<i>Preface</i>	<i>xxi</i>

Part I The nature of the problem – oral diseases and the impact of nutrition

1 Diseases caused by oral bacteria	3
<i>P. D. Marsh, HPA CEPR & Leeds Dental Institute, UK</i>	
1.1 The mouth as a microbial habitat	3
1.2 The resident oral microbiota	6
1.3 Development of the oral microbiota	8
1.4 Distribution of the oral microbiota	9
1.5 Benefits of the resident oral microbiota	11
1.6 The oral microbiota and disease	11
1.7 Conclusions	16
1.8 References	17
2 Viral and fungal infections of the oral cavity	19
<i>S. Porter, UCL Eastman Dental Institute, UK</i>	
2.1 Introduction to viral infections	19
2.2 Herpes virus infection	19
2.3 Human papilloma virus	30
2.4 Hepatitis viruses	32
2.5 Human immunodeficiency virus (HIV)	33
2.6 Fungal infections	37
2.7 Paracoccidioidomycosis	40
2.8 Aspergillosis	41

2.9	Mucormycosis	42
2.10	References	42
3	Non-infectious diseases of the oral mucosa	51
	<i>P. M. Speight and P. M. Farthing, University of Sheffield, UK</i>	
3.1	Introduction	51
3.2	White patches of the oral mucosa.....	52
3.3	Oral cancer	54
3.4	Swellings of the oral mucosa	56
3.5	Oral ulceration	58
3.6	Disorders of the salivary glands.....	61
3.7	Oral lesions associated with systemic disease	63
3.8	References.....	64
4	Dental erosion	65
	<i>A. Lussi, University of Bern, Switzerland</i>	
4.1	Introduction	65
4.2	Diagnosis	66
4.3	Risk factors	68
4.4	Biological factors.....	71
4.5	Chemical factors.....	72
4.6	Behavioural factors	74
4.7	Summary.....	76
4.8	Acknowledgement	76
4.9	References.....	76
 Part II Food components and oral health		
5	Nutrition and its effect on oral health and disease	83
	<i>P. Moynihan, Newcastle University, UK</i>	
5.1	Introduction	83
5.2	Enamel developmental defects	84
5.3	The role of diet in dental caries	85
5.4	Diet and dental erosion	89
5.5	The impact of nutrition on oral mucosal conditions.....	90
5.6	The impact of nutrition on periodontal health and disease	93
5.7	Diet and general health	94
5.8	Conclusion.....	96
5.9	References.....	96
6	Relating breath malodour to food constituents and oral health	100
	<i>J. Greenman and S. Benkara Mostefa Saad, University of the West of England, UK</i>	
6.1	Breath malodour and its measurement	100

6.2	The central paradigm for intra-oral generation by microbes	113
6.3	Diet, oral health and malodour	116
6.4	Salivary flow, substrate and product clearance from the mouth	121
6.5	More complex model (quasi-steady states with perturbations)	125
6.6	Interventions and management.....	127
6.7	Future trends	129
6.8	References.....	130
7	Sugar alcohols and dental health	134
	<i>K. A. Ly and P. Milgrom, University of Washington, USA</i>	
7.1	Introduction to sugars and sugar-free sweeteners	134
7.2	Sugar alcohols and cariogenicity.....	135
7.3	Xylitol efficacy in the prevention of tooth decay	137
7.4	Xylitol clinical applications.....	139
7.5	Deciphering xylitol-containing products for potential efficacy.....	142
7.6	Key points and conclusions.....	147
7.7	References.....	149
8	Dairy products and oral health	152
	<i>T. Dietrich, Boston University Goldman School of Dental Medicine, USA and University of Birmingham, UK; A. Sheshah, Riyadh Security Forces Hospital, Saudi Arabia; and M. Nunn, Boston University Goldman School of Dental Medicine, USA</i>	
8.1	Introduction	152
8.2	Intake of dairy products and risk of dental caries	153
8.3	Intake of dairy products and risk of periodontitis	158
8.4	Future trends.....	159
8.5	Acknowledgement.....	160
8.6	References.....	160
9	Impact of food sugars and polysaccharides on dental caries	163
	<i>P. Lingström, University of Gothenburg, Sweden</i>	
9.1	Fermentable carbohydrates: a key factor in the caries process	163
9.2	The different carbohydrates in the diet	164
9.3	Relative cariogenicity of different sugars	166
9.4	Starches and dental caries.....	167
9.5	Impact on caries from a historical perspective	169
9.6	Impact in the modern era	172
9.7	Cariogenic risks of foods and beverages.....	173
9.8	Consumption frequency versus amount consumed	174

9.9	Influence of fluoride on the sugars–caries relationship	176
9.10	Individuals at increased risk	177
9.11	Impact in the 21st century	180
9.12	References	181
10	Casein phosphopeptides in oral health	185
	<i>N. J. Cochrane and E. C. Reynolds, The University of Melbourne, Australia</i>	
10.1	Introduction	185
10.2	Casein phosphopeptide stabilised amorphous calcium phosphate nanocomplexes (CPP-ACP) structure	188
10.3	Scientific evidence for casein phosphopeptide-amorphous calcium phosphate activity in preventing demineralisation and promoting remineralisation	189
10.4	Mechanism of action	211
10.5	Recommendations for clinical use	215
10.6	Future trends	218
10.7	Conclusions	219
10.8	References	219
11	Antioxidants and periodontal disease	225
	<i>M. M. Grant and I. L. C. Chapple, University of Birmingham, UK</i>	
11.1	The nature of antioxidants	225
11.2	Antioxidants and periodontitis	226
11.3	Micronutrients in future therapeutic approaches to periodontitis	233
11.4	Sources of further information and advice	234
11.5	Future trends	234
11.6	References	235
12	Anticaries and antiadhesive properties of food constituents and plant extracts and implications for oral health	240
	<i>C. Signoretto and P. Canepari, Università di Verona, Italy; C. Pruzzo, Università di Genova, Italy; and G. Gazzani, Università di Pavia, Italy</i>	
12.1	Introduction	240
12.2	Plaque-dependent oral pathologies	241
12.3	Classic approaches for the prevention of tooth and gum pathologies	242
12.4	Phenolic content of food and plant extracts	242
12.5	Main foods and plant extracts with anticaries and antiplaque activity	245

12.6	Effects of bacterial target inhibition by food and beverage components	253
12.7	Mode of delivery of polyphenols to the oral cavity	255
12.8	Implications of using natural food components for oral health	256
12.9	Future trends	257
12.10	Acknowledgements	258
12.11	References	258
13	Food preservatives and dental caries	263
	<i>W. H. Bowen, University of Rochester, USA</i>	
13.1	Introduction	263
13.2	Spices	264
13.3	Clove	264
13.4	Antibiotics	264
13.5	Chelation agents	265
13.6	Weak acids	265
13.7	Sulfites	269
13.8	Hypersensitivity	270
13.9	Conclusions	270
13.10	References	270
14	Food, nutrition and oral cancer	273
	<i>S. Warnakulasuriya, King's College London Dental Institute, UK</i>	
14.1	Introduction	273
14.2	The causes of cancer	274
14.3	Food and the risk of cancer	274
14.4	Vegetarian diet and oral cancer	277
14.5	Animal studies	278
14.6	Anti-cancer agents in plant foods: mechanisms of action	279
14.7	Carcinogens in foods: additives and preparation	281
14.8	Drinks and the risk of cancer	281
14.9	Chemoprevention	283
14.10	Prevention of second primary tumours	287
14.11	Summary and conclusions	287
14.12	References	288
15	Vitamin supplements and oral health	296
	<i>C. O. Enwonwu, University of Maryland, USA</i>	
15.1	Introduction	296
15.2	Classification of vitamins	297
15.3	Recommended dietary intakes	299
15.4	Nutritional supplements	303

15.5	Use of vitamin supplements	304
15.6	Brief review of the biological functions of vitamins	307
15.7	Oral manifestations of vitamin deficiencies	314
15.8	Conclusions	319
15.9	Assessment of vitamin status.....	320
15.10	References.....	321
16	Trace elements and oral health	331
	<i>M. Faber, Medical Research Council, South Africa;</i>	
	<i>F. A. M. Wenhold, University of Pretoria, South Africa</i>	
16.1	Introduction	331
16.2	Trace element content of teeth	332
16.3	Fluoride	333
16.4	Iron	337
16.5	Copper	338
16.6	Zinc	340
16.7	Selenium	343
16.8	Lead	344
16.9	Conclusions	344
16.10	References.....	345
17	Alcohol and oral health	350
	<i>S. Petti, 'Sapienza' University, Italy; and C. Scully, UCL</i>	
	<i>Eastman Dental Institute, UK</i>	
17.1	Introduction	350
17.2	Overall effect of alcohol on general health.....	351
17.3	Systemic effects of alcohol, influencing orofacial health	361
17.4	Direct effects of alcohol influencing orofacial health.....	370
17.5	References	373
18	Malnutrition as an etiological factor in dental caries disparity	381
	<i>P. Milgrom, P. Weinstein and S. E. Coldwell, University of Washington, USA</i>	
18.1	Introduction	381
18.2	Stress and depression	383
18.3	Counseling caregiver about diet	384
18.4	Impact of poor diet.....	385
18.5	Model of caries disparity.....	385
18.6	Ecological model of what people eat: tooth decay is part of a larger problem.....	386
18.7	Family influences on taste preferences	386
18.8	Food access	392

18.9	Food marketing	392
18.10	Conclusions	393
18.11	References	393
19	Tea as a functional food for oral health	396
	<i>C. D. Wu and G. Wei, University of Illinois at Chicago, USA</i>	
19.1	Introduction	396
19.2	Anticariogenic potential of tea	399
19.3	Tea and periodontal diseases	404
19.4	Tea and halitosis	405
19.5	Tea and oral cancer	406
19.6	Antimicrobial activity against fungi associated with oral infections	408
19.7	Antimicrobial activity against viruses associated with oral infections	408
19.8	Conclusion	409
19.9	References	410
 Part III Technology and product development		
20	Probiotics and oral health	421
	<i>J. H. Meurman, University of Helsinki, Finland</i>	
20.1	Probiotics: the concept	421
20.2	Probiotic species	422
20.3	Putative mechanisms of probiotic action	422
20.4	Probiotics as support therapy for systemic diseases.....	423
20.5	Probiotic strains and oral microbiology	424
20.6	Experimental and clinical studies of the effect of probiotics on oral and dental diseases	424
20.7	Safety aspects	428
20.8	Future trends	428
20.9	Conclusion	429
20.10	References	429
21	Oral care gum products	433
	<i>K. K. Mäkinen, University of Turku, Finland</i>	
21.1	Introduction: notes on early history; rationale for the use of oral care gums	433
21.2	Oral care gums in relation to other oral care adjuvants; advantages and disadvantages	434
21.3	' <i>In sputo veritas</i> ' – gum-chewing stimulates salivation and the chemical defence of saliva	435
21.4	Target groups for the administration of oral care gums	437

21.5	Examples of special oral care gum products	438
21.6	Clinical caries trials: school programmes	443
21.7	Effect after 'sugar challenge'	444
21.8	Biochemical effects in short-term polyol gum use	445
21.9	Gum products and remineralisation	446
21.10	Public endorsement of oral care gum products	447
21.11	Practical instructions for studies on oral care gums; incompatibilities among gum ingredients	448
21.12	References	450
22	Novel drug delivery systems for therapeutic intervention in the oral environment	455
	<i>S. Kalachandra, H. R. Howell, O. M. Patel, J. Li and D. A. Barrow, University of North Carolina, USA</i>	
22.1	Polymeric systems appropriate for oral drug delivery: history and background	455
22.2	Oral diseases that are potential candidates for local drug delivery	456
22.3	Design goals for modern oral drug delivery systems	459
22.4	Actual devices based on biocompatible materials	460
22.5	Use of additives to accelerate release and solubility of problematic (water-insoluble) drugs	464
22.6	Maintaining and assuring stability of drugs during device manufacturing	464
22.7	Future trends: multi-drug devices	465
22.8	Dedication	466
22.9	Acknowledgements	467
22.10	References	467
23	Formulating tooth-friendly beverages, confectionery and oral care products	470
	<i>M. E. Barbour, University of Bristol, UK</i>	
23.1	Introduction	470
23.2	Properties of beverages which may compromise dental health	471
23.3	Properties of confectionery which may compromise dental health	472
23.4	Properties of oral care products which may compromise dental health	472
23.5	Acids and dental erosion: approaches to, and mechanisms of, reducing acid-mediated tooth dissolution	473

23.6	Sugars and dental caries: approaches to, and mechanisms of, reducing carious tooth loss	475
23.7	Formulating tooth-friendly beverages	478
23.8	Formulating tooth-friendly confectionery	480
23.9	Formulating tooth-friendly oral care products	482
23.10	Future trends	483
23.11	References	483
24	Functional foods and oral health	488
	<i>H. Whelton, University College Cork, Ireland</i>	
24.1	Introduction	488
24.2	Foods associated with oral diseases and disorders	490
24.3	Foods which can be used to prevent and treat oral disease	492
24.4	Minerals and caries	493
24.5	Minerals and periodontal disease	499
24.6	Minerals and tooth surface loss	500
24.7	Animal products and caries	500
24.8	Animal products and other oral diseases	506
24.9	Plant products and caries	507
24.10	Plant products and periodontal disease	512
24.11	Plant products and oral cancer	514
24.12	Regulation of functional foods for oral health	514
24.13	References	519
