Preface *xi*
Foreword *xv*

1

Introduction 1

What is Man? 1

Animal Nature and Human Nature 2

The Phylogenetic Regression-Progression Model 29

Summary 30

2

The New Biology 33

The New Darwinian Revolutions 33

The New Biology and New Social Science 37

The Evolved Nervous System 53

Summary 73

3

Ape and Angel Revisited: A Theoretical Perspective 75

Phylogenetic Regression-Progression 75

Intelligence and the Regression-Progression Continuum 99

Summary 113

4

Regression-Progression and Human Evolution 116

The Continuum 116

The Content of Human Evolution 124

Summary 157

5

**Fundamental Paleopsychology: Correlates and
Consequences of Phylogenetic Regression 160**

Correlates 160

Summary and Comment 200

6

The Primers and Elicitors of Phylogenetic Regression 202

Internal Primers 205

External Elicitors 219

Summary 236

7

Some Special Theory-Derived Primers and Elicitors 240

Stress-Related Elicitors 240

Other Theory-Derived Elicitors 248

Summary 262

8

The Paleopsychology of Motivation and Learning 264

Motivation and Behavior 264

Learning and Behavior 283

Summary 300

9

Hierarchical Analysis of Behavior and Misbehavior 303

The Causes of Behavior 303

The Method of Hierarchical Analysis 330

Summary 347

10**The Mark of Cain: Old Aggression in a New Age 349**

Quotes of Our Time 349

Background Issues 350

Aggression, Violence, and the Brain 363

Theoretical Considerations 372

Summary 383

11**Paleopsychological Bases of Aggression in Humans 386**

General Overview 386

Primitive Aggression Type 1: Predation 390

Primitive Aggression Type 2: Territoriality 400

Primitive Aggression Type 3: Dominance 409

Summary 420

12**The Paleopsychology of Pathological Processes 423**

Definitions and Theory 423

Illustrative Analyses: Disorders of the

Sex-Aggression Linkage 438

Summary 457

Appendix**The Regression-Progression Model: Assumptions,
Subassumptions, and Corollaries 460****References 486****Author Index 509****Subject Index 600**
