

Contents

1	Introduction.....	1
1.1	Fold-thrust belts, definition, significance.....	1
1.2	Books about FTB.....	1
1.3	Inventories of FTB data.....	2
1.4	Cross sections.....	3
1.5	About the present book.....	3
1.6	Acknowledgments.....	5
2	Orogenic belts, fold-thrust belts, global tectonics.....	6
2.1	Diagnosis.....	6
2.2	Subduction: word and concept.....	6
2.3	Orogeny is linked to subduction.....	7
2.4	Early views of plate-margin belts.....	8
2.5	Some terms defined.....	10
2.6	Mathematics in Geological Inventories.....	11
2.7	Mantle cooling, supercontinents, global orogenic systems.....	12
2.8	Lithosphere.....	13
2.9	Plate tectonics, precision, and imprecision.....	14
2.10	Forces of orogeny, defined verbally.....	16
2.11	Sutures and Megasutures.....	18
3	Cordilleran tectonics.....	20
3.1	Four Cordilleran plate settings.....	20
3.2	Back-arc spreading and Cordilleran ophiolite emplacement.....	21
3.3	Cordilleran tectonics: building a complex model.....	22
3.4	Arc-trench gap, accretionary wedge, synthetic FTB.....	22
3.5	Cordilleran response to two ranges of slab dips.....	24
3.6	Cordillera: a cradle of Coulomb wedges.....	25
3.7	Cordilleran main-thrust tectonics.....	26
3.8	Two documented examples.....	28
4	Basins, sediments, geosynclines.....	31
4.1	Basin types in orogens.....	31
4.2	Using stratigraphic data for building cross sections.....	36
4.3	Geodynamics of sedimentary basins.....	36

4.4	Collision orogens and their sedimentary basins	42
4.5	Extremely thin crystalline thrust sheets	43
4.6	Internide and externide units	44
4.7	Contact between Internides and Externides.....	44
5	Internides: location, dimensions, composition	46
5.1	Different plate tectonic settings	46
5.2	Arc magmatism and magmatic arcs.....	46
5.3	Accreted, exotic, docked terranes, collages.....	47
5.4	Ophiolite belts and oceanic lithosphere.....	48
5.5	Ophiolite emplacement and ophiolitic melanges.....	50
5.6	Metamorphism: concepts and methods	51
5.7	Central-Alpine PT path.....	52
5.8	Diaphoresis or retrograde metamorphism	53
5.9	Structural styles of metamorphic terranes	54
5.10	Eclogites and high-pressure tectonics.....	54
5.11	Stockwerk Tectonics in East Greenland	57
5.12	Low end of the P/T field: the hydrocarbon kitchens.....	59
6	Externide fold-thrust belt.....	61
6.1	Diagnosis: a moving and thickening wedge	61
6.2	Wedge dynamics	62
6.3	Wedge thickening	65
6.4	Plastic flow and style zonation	67
6.5	Stratigraphic location of the wedge sole.....	68
6.6	Wedge growth.....	68
6.7	Size and Spacing of sledrunner thrust sheets.....	69
6.8	Thin wedges and Disturbed Belts	69
6.9	Tectonic setting of FTB wedges	71
7	Four structural styles of Fold-Thrust Belts.....	73
7.1	Styles in rock, in concept, in illustration	73
7.2	Dahlstromian style	74
7.3	Impact of the work by Shell, Dahlstrom and Suppe.....	79
7.4	About tectonic and graphic styles.....	80
7.5	Biotian style: detached coherent buckle folds	80
7.6	Runaway fold belts, incomplete support	81
7.7	Biotian fold belts: seismicity and geological aspects	85
7.8	Style of basement upthrusts (basement-cored folds)	86
7.9	Slate-belt style	90
7.10	Sites of slate-belt tectonics	92
7.11	Dealing graphically with basement upthrusts.....	93
7.12	Dealing graphically with bed-parallel detachments	94

8	Style mixtures.....	95
8.1	Mesonides: a transitional belt	95
8.2	Style mixtures and remnant bodies.....	95
8.3	Discordant thrust faults are significant style mixtures.....	97
9	Selected details of externide FTB.....	100
9.1	Uniformity and Diversity.....	100
9.2	Foreland flexure, practical approximations	100
9.3	Strike ends of FTB and their style changes	101
9.4	Strain rates and style changes.....	103
9.5	Foothills and orogenic fronts	104
9.6	Shallow thrust fronts.....	104
9.7	Deep detached folds.....	104
9.8	Blind front with backthrust, triangle zone	105
9.9	Duplexes	109
10	Retrocharriage, steep zones, rotation zones	111
10.1	Location and wedge dynamics	111
10.2	Fan-shaped steep zone: transported internide assemblage	113
10.3	Kinked steep zone: post-collisional wedge compression	114
10.4	An FTB cross section, inventory-style	114
11	Further aspects of orogenic belts.....	118
11.1	Orogenic belts and extensional tectonics.....	118
11.2	Orogenic belts and strike-slip tectonics.....	121
11.3	Orogenic plateaus	125
11.4	Oceanic orogenic belts.....	125
11.5	Gravity-driven fold-thrust belts	126
12	Gravity Spreading and Gravity Collapse Revisited	128
12.1	A change of mind	128
12.2	Composite detached wedges.....	129
12.3	South-Tibetan Extensional Detachment	131
12.4	Central Brooks Range: site of a decayed polyphase Moho root.....	133
12.5	Gravity spreading above Moho roots: many uncharted sites.....	135
13	Fold-thrust belts and petroleum exploration	137
13.1	Merits of industry, surveys, academia	137
13.2	Present state of petroleum exploration	137
13.3	Global resources of petroleum in fold-thrust belts	139
13.4	Commercial petroleum deposits: geological checklist	139
13.5	Drilling in fold-thrust belts: successes and failures.....	141
	References.....	146
