

CONTENTS

Preface	V
Opening Speech <i>by</i> S. Björk, Chairman of the workshop	VII
Why Hypertrophic Ecosystems? Opening remarks <i>by</i> J. Barica	IX
 Session 1: Definition, characterization and causes of hypertrophy	
The summer limnology of Lake Waahi, New Zealand <i>by</i> M. A. Chapman	1
Identification of different phosphorous forms and their role in the eutrophication process of Lake Balaton <i>by</i> E. Dobolyi	13
Metalimnetic gradient and phosphorus loss from the epilimnion in stratified eutrophic lakes <i>by</i> Z. M. Gliwicz	23
The influence of sediments on changed phosphorus loading to hypertrophic L. Glumsø <i>by</i> L. Kamp Nielsen	29
The cyanobacterium <i>Microcystis aeruginosa</i> kg. and the nitrogen cycle of the hypertrophic Lake Brielle (The Netherlands) <i>by</i> F. I. Kappers	37
Comparison of hypertrophy on a seasonal scale in Dutch inland waters <i>by</i> P. Leentvaar	45
Control of undesirable algae and induction of algal successions in hypertrophic lake ecosystems <i>by</i> L. Leonardson & W. Rippl	57
Occurrence of <i>Oscillatoria agardhii</i> and some related species, a survey <i>by</i> L. Van Liere and L. R. Mur	67
The influence of periodicity in light conditions, as determined by the trophic state of the water, on the growth of the green algae <i>Scenedesmus protruberans</i> and the cyanobacterium <i>Oscillatoria agardhii</i> <i>by</i> L. G. Loogman, A. F. Post & L. R. Mur	79
The role of microlayers in controlling phytoplankton productivity <i>by</i> J. A. Oloffson, Jr.	83
Short-term load-response relationships in shallow, polluted lakes <i>by</i> S. - O. Ryding & C. Forsberg	95
The importance of trophic-level interactions to the abundance and species composition of algae in lakes <i>by</i> J. Shapiro	105
Vegetation changes in the nutrient-rich shallow Lake Hjälvstaviken <i>by</i> M. Wallsten	117
N ₂ -fixing cyanobacteria; why they do not become dominant in Dutch, hypertrophic lakes <i>by</i> W. Zevenboom & L. R. Mur	123

Session 2: Stability of hypertrophic ecosystems and causes of hypertrophy

Nirate overdose: effects and consequences <i>by</i> M. W. Banoub	133
A chemical model to describe nutrient dynamics in lakes <i>by</i> N. M. de Rooij	139
Changes in the respiration and anaerobic nutrient regeneration during the transition phase of reservoir development <i>by</i> D. Gunnison, J. M. Brannon, I. Smith, Jr., & G. A. Burton	151
Modelling carbon and phosphorus in a small hypertrophic North German lake <i>by</i> H. - J. Krambeck & C. Krambeck	159
An algal bloom model as a tool to simulate management measures <i>by</i> F. J. Los	171
Phosphorus stability in a hypereutrophic lake <i>by</i> S. B. Mercil, C. M. Conway & L. E. Shubert	179
Structural and functional quantification in a series of Hungarian hypertrophic shallow lakes <i>by</i> J. Oláh	191
Muddy odour in fish from hypertrophic waters <i>by</i> P.-E. Persson	203
The importance of hydrologic factors on the relative eutrophic impacts of point and non-point pollution in a reservoir <i>by</i> C. W. Randall, T. J. Grizzard & R. C. Hoehn	209
Environmental constraints on <i>Anabaena</i> N ₂ - and CO ₂ -fixation: effects of hyperoxia and phosphate depletion on blooms and chemostat cultures <i>by</i> D. B. Shindler, H. W. Paerl, P. E. Kellar & D. R. S. Lean	221
Toxicity fluctuations and factors determining them <i>by</i> L. A. Sirenko	231
Stability and multiple steady states of hypereutrophic ecosystems <i>by</i> D. Uhlmann	235

Session 3: Foodchain properties, productivity and utilization of hypertrophic ecosystems

On the role of soil in the maintenance of fish ponds' fertility <i>by</i> Y. Avnimelech and M. Lacher	251
Fish as a factor controlling water quality in ponds <i>by</i> J. Fott, L. Pechar & M. Pražáková	255
The role of fishery management in counteracting eutrophication <i>by</i> K. Opuszyński	263
Fish production in some hypertrophic ecosystems in South India <i>by</i> A. Sreenivasan	271

Session 4: Rehabilitation

Enrichment and recovery of a Malaysian reservoir <i>by</i> P. T. Arumugam and J. I. Furtado	281
Lake treatment with hydrogen peroxide <i>by</i> G. Barroin	287
Characterization of the recovery processes in hypertrophic lakes in terms of actual (lake water) and potential (algal assay) chlorophyll <i>by</i> A. Claesson and S. - O. Ryding	295
Morphometrically conditioned eutrophy and its amelioration in some British Columbia lakes <i>by</i> T. G. Northcote	305
Hartbeespoort Dam – a case study of a hypertrophic, warm, monomictic impoundment <i>by</i> W. E. Scott, P. J. Ashton, R. D. Walmsley & M. T. Seaman	317
Cascade reservoirs as a method for improving the trophic state downstream <i>by</i> M. Štěpánek	323

Concluding Remarks <i>by</i> L. R. Mur	331
---	-----

Summaries and Abstracts

The effect of pig manure and mineral fertilization on a eutrophic lake ecosystem <i>by</i> Z. Kajak & J. Rybak	337
Hypertrophy in slow flowing rivers <i>by</i> D. Müller & V. Kirchesch	338
CO ₂ -uptake as a measure of bacterial production <i>by</i> J. Overbeck	339
Response of shallow hypertrophic lakes to reduced nutrient loading <i>by</i> I. Ahlgren	343
Fish as a regulator of structure and function in eutrophic lake ecosystems <i>by</i> G. Andersson	343
Algenbekämpfung durch Zusatz von Kalk und Dolomithydrat <i>by</i> L. Cervenka & M. D. Eissa	343
Possible triggering mechanisms for the collapse of <i>Aphanizomenon-flos-aquae</i> blooms <i>by</i> A. Coulombe	344

Self-purification and respiration in polysaprobic area of natural flowing waters receiving raw domestic sewage <i>by</i> D. Fontvieille	344
Short-circuit metabolism in highly eutrophic lakes – relationship between primary production and decomposition rates <i>by</i> W. Ohle	345
Heterotrophic functions in the freshwater carbon cycle <i>by</i> J. Overbeck	345
Effects of temperature and temperature-nutrient interactions on phytoplankton growth <i>by</i> G. - Y. Rhee & I. J. Gotham	346
Natural and induced sediment rehabilitation in hypertrophic lakes <i>by</i> W. Ripl	346
Aspects of biological competition between <i>Stigeoclonium tenue</i> and <i>Cladophora glomerata</i> , two filamentous green algae, characteristic of eutrophic waters <i>by</i> A. S. Rosemarin	347
Seasonal succession and standing crop determinations of the epiphytic algae in two hypertrophic lakes <i>by</i> J. Shames	347
Nitrogen transformations in artificial loaded limnocorrals <i>by</i> T. Tiren	347
Zur quantitativen Bestimmung der potentielle Bioproduktion in aquatischen Ökosystemen mittels Algentest <i>by</i> E. Welte & M. G. Eissa	348
