

# Table of Contents

Summary .....	XIII
<b>1 Introduction .....</b>	<b>1</b>
<b>2 Bayesian Statistics and MCMC Methods .....</b>	<b>9</b>
2.1 Bayesian inference .....	9
2.2 MCMC methods .....	10
2.2.1 The Gibbs sampler .....	11
2.2.2 The Metropolis-Hastings algorithm .....	12
2.2.3 Dealing with the MCMC output .....	13
<b>3 Bayesian Estimation of the GARCH(1,1) Model with Normal Innovations .....</b>	<b>17</b>
3.1 The model and the priors .....	17
3.2 Simulating the joint posterior .....	18
3.2.1 Generating vector $\alpha$ .....	20
3.2.2 Generating parameter $\beta$ .....	20
3.3 Empirical analysis .....	22
3.3.1 Model estimation .....	24
3.3.2 Sensitivity analysis .....	30
3.3.3 Model diagnostics .....	32
3.4 Illustrative applications .....	34
3.4.1 Persistence .....	34
3.4.2 Stationarity .....	36
<b>4 Bayesian Estimation of the Linear Regression Model with Normal-GJR(1,1) Errors .....</b>	<b>39</b>
4.1 The model and the priors .....	40
4.2 Simulating the joint posterior .....	41
4.2.1 Generating vector $\gamma$ .....	41
4.2.2 Generating the GJR parameters .....	42
Generating vector $\alpha$ .....	43
Generating parameter $\beta$ .....	44

- 4.3 Empirical analysis . . . . . 44
  - 4.3.1 Model estimation . . . . . 46
  - 4.3.2 Sensitivity analysis . . . . . 52
  - 4.3.3 Model diagnostics . . . . . 52
- 4.4 Illustrative applications . . . . . 53
  
- 5 Bayesian Estimation of the Linear Regression Model with Student- $t$ -GJR(1, 1) Errors . . . . . 55**
  - 5.1 The model and the priors . . . . . 56
  - 5.2 Simulating the joint posterior . . . . . 59
    - 5.2.1 Generating vector  $\gamma$  . . . . . 59
    - 5.2.2 Generating the GJR parameters . . . . . 60
      - Generating vector  $\alpha$  . . . . . 61
      - Generating parameter  $\beta$  . . . . . 62
    - 5.2.3 Generating vector  $\varpi$  . . . . . 62
    - 5.2.4 Generating parameter  $\nu$  . . . . . 63
  - 5.3 Empirical analysis . . . . . 64
    - 5.3.1 Model estimation . . . . . 64
    - 5.3.2 Sensitivity analysis . . . . . 70
    - 5.3.3 Model diagnostics . . . . . 70
  - 5.4 Illustrative applications . . . . . 71
  
- 6 Value at Risk and Decision Theory . . . . . 73**
  - 6.1 Introduction . . . . . 73
  - 6.2 The concept of Value at Risk . . . . . 76
    - 6.2.1 The one-day ahead VaR under the GARCH(1, 1) dynamics 77
    - 6.2.2 The  $s$ -day ahead VaR under the GARCH(1, 1) dynamics . 77
  - 6.3 Decision theory . . . . . 85
    - 6.3.1 Bayes point estimate . . . . . 85
    - 6.3.2 The Linex loss function . . . . . 86
    - 6.3.3 The Monomial loss function . . . . . 90
  - 6.4 Empirical application: the VaR term structure . . . . . 91
    - 6.4.1 Data set and estimation design . . . . . 92
    - 6.4.2 Bayesian estimation . . . . . 94
    - 6.4.3 The term structure of the VaR density . . . . . 95
    - 6.4.4 VaR point estimates . . . . . 96
    - 6.4.5 Regulatory capital . . . . . 100
    - 6.4.6 Forecasting performance analysis . . . . . 102
  - 6.5 The Expected Shortfall risk measure . . . . . 104
  
- 7 Bayesian Estimation of the Markov-Switching GJR(1, 1) Model with Student- $t$  Innovations . . . . . 109**
  - 7.1 The model and the priors . . . . . 111
  - 7.2 Simulating the joint posterior . . . . . 115
    - 7.2.1 Generating vector  $s$  . . . . . 117
    - 7.2.2 Generating matrix  $P$  . . . . . 118
    - 7.2.3 Generating the GJR parameters . . . . . 118

Generating vector $\alpha$ .....	120
Generating vector $\beta$ .....	121
7.2.4 Generating vector $\varpi$ .....	122
7.2.5 Generating parameter $\nu$ .....	122
7.3 An application to the Swiss Market Index .....	122
7.4 In-sample performance analysis .....	133
7.4.1 Model diagnostics .....	133
7.4.2 Deviance information criterion .....	134
7.4.3 Model likelihood .....	137
7.5 Forecasting performance analysis .....	144
7.6 One-day ahead VaR density .....	148
7.7 Maximum Likelihood estimation .....	152
<b>8 Conclusion</b> .....	<b>155</b>
<b>A Recursive Transformations</b> .....	<b>161</b>
A.1 The GARCH(1, 1) model with Normal innovations .....	161
A.2 The GJR(1, 1) model with Normal innovations .....	162
A.3 The GJR(1, 1) model with Student- $t$ innovations .....	163
<b>B Equivalent Specification</b> .....	<b>165</b>
<b>C Conditional Moments</b> .....	<b>171</b>
<b>Computational Details</b> .....	<b>179</b>
<b>Abbreviations and Notations</b> .....	<b>181</b>
<b>List of Tables</b> .....	<b>187</b>
<b>List of Figures</b> .....	<b>189</b>
<b>References</b> .....	<b>191</b>
<b>Index</b> .....	<b>201</b>
