

Table of Contents

Non-Linear and Non-Conventional Techniques

- Phase-Based Methods for Voice Source Analysis 1
*Christophe d’Alessandro, Baris Bozkurt, Boris Doval,
Thierry Dutoit, Nathalie Henrich, Vu Ngoc Tuan, and
Nicolas Sturmel*
- Some Experiments in Audio-Visual Speech Processing 28
*G. Chollet, R. Landais, T. Hueber, H. Bredin, C. Mokbel,
P. Perrot, and L. Zouari*
- Exploiting Nonlinearity in Adaptive Signal Processing 57
Phebe Vayanos, Mo Chen, Beth Jelfs, and Danilo P. Mandic

Speech Synthesis

- Mixing HMM-Based Spanish Speech Synthesis with a CBR for Prosody
Estimation 78
*Xavi Gonzalvo, Ignasi Iriondo, Joan Claudi Socoró,
Francesc Alías, and Carlos Monzo*
- Objective and Subjective Evaluation of an Expressive Speech Corpus ... 86
*Ignasi Iriondo, Santiago Planet, Joan-Claudi Socoró, and
Francesc Alías*

Speaker Recognition

- On the Usefulness of Linear and Nonlinear Prediction Residual Signals
for Speaker Recognition 95
Marcos Faundez-Zanuy
- Multi Filter Bank Approach for Speaker Verification Based on Genetic
Algorithm 105
*Christophe Charbuillet, Bruno Gas, Mohamed Chetouani, and
Jean Luc Zarader*
- Speaker Recognition Via Nonlinear Phonetic- and
Speaker-Discriminative Features 114
Lara Stoll, Joe Frankel, and Nikki Mirghafori
- Perceptron-Based Class Verification 124
Michael Gerber, Tobias Kaufmann, and Beat Pfister

Speech Recognition

Manifold Learning-Based Feature Transformation for Phone Classification	132
<i>Andrew Errity, John McKenna, and Barry Kirkpatrick</i>	
Word Recognition with a Hierarchical Neural Network	142
<i>Xavier Domont, Martin Heckmann, Heiko Wersing, Frank Joublin, Stefan Menzel, Bernhard Sendhoff, and Christian Goerick</i>	
Hybrid Models for Automatic Speech Recognition: A Comparison of Classical ANN and Kernel Based Methods	152
<i>Ana I. García-Moral, Rubén Solera-Ureña, Carmen Peláez-Moreno, and Fernando Díaz-de-María</i>	
Towards Phonetically-Driven Hidden Markov Models: Can We Incorporate Phonetic Landmarks in HMM-Based ASR?	161
<i>Guillaume Gravier and Daniel Moraru</i>	
A Hybrid Genetic-Neural Front-End Extension for Robust Speech Recognition over Telephone Lines	169
<i>Sid-Ahmed Selouani, Habib Hamam, and Douglas O'Shaughnessy</i>	
Efficient Viterbi Algorithms for Lexical Tree Based Models	179
<i>Salvador España-Boquera, Maria Jose Castro-Bleda, Francisco Zamora-Martínez, and Jorge Gorbe-Moya</i>	

Speech Analysis

Non-stationary Self-consistent Acoustic Objects as Atoms of Voiced Speech	188
<i>Friedhelm R. Dreyer</i>	
The Hartley Phase Cepstrum as a Tool for Signal Analysis	204
<i>Ioannis Paraskevas and Maria Rangoussi</i>	
Voiced Speech Analysis by Empirical Mode Decomposition	213
<i>Aïcha Bouzid and Noureddine Ellouze</i>	
Estimation of Glottal Closure Instances from Speech Signals by Weighted Nonlinear Prediction	221
<i>Karl Schnell</i>	
Quantitative Perceptual Separation of Two Kinds of Degradation in Speech Denoising Applications	230
<i>Anis Ben Aicha and Sofia Ben Jebara</i>	

Exploitation of non-linear techniques

An Efficient VAD Based on a Generalized Gaussian PDF	246
<i>Oscar Pernía, Juan M. Górriz, Javier Ramírez, Carlos G. Puntonet, and Ignacio Turias</i>	
Estimating the Dispersion of the Biometric Glottal Signature in Continuous Speech	255
<i>Pedro Gómez, Agustín Álvarez, Luis Miguel Mazaira, Roberto Fernández, Victoria Rodellar, Rafael Martínez, and Cristina Muñoz</i>	
Trajectory Mixture Density Networks with Multiple Mixtures for Acoustic-Articulatory Inversion	263
<i>Korin Richmond</i>	
Application of Feature Subset Selection Based on Evolutionary Algorithms for Automatic Emotion Recognition in Speech	273
<i>Aitor Álvarez, Idoia Cearreta, Juan Miguel López, Andoni Arruti, Elena Lazkano, Basilio Sierra, and Nestor Garay</i>	
Author Index	283
