Preface, xi

Acknowledgments, xiii

## PART I. THE APPROACH

CHAPTER 1.	<i>Brain, Behavior, and the Evolution of Mind</i>	3
	The Evolutionary Approach, 5	
	Principles of Brain Function and Evolution, 7	
	Biological Intelligence, 16	
CHAPTER 2.	<i>Evidence, Background, and Methods</i>	26
	Fossil Brains, 26	
	Vertebrate History, 33	
	Measuring the Evolution of the Brain, 41	
CHAPTER 3.	<i>Gross Brain Indices and the Meaning of Brain Size</i>	55
	Gross Brain Indices, 56	
	The Meaning of Brain Size, 63	
	Gross Brain Size and Brain Functions, 74	
CHAPTER 4.	<i>Beginnings: Habits and Brains</i>	82
	The First Vertebrates, 82	
	The Generalized Vertebrate Brain: A Primer for Endocasts, 88	

## PART II. THE BASIC VERTEBRATE RADIATION

CHAPTER 5.	<i>The Lower Vertebrates: Fish</i>	99
	Brains and Bodies of Fish, 100	
	Brain Evolution in Living Classes of Fish, 108	
	Potential for Life on Land, 115	
	Conclusions, 122	
CHAPTER 6.	<i>Invasion of the Land: The First Tetrapods</i>	124
	Adaptive Radiation, 124	
	Brains and Bodies of Amphibians, 130	
	Conclusions, 135	
CHAPTER 7.	<i>The Radiation of the Reptiles</i>	137
	Evolutionary History, 138	
	Relative Brain Size in Dinosaurs, 141	
	The Mammallike Reptiles, 149	
	Conclusions, 154	
CHAPTER 8.	<i>Flying Reptiles and Aerial Niches</i>	156
	The Control of Flight, 156	
	Flying Reptiles, 161	
	Conclusions, 171	

## PART III. BRAIN ENLARGEMENT AND THE BASIC VERTEBRATE RADIATION

CHAPTER 9.	<i>Evolution of the Brain in Birds</i>	177
	Evolutionary Background, 178	
	Brain and Body in <i>Archaeopteryx</i> , 182	
	Cretaceous and Cenozoic Birds, 192	
	Brains for Aerial Niches, 197	
CHAPTER 10.	<i>Mammalian Brains for Mesozoic Niches</i>	200
	Relative Brain Size, 206	
	Evolutionary Implications, 213	

CHAPTER 11.	<i>Archaic Tertiary Mammals and Their Brains</i>	225
	Evolutionary Background, 226	
	Relative Brain Size, 235	
	Forebrain, Hindbrain, and Olfactory Bulbs, 245	
	Conclusions, 253	
CHAPTER 12.	<i>Basic Selection Pressures for Enlarged Brains</i>	256
	Mammalian Trends and Nocturnal Adaptive Zones, 261	
	Avian Trends and Adaptive Zones, 275	
PART IV. PROGRESSIVE EVOLUTION OF THE BRAIN		
CHAPTER 13.	<i>Progressive Tertiary Evolution: Ungulates and Carnivores</i>	287
	Evolutionary History, 289	
	Brain Morphology, 293	
	Relative Brain Size, 303	
	Conclusions, 318	
CHAPTER 14.	<i>Neotropical Herbivores: An Evolutionary Experiment</i>	320
	Evolutionary Background, 321	
	The Experiment, 323	
	Experimental Conclusions, 335	
CHAPTER 15.	<i>Special Topics</i>	340
	Evolutionary Trends, 341	
	Lessons from the Pleistocene, 355	
CHAPTER 16.	<i>The Primates and Man</i>	363
	Evolutionary Background, 364	
	Relative Brain Size in Prosimians, 373	
	Relative Brain Size in Anthropoids, 387	
	Enlarged Brains in Primates: Selection Pressures, 402	

CHAPTER 17.	<i>The Significance of the Progressive Enlargement of the Brain</i>	406
	Theoretical Background, 407	
	Selection Pressures toward Enlarged Brains, 411	
	Hominids and the Human Brain, 420	
	The Work of the Hominid Brain, 424	
	Conclusions, 432	

	BIBLIOGRAPHY	435
--	--------------	-----

APPENDIX I.	<i>Wirz's Analysis of Relative Size of Parts of the Brain</i>	457
APPENDIX II.	<i>Statistical Tests on Mammalian Data</i>	462
APPENDIX III.	<i>Foramen Magnum, the Size Factor, and Brain Size</i>	466

	INDEX	471
--	-------	-----
