Foreword	1
Acknowledgements	3
Table of contents	4
List of tables	8
List of figures	10
Executive summary	14
Overview	14
Background	15
Modular approach	16
Data sources and preferred employment estimates	16
Key findings	19
Conclusions	19
1. Overview and introduction	20
1.1. Background	20
1.1.1. Introduction	20
1.1.2. Rationale for producing quantitative skills projections	21
1.1.3. General approach	26
1.2. Data issues	29
1.2.1. Labour force surveys versus national accounts estimates	29
1.2.2. Other data issues	30
1.2.3. Country workbooks	30
1.3. Module 1: macroeconomic and sectoral scenarios	31
1.3.1. E3ME outline and overview	31
1.3.2. Alternative scenarios	33
1.4. Modules 2 and 3: expansion demand by occupation and qualifications	33
1.4.1. Overview of modules 2 and 3	33
1.4.2. Modelling employment by occupation and qualification	34
1.5. Module 4: replacement demand	35
1.5.1. General approach	35

2. National accounts versus labour force survey	37
2.1. Introduction	37
2.2. Examining the main differences	38
2.2.1. Methods and data collection	38
2.2.2. Concepts and definitions	39
2.2.2.1. Employment in the LFS	39
2.2.2.2. Employment in NA	40
2.2.2.3. Head count versus job count	40
2.2.2.4. Concepts usually not measured in NA	40
2.2.3. National versus domestic concept	40
2.2.4. Groups not included in the LFS	41
2.2.5. Sectoral and occupational classification	41
2.2.6. Employees of temporary employment agencies	42
2.3. Different aggregate employment levels	42
2.3.1. Differences caused by concept used	42
2.3.2. E3ME versus Eurostat estimates	46
2.3.3. NA-LFS differences for sectors	47
2.4. Conclusions	53
3. Macroeconomic and multisectoral scenarios	55
3.1. Introduction	55
3.2. The E3ME	56
3.2.1. General introduction to the E3ME	56
3.2.2. Theoretical background to E3ME	59
3.2.3. E3ME as a regional econometric input-output model	59
3.2.4. E3ME treatment of the labour market	62
3.2.5. Main data sources	64
3.2.6. Technical progress	65
3.2.7. Parameter estimation	65
3.2.8. Employment data	66
3.3. Producing baseline projections	66
3.3.1. Baseline economic forecast	66
3.3.2. Baseline employment projections	68
3.3.3. The role of country experts	69
3.3.4. Defining the scenarios	71
3.4. Summary of results	74
3.4.1. Baseline projections	74
3.4.2. Scenario results	76

4. Expansion demand and changes in occupational and qualifications structure	81
4.1. Introduction	81
4.2. Modelling occupational structure in forecasting	82
4.2.1. Most common methods	82
4.2.2. Best practice approaches to modelling occupational structure	83
4.3. Data available and the ideal specification	88
4.4. Empirical specifications	90
4.5. Data problems implications	93
4.6. Mlogit results for occupations and qualifications	101
4.6.1. Examples of results by selected industries	101
4.6.2. Overview of results for occupations	107
4.6.3. Qualifications results	118
4.7. Comparing methods for projecting shares	122
4.8. Concluding remarks	133
4.9. Algorithm for choice of specification	134
5. Replacement demand module	136
5.1. Introduction	136
5.2. General approach	136
5.3. Data	137
5.3.1. Labour force survey	138
5.3.2. Population forecasts	138
5.3.3. Participation	142
5.4. Methodology	146
5.4.1. Replacement demand components	146
5.4.2. Estimated and projected flows	146
5.5. Challenges	149
5.5.1. Methodological challenges	149
5.5.2. Data challenges	150
5.5.3. Migration	151
5.6. Results	153
5.6.1. Occupations	154
5.6.2. Country workbook	155
5.7. Concluding remarks	155

6. Forecast results	157
6.1. Background	157
6.2. Benchmark macro and sectoral employment scenario	157
6.2.1. Typical national results	157
6.2.1.1. Prospects by sector	158
6.2.1.2. Prospects by occupation and qualification	162
6.2.1.3. Replacement demand	169
6.2.2. Pan-European results	172
6.2.2.1. Prospects by sector	172
6.2.2.2. Prospects by occupation	176
6.2.2.3. Replacement demand	181
6.2.3. Detailed pan-European results by country	184
6.2.3.1. Prospects by sector	184
6.2.3.2. Prospects by occupation	192
6.2.3.3. Replacement demand	197
6.3. Alternative pan-European macro scenarios	200
6.3.1. Background	200
6.3.1.1. Sensitivity by sector	200
6.3.1.2. Sensitivity by occupation	202
6.3.1.3. Sensitivity of replacement demand	205
6.3.2. Sensitivity by qualifications	207
7. Conclusions and the way forward	212
7.1. Summary	212
7.2. Key findings	213
7.3. Policy implications	215
7.4. Outstanding data problems and scope for refinement	217
7.5. Continuing dialogue and country expert input	217
7.6. The way forward	218
Annex – List of contributing country experts	220

List of abbreviations	226

List of tables

1.1	Arguments for and against employment and skill needs forecasting	22
2.1	NA estimates national concept versus domestic concept	43
2.2	LFS (national) and NA (national) differences in employment across EU-27	44
2.3	LFS (national) and NA (domestic) differences in employment across EU-27 (domestic)	45
2.4	2005 E3ME and Eurostat estimates of NA employment	46
2.5	Differences between LFS and NA employment for six broad sectors of economic activity for each EU-25 Member State	47
3.1	E3ME industry classification	57
3.2	Baseline economic results	68
3.3	Scenario B: optimistic	70
3.4	Scenario C: pessimistic	72
3.5	Model variables changed in the positive and negative scenarios, 2007-20	73
3.6	Baseline employment (average annual growth rate)	74
3.7	Employment comparison between scenarios	77
4.1	List of variables used	85
4.2	Breaks and discontinuities in the LFS data	95
4.3	Multinomial logistic regression output, printing and publishing, Greece	103
4.4	Multinomial logistic regression output, banking and finance, Greece	104
4.5	Multinomial logistic regression output, printing and publishing, UK	105
4.6	Multinomial logistic regression output, banking and finance, UK	106
4.7	Occupational structure, all industries, logistic and mlogit, 2006, 2010, 2015, Greece	127
4.8	Occupational structure, all industries, simple extrapolation, 2006, 2010, 2015, Greece	128
4.9	Occupational share, all industries, 2015, Greece	129
5.1	Data availability	145
5.2	Net migration by country 2000-05	152
6.1	Employment trends by broad sector, Greece	159
6.2	Employment trends by industry, Greece	160

6.3	Employment trends by industry, changes, Greece	163
6.4	Employment trends (levels) by occupation, broad group, Greece	164
6.5	Employment trends (shares) by occupation, broad group, Greece	165
6.6	Employment growth by occupation, broad group, Greece	166
6.7	Employment change by occupation, broad group, Greece	167
6.8	Employment by qualification/level of education, Greece	168
6.9	Replacement demand by occupation, broad group, Greece	170
6.10	Employment trends by broad sector, EU-25+	173
6.11	Employment trends by industry, EU-25+	174
6.12	Employment trends by industry, changes, EU-25+	175
6.13	Employment trends (levels) by occupation, broad group, EU-25+	177
6.14	Employment trends (shares) by occupation, broad group, EU-25+	178
6.15	Employment trends (growth) by occupation, broad group, EU-25+	179
6.16	Employment trends (change) by occupation, broad group, EU-25+	180
6.17	Replacement demand by occupation, broad group, EU-25+	182
6.18	Changes in employment by country	185
6.19	Changes in employment by country, primary sector and utilities	186
6.20	Changes in employment by country, manufacturing	187
6.21	Changes in employment by country, construction	188
6.22	Changes in employment by country, distribution and transport	189
6.23	Changes in employment by country, business and other services	190
6.24	Changes in employment by country, non-marketed services	191
6.25	Occupational employment by country 2006 ('000)	193
6.26	Projected employment by country and occupation ('000)	194
6.27	Projected employment growth by country and occupation (%)	195
6.28	Projected employment growth (annual %)	196
6.29	Replacement demand by country and occupation ('000)	198
6.30	Total job openings by country and occupation ('000)	199
6.31	Employment trends by industry, different scenarios, EU-25+	202

6.32	Employment trends by broad occupation, different scenarios, EU-25+	204
6.33	Replacement demand by broad occupation based on LFS, EU-25+	206
6.34	Expansion demand by qualification, different scenarios, EU-25+	209
6.35	Total requirements by qualification, scenarios, EU-25+	211

List of figures

1.1	Overview of the modular approach to skills forecasting (the framework)	28
3.1	E3ME as a regional econometric input-output model	60
3.2	Baseline employment: average annual growth rate between 2007 and 2015	75
3.3	Baseline employment: average annual growth rate between 2007 and 2015 by main sector	76
3.4	Pessimistic scenario employment: average annual growth rate between 2007 and 2015	79
3.5	Optimistic scenario employment: average annual growth rate between 2007 and 2015	80
4.1	Occupational share, all industries, 1993-2006, UK	96
4.2	Occupational share, all industries, 1997-2006, Czech Republic	96
4.3	Occupational share, all industries, 1997-2006, France	97
4.4	Occupational share, all industries, 1993-2006, Ireland	98
4.5	Occupational share, all industries, 1993-2006, Italy	98
4.6	Occupational share, past trends and projections for all industries, 1992-2020, France	99
4.7	Occupational share, coal industries, 1993-2006, UK	100
4.8	Occupational share, past trends and projections for retailing, 1970-20, Ireland	100
4.9	Indicative occupational share for top 10 occupations, all industries, 1993-2015, UK	108
4.10	Indicative occupational share for top 10 occupations, all industries, 1993-2015, Greece	109
4.11	Indicative occupational share for top 10 occupations, all industries, 1993-2015, Latvia	110

4.12	Indicative occupational share for top 10 occupations, all industries, 1993-2015, Poland	111
4.13	Indicative occupational share for top 10 occupations, banking and finance, 1993-2015, Greece	112
4.14	Indicative occupational share for top 10 occupations, retailing, 1993-2015, Greece	112
4.15	Indicative occupational share for top 10 occupations, education, 1993-2015, Greece	113
4.16	Indicative occupational share for top 10 occupations, construction, 1993-2015, Greece	114
4.17	Indicative occupational share for top 10 occupations, distribution, 1993-2015, Greece	114
4.18	Indicative occupational share for top 10 occupations, communications, 1993-2015, UK	115
4.19	Indicative occupational share for top 10 occupations, communications, 1993-2015, Italy	116
4.20	Indicative occupational share for top 10 occupations, communications, 1993-2015, Latvia	116
4.21	Indicative occupational share for top 10 occupations, communications, 1993-2015, Poland	117
4.22	Qualification share, all industries and occupations, 1993-2015, Greece	118
4.23	Qualification share, all industries and occupations, 1993-2015, Ireland	119
4.24	Qualification share, all industries and occupations, 1993-2015, Cyprus	119
4.25	Qualification share, all industries and occupations, 1993-2015, UK	119
4.26	Qualification share, corporate managers, all industries, 1993-2015, Greece	120
4.27	Qualification share, physical, mathematical and engineering sciences professionals, all industries, 1993-2015, Greece	120
4.28	Qualification share, physical and engineering sciences associate professionals, all industries, 1993-2015, Greece	121
4.29	Qualification share, office clerks, all industries, 1993-2015, Greece	121
4.30	Qualification share, sales and services elementary occupations, all industries, 1993-2015, Greece	121

4.31	Occupational structure, constructions, mlogit, 1993-2015, Greece	123
4.32	Occupational structure, constructions, logistic function, 1993-2015, Greece	124
4.33	Occupational structure, constructions, retailing, 1993-2015, Greece	124
4.34	Occupational structure, constructions, retailing logistic function, 1993-2015, Greece	125
4.35	Occupational structure, constructions, distribution, mlogit, 1993-2015, Greece	125
4.36	Occupational structure, constructions, distribution, logistic, 1993-2015, Greece	126
4.37	Projected occupational share using different methods, 2015, Greece	130
4.38	Projected occupational share using different methods, managers, 2015, Greece	130
4.39	Projected occupational share using different methods, professionals, 2015, Greece	130
4.40	Projected occupational share using different methods, associates professionals, 2015, Greece	131
4.41	Projected occupational share using different methods, clerks, 2015, Greece	131
4.42	Projected occupational share using different methods, service workers, 2015, Greece	131
4.43	Projected occupational share using different methods, trade workers, 2015, Greece	132
4.44	Projected occupational share using different methods, machinery and plant operators, 2015, Greece	132
4.45	Projected occupational share using different methods, elementary occupations, 2015, Greece	132
4.46	Occupational change 2006-15, mlogit versus logistic, Greece	132
5.1	Annual predicted changes in the population 2005-15	139
5.2	Population forecast by age group for 2005, 2010, 2015	140
5.3	Participation rates across countries	143
5.4	Schematic of replacement demand	147
5.5	Total annual net replacement demand by country	154
6.1	Employment trends by broad sector, Greece	158
6.2	Employment trends by broad occupation, Greece	163

6.3	Employment trends by qualification/level of education, Greece	169
6.4	Employment trends by broad sector, EU-25+	172
6.5	Employment trends by broad occupation, EU-25+	176
6.6	Employment trends by broad sector, different scenarios, EU-25+	201
6.7	Employment trends by broad occupation, different scenarios, EU-25+	203
6.8	Total requirements by broad occupation, different scenarios, EU-25+	207
6.9	Expansion demand by qualification, different scenarios, EU-25+	208
6.10	Total requirements by qualification, different scenarios, EU-25+	210
