of Averaged Bounded Differences**	85
7.1	Hypergeometric Distribution	85
7.2	Occupancy in Balls and Bins	86
7.3	Stochastic Optimisation: Travelling Salesman Problem	88
7.4	Coupling	90
7.5	Handling Rare Bad Events	99
7.6	Quicksort	101
7.7	Pointers to the Literature	103
7.8	Problems	103
8	**The Method of Bounded Variances**	106
8.1	A Variance Bound for Martingale Sequences	107
8.2	Applications	110
8.3	Pointers to the Literature	117
8.4	Problems	118
9	**Interlude: The Infamous Upper Tail**	121
9.1	Motivation: Non-Lipschitz Functions	121
9.2	Concentration of Multivariate Polynomials	121

9.3 The Deletion Method 123
9.4 Problems 124

10 Isoperimetric Inequalities and Concentration 126
10.1 Isoperimetric Inequalities 126
10.2 Isoperimetry and Concentration 127
10.3 The Hamming Cube 130
10.4 Martingales and Isoperimetric Inequalities 131
10.5 Pointers to the Literature 132
10.6 Problems 133

11 Talagrand's Isoperimetric Inequality 136
11.1 Statement of the Inequality 136
11.2 The Method of Non-Uniformly Bounded Differences 139
11.3 Certifiable Functions 144
11.4 Pointers to the Literature 148
11.5 Problems 148

12 Isoperimetric Inequalities and Concentration via Transportation Cost Inequalities 151
12.1 Distance between Probability Distributions 151
12.2 Transportation Cost Inequalities Imply Isoperimetric Inequalities and Concentration 153
12.3 Transportation Cost Inequality in Product Spaces with the Hamming Distance 154
12.4 An Extension to Non-Product Measures 158
12.5 Pointers to the Literature 159
12.6 Problems 159

13 Quadratic Transportation Cost and Talagrand's Inequality 161
13.1 Introduction 161
13.2 Review and Road Map 161
13.3 An L_2 (Pseudo)-Metric on Distributions 163
13.4 Quadratic Transportation Cost 165
13.5 Talagrand's Inequality via Quadratic Transportation Cost 167
13.6 Extension to Dependent Processes 168
13.7 Pointers to the Literature 169
13.8 Problems 169

14 Log-Sobolev Inequalities and Concentration 171
14.1 Introduction 171
14.2 A Discrete Log-Sobolev Inequality on the Hamming Cube 172

14.3 Tensorisation 174
14.4 Modified Log-Sobolev Inequalities in Product Spaces 175
14.5 The Method of Bounded Differences Revisited 177
14.6 Self-Bounding Functions 179
14.7 Talagrand's Inequality Revisited 179
14.8 Pointers to the Literature 181
14.9 Problems 181

Appendix A Summary of the Most Useful Bounds 185
A.1 Chernoff–Hoeffding Bounds 185
A.2 Bounds for Well-Behaved Functions 185

Bibliography 189
Index 195
