List of Figures	11
List of Tables	19
List of Symbols	23
1 Introduction	25
1.1 The Literature up to Now	26
1.1.1 Dynamic Models in Environmental Economics	26
1.1.2 The Choice of Instruments	36
1.2 The Reference Model	39
1.3 Different Elasticities of Substitution	39
1.4 Productivity Shocks and Capital Depreciation	41
1.5 A Change of the Preference Structure	42
1.6 Some General Remarks	44
2 The Reference Model	47
2.1 The Basic Elements	47
2.1.1 Environment	47
2.1.2 Households and Preferences	48
2.1.3 Production	50
2.2 Solution of the Model — The Steady State	51
2.3 Specific Functions for Numerical Simulations	52
2.3.1 The CES Utility Function	52
2.3.2 The Cobb-Douglas Utility Function	53
2.3.3 The Leontief Utility Function	54
2.3.4 The Function of the Quality of Nature	55
2.3.5 The Production Function	56
3 The Impact of the Elasticity of Substitution	57
3.1 The Unregulated Economy	57
3.1.1 The Case of a CES Utility Function	57
3.1.2 The Special Case of a Cobb-Douglas Utility Function	59
3.1.3 The Special Case of a Leontief Utility Function	60
3.1.4 The Influence of the Elasticity of Substitution	61
3.2 Implementing Environmental Policy	65
3.2.1 Social Optimum	65
3.2.2 The Tax Regime	66
3.2.3 No or Lump-sum Repayment of Tax Revenues	67
3.2.4 Numerical Simulations: No Repayments	68

3.2.5	Numerical Simulations: Lump-sum Repayments	70
3.2.6	Repayment of Tax Revenues as Subsidy	77
3.2.7	Numerical Simulations: A Subsidy on Investments in Environmental Quality	78
3.3	Appendix: Results of Simulations with a Consumption Tax without Repayment of Tax Revenues	83
4	A Model with Shocks in the Production Sector	89
4.1	Introduction	89
4.2	The Impact of Productivity Shocks	89
4.2.1	Numerical Results for an Unregulated Market Economy . .	89
4.2.2	Numerical Results for a Planned Economy	93
4.2.3	Numerical Results for an Optimal Environmental Policy . .	95
4.3	The Sudden Impact of Capital Depreciation	100
4.4	Double Impact: Productivity Shock and Sudden Capital Depreciation	106
4.5	As Time Goes By: Delayed Adjustment of Environmental Policy .	110
4.5.1	The Case of a Productivity Shock	112
4.5.2	The Case of a Productivity Shock and Capital Depreciation	116
5	Changing Preferences	121
5.1	Introduction	121
5.2	Save the Whales! The Impact of Greening Preferences	121
5.2.1	Numerical Results for an Unregulated Market Economy . .	121
5.2.2	Numerical Results in a Planned Economy	126
5.2.3	Numerical Results with an Optimal Environmental Policy .	128
5.3	Paint It Black: Increasing Preferences for Consumption	132
5.3.1	Numerical Results for an Unregulated Economy	133
5.3.2	Numerical Results in a Planned Economy	137
5.3.3	Numerical Results with an Optimal Environmental Policy .	139
5.4	Big Sleep: A Delay in the Adjustment of Policy Measures	145
5.5	On the Edge: Errors in the Adjustment Process	148
6	Summary	153
6.1	The Influence of the Elasticity of Substitution under Different Tax Regimes	153
6.2	Shocks in the Production Sector	154
6.3	A Change of Preferences	156

7	Appendix	159
7.1	Solution of the Household's Optimization Problem in the Basic Model	159
7.2	Solution of the Household's Optimization Problem with a CES Utility Function	160
7.3	Solution of the Household's Optimization Problem with a Leontief Utility Function	162
7.4	Solution of the Planner's Optimization Problem	164
7.5	Solution of the Planner's Optimization Problem with a Leontief Utility Function	165
7.6	Solution of the Household's Optimization Problem without or with Lump-sum Repayment of Tax Revenues	166
7.7	Solution of the Household's Optimization Problem with Repayment of Tax Revenues as a Subsidy	168
8	References	171
