Notes on the contributors xiii

1. Introduction: rewards and challenges of multi-perspectival work on the evolution of language and speech 1
   Rudolf Botha

2. Why only humans have language 12
   Robin Dunbar

3. Is sociality a crucial prerequisite for the emergence of language? 36
   Luc Steels

4. Holistic communication and the co-evolution of language and music: resurrecting an old idea 58
   Steven Mithen

5. Music as a communicative medium 77
   Ian Cross and Ghofur Eliot Woodruff

6. Cultural niche construction: evolution’s cradle of language 99
   John Odling-Smee and Kevin N. Laland

7. Playing with meaning: normative function and structure in play 122
   Sonia Ragir and Sue Savage-Rumbaugh

8. The ontogeny and phylogeny of non-verbal deixis 142
   David A. Leavens, Timothy P. Racine, and William D. Hopkins

9. The directed scratch: evidence for a referential gesture in chimpanzees? 166
   Simone Pika and John C. Mitani

10. The origins of the lexicon: how a word-store evolved 181
    Maggie Tallerman
11. Language: symbolization and beyond
   Eric Reuland
   201

12. Grammaticalization from a biolinguistic perspective
   Elly van Gelderen
   225

13. Recursion, phonological storage capacity, and the evolution of modern speech
    Frederick L. Coolidge and Thomas Wynn
   244

14. Why women speak better than men (and its significance for evolution)
    Bart de Boer
   255

15. Mosaic neurobiology and anatomical plausibility
    Wendy K. Wilkins
   266
