LIST OF FIGURES	XIV
LIST OF TABLES	XVIII
LIST OF SYMBOLS	XIX
ABSTRACT	XXIII
ABSTRAKT	XXIV
1 GENERAL INTRODUCTION	1
2 MOTIVATION	9
3 THE "KANNST" RESEARCH PROJECT	15
3.1 Discharge Control	17
3.2 Partners in the KANNST Project	18
3.3 Aims of the Project	20
3.4 Description of the Basic Situation	21
3.5 The Bröl and its Catchment Area	24
4 STATE OF THE ART AND SCIENCE	27
4.1 Introduction	27
4.2 Measurement Technology within Wastewater Systems	27
4.2.1 Measurands	29
4.2.2 Measuring Instruments	31
4.2.2.1 Measurement Process for Ammonium Nitrogen	32
4.2.2.2 Measurement Process for Chemical Oxygen Demand	34
4.2.3 Evaluation of the NH ₄ -N Measurement Data in the Aeration Tank (AT)	35
4.2.4 Evaluation of Optical Measurement Processes	36
4.2.5 Taking Measurements in inflow stream of a Wastewater Treatment Plant	37
4.2.6 Results of the Measurements in the Inflow stream	38
4.2.7 State of Science – Taking Measurements in the Sewerage System	39
4.2.8 Taking Measurements in Flowing Water	41
4.3 Simulation of Wastewater Systems	42
4.3.1 Construction of a Simulation	42
4.3.2 Mathematical Reproduction of the Movement of Water	45
4.3.2.1 Hydrological Computational Methods	46
4.3.2.2 Hydrodynamic Computational Methods	47
4.3.3 State of Science – Simulation	48

4.4	Control of Wastewater Systems	52
4.4.1	State of WWTP Control	53
4.4.1.1	Dynamic Combined Wastewater	54
4.4.1.2	Control Measures in the Final Clarification Area	56
4.4.2	State of the Discharge Control within the Sewerage System	56
4.4.3	State of Integrated Discharge control	58
5	TECHNICAL RESEARCH	61
5.1	Introduction	61
5.2	Work packages for the integrated discharge control in KANNST	61
5.3	Technical Research – Measurement Technology Systems	63
5.3.1	Taking Measurements within the Sewerage System	64
5.3.1.1	Wastewater Measuring Containers	64
5.3.1.2	Devices for the Measurement of Pollutants in the Wastewater Container	67
5.3.1.3	Maintenance of Devices	69
5.3.1.4	Maintenance Costs	71
5.3.2	Results for the Measuring Equipment within the Sewerage System	72
5.3.2.1	Measurement of Ammonium Nitrogen	73
5.3.2.2	COD Measurements	76
5.3.3	Measurements in the Surface Water	78
5.3.3.1	Container Construction and Commissioning	79
5.3.4	Evaluation of the River-Water Containers	79
5.3.5	Precipitation Measurements	82
5.3.5.1	Structure of the Precipitation Measuring Field	83
5.3.5.2	Presentation of Measuring Processes	85
5.3.6	Comparison of the Precipitation Measurements	87
5.3.7	Weather Early Warning Systems	89
5.3.7.1	Estimated Forecast Data	90
5.3.7.2	Area Radar Device	91
5.3.7.3	Weather Satellite	92
5.3.8	Calculation of the Effective Period of Precipitations	94
5.4	Technical Research – Simulation Systems	95
5.4.1	Simulation of the Homburg-Bröl Wastewater Treatment Plant	95
5.4.1.1	Wastewater inflow stream	97
5.4.1.2	Sand Trap and Primary Sedimentation Tank	98
5.4.1.3	Booster Pump Unit	99
5.4.1.4	Aeration Routes	100
5.4.1.5	Final Sedimentation and Outflow	101
5.4.1.6	Fuzzy Control	102
5.4.2	Results of the Wastewater Treatment Plant Simulation	103
5.4.2.1	Evaluation of the Sankey Diagrams	103
5.4.2.2	Simulated Results	105
5.4.3	Simulation of the Homburg-Bröl Sewerage System	107
5.4.3.1	Input Data Concerning the Sewerage System	108

5.4.3.2	Loading and Potential of the Tanks	112
5.4.3.3	SWMM® Model	113
5.4.3.4	SIMBA® Model	115
5.4.3.5	Calibration Within The SIMBA® Model	119
5.4.3.6	Visual Evaluation of the Sewerage System using the SWMM® Monitor	122
5.4.3.7	Calibration of the Sewerage System Simulation	125
5.4.4	Results of the Sewerage System Simulation	127
5.4.4.1	Step 1: Simulation in the Basic Condition	127
5.4.4.2	Step 2: Matching of the Precipitation Data	128
5.4.4.3	Step 3: Inclusion of the Ground-Water Level	129
5.4.4.4	Step 4: Matching of the Model Parameters	133
5.4.4.5	Further Results within the Sewerage System Simulation	134
5.5	Technical Research – Integrated Control Strategy	136
5.5.1	The Control Concept	138
5.5.2	The Homburg-Bröl Sewerage System and the New Throttle-Water Volumes	139
5.5.2.1	The State Machine	143
5.5.2.2	Fuzzy Controllers	148
5.5.2.3	Structure of the Fuzzy Control Mechanism within the Sewerage System	150
5.5.2.4	Operation of the Fuzzy Controller in States 5 and 7	157
5.5.3	Evaluation and Control Options using the SWMM® Monitor	159
5.5.3.1	Investigations into the Capacity Utilisation of the Sewerage System Using the Controller	159
5.5.4	Safety Concept	163
5.5.5	Results of the Control Strategy within the Simulation	164
5.6	Conclusion of the Technical Research	168
6	SUMMARY OF THE RESULTS OF THE TECHNICAL RESEARCH	169
6.1	Result of Wastewater Measurements	169
6.2	Evaluation of the Measurements in the River-Water	170
6.3	Result of Recording Precipitations	171
6.4	Simulation Result	171
6.5	Control Result	173
6.6	Conclusion of the Results of the Technical Research	174
7	THE SOCIAL SCIENTIFIC RESEARCH	175
7.1	Introduction	175
7.2	The Basis for Social Scientific Research within the Project KANNST	175
7.2.1	Action Research	176
7.2.2	Principles of Communication	177
7.2.3	Group Work	179
7.2.4	Tele co-operation und Telecommunication	180

7.2.5	Promoting Acceptance	184
7.3	Technical Progress – The KANNST Project	185
7.3.1	The Groups and their relations	187
7.3.2	The Differing Intentions of the Groups	188
7.4	Acceptance Research in the Project KANNST	190
7.4.1	Talks, Lectures and Newspaper Articles	191
7.4.2	Field Trips	191
7.4.3	Learning Software	192
7.4.3.1	Presenting the Learning Software	192
7.4.3.2	Comparison of the Results in the Learning Software	196
7.4.4	Newsletter, Reports and other Documentation	198
7.4.5	Questionnaires	199
7.5	Conclusion of the Social Scientific Research	200
8	SUMMARY OF THE RESULTS OF THE SOCIAL SCIENTIFIC RESEARCH	201
8.1	Evaluation of the Acceptance Research	201
8.1.1	Results Step 1: Introduce the Participants to the Subject and arouse their Curiosity	201
8.1.2	Result Step 2: Take them through the System when they are confronted with the Technology for the first time	202
8.1.3	Results Step 3: Let them discover the System for themselves	203
8.1.4	Result Step 4: Give them the Manual/Documentation	205
8.2	Evaluation of the Questionnaires	206
8.2.1	Questionnaire of the Students	206
8.2.2	Results Experts and Public	207
8.2.3	Further Evaluations	207
8.3	Conclusion of the Results of the Social Scientific Research	208
9	OUTLOOK – THE SOCIAL SCIENTIFIC AND TECHNICAL RESEARCH	209
9.1	Looking Ahead: The Social Scientific Research	209
9.2	Looking Ahead: The Technical Research	210
10	SUMMARY	211
11	SAMENVATTING	217
