

# Table of Contents

<b>1</b>	<b>Hors d'œuvre</b> .....	1
1.1	Fundamental Constituents of Matter .....	1
1.2	Fundamental Interactions .....	2
1.3	Symmetries and Conservation Laws .....	4
1.4	Experiments .....	5
1.5	Units .....	6

---

## Part I Analysis: The Building Blocks of Matter

---

<b>2</b>	<b>Global Properties of Nuclei</b> .....	11
2.1	The Atom and its Constituents .....	11
2.2	Nuclides .....	13
2.3	Parametrisation of Binding Energies .....	18
2.4	Charge Independence of the Nuclear Force and Isospin .....	21
	Problem .....	23
<b>3</b>	<b>Nuclear Stability</b> .....	25
3.1	$\beta$ -Decay .....	26
3.2	$\alpha$ -Decay .....	31
3.3	Nuclear Fission .....	33
3.4	Decay of Excited Nuclear States .....	35
	Problems .....	39
<b>4</b>	<b>Scattering</b> .....	41
4.1	General Observations About Scattering Processes .....	41
4.2	Cross Sections .....	44
4.3	The "Golden Rule" .....	48
4.4	Feynman Diagrams .....	49
	Problems .....	52
<b>5</b>	<b>Geometric Shapes of Nuclei</b> .....	53
5.1	Kinematics of Electron Scattering .....	53
5.2	The Rutherford Cross-Section .....	56
5.3	The Mott Cross-Section .....	60

5.4	Nuclear Form Factors .....	61
5.5	Inelastic Nuclear Excitations .....	69
	Problems .....	71
<b>6</b>	<b>Elastic Scattering off Nucleons</b> .....	<b>73</b>
6.1	Form Factors of the Nucleons .....	73
6.2	Quasi-elastic Scattering .....	78
6.3	Charge Radii of Pions and Kaons .....	80
	Problems .....	82
<b>7</b>	<b>Deep Inelastic Scattering</b> .....	<b>83</b>
7.1	Excited States of the Nucleons .....	83
7.2	Structure Functions .....	85
7.3	The Parton Model .....	89
7.4	Interpretation of Structure Functions in the Parton Model ...	91
	Problems .....	95
<b>8</b>	<b>Quarks, Gluons, and the Strong Interaction</b> .....	<b>97</b>
8.1	The Quark Structure of Nucleons .....	97
8.2	Quarks in Hadrons .....	102
8.3	The Quark-Gluon Interaction .....	103
8.4	Scaling Violations of the Structure Functions .....	108
	Problem .....	111
<b>9</b>	<b>Particle Production in <math>e^+e^-</math> Collisions</b> .....	<b>113</b>
9.1	Lepton Pair Production .....	114
9.2	Resonances .....	118
9.3	Non-resonant Hadron Production .....	123
9.4	Gluon Emission .....	125
	Problems .....	126
<b>10</b>	<b>Phenomenology of the Weak Interaction</b> .....	<b>127</b>
10.1	Properties of Leptons .....	128
10.2	The Types of Weak Interactions .....	132
10.3	Coupling Strength of the Weak Interaction .....	134
10.4	The Quark Families .....	139
10.5	The Lepton families .....	142
10.6	Majorana Neutrino? .....	144
10.7	Parity Violation .....	144
10.8	Deep Inelastic Neutrino Scattering .....	147
	Problems .....	150

<b>11 Exchange Bosons of the Weak Interaction</b> .....	151
11.1 Real W and Z Bosons .....	151
11.2 Electroweak Unification .....	156
Problem .....	163
<b>12 The Standard Model</b> .....	165

---

## Part II Synthesis: Composite Systems

---

<b>13 Quarkonia</b> .....	171
13.1 The Hydrogen Atom and Positronium Analogues .....	171
13.2 Charmonium .....	174
13.3 Quark–Antiquark Potential .....	177
13.4 The Chromomagnetic Interaction .....	180
13.5 Bottonium and Toponium .....	181
13.6 The Decay Channels of Heavy Quarkonia .....	183
13.7 Decay Widths as a Test of QCD .....	185
Problems .....	187
<b>14 Mesons Made from Light Quarks</b> .....	189
14.1 Mesonic Multiplets .....	189
14.2 Meson Masses .....	193
14.3 Decay Channels .....	195
14.4 Neutral Kaon Decay .....	197
Problems .....	199
<b>15 The Baryons</b> .....	201
15.1 The Production and Detection of Baryons .....	201
15.2 Baryon Multiplets .....	207
15.3 Baryon Masses .....	210
15.4 Magnetic Moments .....	213
15.5 Semileptonic Baryon Decays .....	217
15.6 How Good is the Constituent Quark Concept? .....	225
Problems .....	226
<b>16 The Nuclear Force</b> .....	229
16.1 Nucleon–Nucleon Scattering .....	230
16.2 The Deuteron .....	234
16.3 Nature of the Nuclear Force .....	237
Problems .....	243

<b>17</b>	<b>The Structure of Nuclei</b> .....	245
	17.1 The Fermi Gas Model .....	245
	17.2 Hypernuclei .....	250
	17.3 The Shell Model .....	253
	17.4 Deformed Nuclei .....	261
	17.5 Spectroscopy Through Nuclear Reactions .....	264
	17.6 $\beta$ -Decay of the Nucleus .....	271
	17.7 Double $\beta$ -decay .....	279
	Problems .....	283
<b>18</b>	<b>Collective Nuclear Excitations</b> .....	285
	18.1 Electromagnetic Transitions .....	286
	18.2 Dipole Oscillations .....	289
	18.3 Shape Oscillations .....	297
	18.4 Rotation States .....	300
	Problems .....	309
<b>19</b>	<b>Nuclear Thermodynamics</b> .....	311
	19.1 Thermodynamical Description of Nuclei .....	312
	19.2 Compound Nuclei and Quantum Chaos .....	314
	19.3 The Phases of Nuclear Matter .....	317
	19.4 Particle Physics and Thermodynamics in the Early Universe .....	322
	19.5 Stellar Evolution and Element Synthesis .....	330
	Problems .....	336
<b>20</b>	<b>Many-Body Systems in the Strong Interaction</b> .....	337
<b>A</b>	<b>Appendix</b> .....	341
	A.1 Accelerators .....	341
	A.2 Detectors .....	348
	A.3 Combining Angular Momenta .....	358
	A.4 Physical Constants .....	360
	<b>Solutions to the Problems</b> .....	361
	<b>References</b> .....	385
	<b>Index</b> .....	393
