List of Tables and Figures	viii
Preface	xiii
1. Nature and Nurture	1
Nature	5
DNA	7
Structural Genes	8
<i>Nature-Nurture at a Molecular Level:</i>	
<i>the Lac Operon Model Of Gene Regulation</i>	9
<i>Gene Regulation in More Complex Organisms</i>	12
<i>Gene Regulation and Development</i>	14
<i>Gene Regulation and Individual Differences</i>	16
<i>Selection, Instruction, and Adaptation</i>	18
<i>The Extended Phenotype</i>	23
<i>Quantitative Genetics</i>	24
Nurture	26
<i>Molecular Biological Analysis of the Environment</i>	26
<i>History of Environmental Research</i>	27
<i>Models of Environment</i>	29
<i>Levels of Environment</i>	34
<i>Environmental Specificity</i>	36
<i>Environments Across Time</i>	37
<i>New Environmental Theories</i>	
<i>of Nature And Nurture</i>	38
Summary	40

2. The Nature of Nurture: Family Environment	41
Quantitative Genetic Methods	41
Rowe's Studies	45
Other Research on Children's Perceptions of Family Environment	49
<i>Retrospective Reports of Middle-aged Twins Reared Apart and Twins Reared Together</i>	50
<i>Reports Of Relative Differences in Family Environments</i>	54
<i>A Systematic Examination of Family Environment Measures</i>	60
Research On Parents' Perceptions of Family Environment	62
<i>Child-based Genetic Designs</i>	64
<i>Parent-based Genetic Designs</i>	66
<i>A Parent-offspring Adoption Study in Middle Childhood</i>	69
<i>Why no Genetic Contribution for Parental Control?</i>	70
Observational Research on the Family Environment	71
<i>Home Observation for Measurement of the Environment In Cap</i>	71
<i>Lytton's Observational Twin Study</i>	74
<i>Videotape Observations of Mother-child Interactions In Cap</i>	74
<i>Nead: A New Observational Study</i>	78
Summary	79
3. The Nature Of Nurture:	
The Environment Beyond the Family	82
Peers	82
Friends and Teachers	86
Social Support	88
Life Events	89
Others Aspects Of Extrafamilial Environments	95
<i>Classroom Environment</i>	95
<i>Work Environment</i>	96
<i>Children's Television Viewing</i>	97
<i>Exposure to Drugs</i>	99
<i>Socioeconomic Status and Education</i>	99
Summary	101
4. Nature-nurture: Mediators of the Genetic	
Contribution to Measures of the Environment	104
Genotype-Environment Correlation	105
<i>Three Types of GE Correlation</i>	106

<i>Methods to Identify Measured GE Correlation</i>	108
Genetic Correlates Of Environmental Measures	110
Multivariate Genetic Analysis: Passive, Reactive, and Active GE Correlation	113
<i>Multivariate Genetic Analysis</i>	113
<i>Home, IQ, and Temperament</i>	119
<i>Parenting and Personality</i>	124
<i>Other Multivariate Genetic Analyses</i>	129
Environment-Behavior Correlations In Nonadoptive Versus Adoptive Homes:	
Passive GE Correlation	132
<i>Home and IQ</i>	135
<i>Measures of Family Environment</i> <i>as Related to Other Developmental Measures</i>	138
<i>Parental Mediators of Passive GE Correlation</i>	140
<i>Beyond the Family Environment</i>	143
An Adoption Design to Detect Specific Reactive and Active GE Correlations	144
Summary	148
5. Nature-Nurture and Experience	152
GE Correlation and Development	153
Experience	155
A Theory of Genetics and Experience	159
1. <i>Genetic Differences Among Individuals</i> <i>Contribute to Measures of the Environment</i>	160
2. <i>The Genetic Contribution to</i> <i>Measures of the Environment is</i> <i>Greater for Measures of Active Experience</i>	161
3. <i>The Genetic Contribution to Measures of the</i> <i>Environment is Due in Part to Psychological Traits</i>	161
4. <i>Genetic Differences Among Individuals</i> <i>Contribute to Differences in Experience</i> <i>Independent of Psychological Traits</i>	162
5. <i>Genetic Factors Contribute to Links Between</i> <i>Environmental Measures and Developmental</i> <i>Outcomes</i>	163
6. <i>Processes Underlying Genetic Contributions</i> <i>to Experience Change During Development</i>	163
7. <i>Specific Genes That Affect Experience</i> <i>Will Be Identified</i>	163
References	169
Index	183
About the Author	189

Tables and Figures

Figure 1.1. The Operon Model of Gene Regulation in the Absence or Presence of the Regulatory Metabolite	11
Table 1.1 Three Views of the Child's Environment	30
Table 2.1 Twin Correlations for Adolescent Twins' Ratings of Their Parents' Child Rearing	47
Table 2.2 Twin Correlations and Heritabilities for Adult Twins' Retrospective Ratings of Their Childhood Family Environment	52
Table 2.3 MZ and DZ Within-Pair Sibling Differences on the SIDE in Adult Twins	57
Table 2.4 MZ and DZ Within-Pair Differences on the SIDE in Adolescent Twins	58
Table 2.5 Nonadoptive and Adoptive Within-Pair Differences on the SIDE in Adolescents and Young Adults	60
Table 2.6 Within-Pair Differences for Adolescent Full Siblings and Unrelated Siblings in Stepfamilies on the SIDE	61
Table 2.7 NEAD Components of Variance by Respondent and Target	63
Table 2.8 Nonadoptive and Adoptive Sibling Correlations and Model-Fitting Heritabilities for Parental Reports on a Measure of Parenting Style When the Children Were 7 and 9 Years Old	66

Table 2.9 Percentages of Twin Pairs Experiencing the Same Degree of Parental Warmth or Criticism	67
Table 2.10 SATSA Twin Correlations and Heritabilities for Adult Twins' Ratings of Their Current Family Environment	68
Table 2.11 Parent-Offspring Correlations for Nonadoptive and Adoptive Parents and Their 7-Year-Old Children	70
Table 2.12 Correlations for Nonadoptive and Adoptive Siblings and Model-Fitting Results for the HOME Total Score at Ages 1 and 2	73
Table 2.13 Correlations for Nonadoptive and Adoptive Siblings for Videotaped Observations of Mother-Child Interaction at 1, 2, and 3 Years of Age	76
Table 2.14 Correlations for Nonadoptive and Adoptive Siblings for Videotaped Observations of Mother-Child Interaction and Maternal Interviews When the Younger Sibling Was 4 and the Older Sibling 7 on Average	77
Table 2.15 NEAD Model-Fitting Components of Variance for Composites of Videotaped Observations Derived From a Measurement Model	80
Table 3.1 MZ and DZ Within-Pair Differences for Retrospective Reports of Adult Twins on the SIDE Peer Scales	84
Table 3.2 MZ and DZ Within-Pair Differences on the SIDE Peer Scales in Adolescent Twins	84
Table 3.3 Nonadoptive and Adoptive Within-Pair Differences on the SIDE Peer Scales for Adolescents and Young Adults	85
Table 3.4 Within-Pair Differences for Stepfamily Full Siblings and Unrelated Siblings on the SIDE Peer Scales in Adolescents	85
Table 3.5 NEAD Sibling Correlations and Heritabilities for Parental Ratings of Siblings' Peers	86
Table 3.6 NEAD Sibling Correlations and Heritabilities for Child Ratings of Friends and Teachers	87
Table 3.7 Twin Correlations and Heritabilities for Adult Twins' Ratings of Social Support	89
Table 3.8 Twin Correlations and Heritabilities for Adult Female Twins' Ratings of Social Support	89

Table 3.9 Twin Correlations and Heritabilities for Older Adult Twins' Ratings of Life Events	91
Table 3.10 Twin Correlations and Heritabilities for Adult Twins' Ratings of Life Events	93
Table 3.11 Twin Correlations for Young Adult Twins' Retrospective Ratings of Classroom Environment	96
Table 3.12 Twin Correlations and Heritabilities for Older Adult Twins' Ratings of Work Environment	98
Table 3.13 Correlations for Nonadoptive and Adoptive Siblings for Amount of Television Viewing at 3, 4, and 5 Years of Age	99
Table 3.14 Correlations Between Biological, Adoptive, and Nonadoptive Parents and Their Children for Amount of Television Viewing at 3, 4, and 5 Years of Age	100
Table 4.1 Three Types of Genotype-Environment Correlation	108
Figure 4.1 A Bivariate Genetic Analysis of the Extent to Which Genetic Effects on an Environmental Measure Can Be Explained by Genetic Effects on a Correlate Measure	115
Figure 4.2 An Alternative Presentation of the Path Diagram in Figure 4.1	117
Figure 4.3 A Bivariate Analysis of the Extent to Which Genetic Effects on the HOME Can Be Explained by Genetic Effects on the Bayley Mental Development Index at 1 and 2 years	121
Figure 4.4 A Trivariate Analysis of the Extent to Which Genetic Effects on the FES Relationship Factor Can Be Explained by Genetic Effects on Neuroticism and Extraversion	126
Figure 4.5 An Adoption Design to Detect Passive GE Correlation by Comparing the Correlation Between the HOME and Children's Bayley Scores in Nonadoptive and Adoptive Families.	134
Table 4.2 Passive GE Correlation: HOME-Bayley Correlations for Nonadopted and Adopted Infants at Ages 1 and 2	137
Table 4.3 Passive GE Correlation: Correlations Between Child Report of First-Grade Stress and Teacher Reports of Behavior Problems in First Grade and 2 Years Later	144
