

# BRIEF CONTENTS

List of boxes	xv		
Preface	xvii		
About the authors	xxi		
Guided tour	xxii		
Acknowledgements	xxv		
1 Introduction	1		
<b>Part I</b>			
<b>THE THEORY OF CONSUMER BEHAVIOUR</b>	<b>11</b>		
2 The basic theory of consumer choice	13		
3 Money income and real income	41		
4 Utility	70		
<b>Part II</b>			
<b>CONSUMER THEORY: FURTHER TOPICS</b>	<b>89</b>		
5 Intertemporal choice	91		
6 Intertemporal choice and capital markets	103		
7 Choice in the face of risk	117		
<b>Part III</b>			
<b>PRODUCTION AND COSTS</b>	<b>137</b>		
8 Production functions	139		
9 Cost functions	165		
10 Production functions, cost functions, and the demand for factors of production	184		
<b>Part IV</b>			
<b>BASIC THEORY OF THE FIRM</b>	<b>203</b>		
11 Perfect competition	205		
		12 Monopoly	232
		13 Product differentiation and monopolistic competition	259
		14 Alternative theories of the firm	279
		<b>Part V</b>	
		<b>OLIGOPOLY AND STRATEGIC INTERACTION</b>	<b>301</b>
		15 Oligopoly: an introduction	303
		16 Oligopoly, and strategic interaction	313
		17 Game theory	340
		<b>Part VI</b>	
		<b>FACTOR MARKETS</b>	<b>363</b>
		18 Factor demand	365
		19 Factor supply	397
		20 Labour markets – trade unions and bargaining	416
		<b>Part VII</b>	
		<b>GENERAL EQUILIBRIUM AND WELFARE</b>	<b>437</b>
		21 The exchange economy	439
		22 General equilibrium with production	454
		23 Welfare economics	468
		<b>Part VIII</b>	
		<b>MISSING MARKETS</b>	<b>487</b>
		24 Taxes, externalities and public goods	489
		25 Economics of information	501
		26 Public choice	523
		Further reading	541
		Index	545

# CONTENTS

List of boxes	xv	Money income and real income	47
Preface	xvii	Constant real income and the compensating variation in money income	48
About the authors	xxi	Two measures of real income	50
Guided tour	xxii	Constant real income and the equivalent variation in money income	53
Acknowledgements	xxv	Income and substitution effects without indifference curves – the idea of revealed preference	56
<b>1 Introduction</b>	<b>1</b>	The 'standard of living' and the 'cost of living'	59
Scarcity and economics	1	Measuring changes in the cost of living	60
The ubiquity of choice	2	* The Slutsky equation	65
The co-ordination of individual choices	3	Concluding comment	67
An outline of the book	8	Summary	67
		Problems	68
<b>Part I</b>		<b>4 Utility</b>	<b>70</b>
<b>THE THEORY OF CONSUMER BEHAVIOUR</b>		Key words and phrases	70
<b>2 The basic theory of consumer choice</b>	<b>13</b>	Introduction	70
Key words and phrases	13	The concept of consumer's surplus	70
Introduction	13	An application of consumer's surplus	74
The subject matter of this chapter	14	Marshallian consumer theory	75
The objects of choice	14	Marshallian analysis in terms of indifference curves	78
The budget constraint	15	The impossibility of comparing utility between persons	80
The consumer's tastes	16	* The algebra of Marshallian analysis	81
More on tastes – ordinal and cardinal utility	19	** Duality – a more general treatment of equivalent variation, compensating variation and consumer's surplus	82
The solution to the choice problem	20	Concluding comment	85
* An algebraic solution to the choice problem	23	Summary	86
The income consumption curve	25	Problems	87
Price consumption curves	28		
The Engel curve	30		
The demand curve	32		
* A formal derivation of demand functions	34		
Concluding comment	36		
Summary	37		
Problems	38		
Notes	40		
<b>3 Money income and real income</b>	<b>41</b>	<b>Part II</b>	
Key words and phrases	41	<b>CONSUMER THEORY: FURTHER TOPICS</b>	
Introduction	41	<b>5 Intertemporal choice</b>	<b>91</b>
The effect of a change in income	41	Key words and phrases	91
The effect of a change in the price of the other good	42	Introduction	91
The income effect and substitution effect	43	The framework of choice without production	91
		Time preference and the solution to the choice problem	94
		Saving and the level of the rate of interest	96

\* An asterisk signifies those sections that make use of calculus and game theory, with a greater degree of difficulty signified by two asterisks.

Saving and changes in the rate of interest	99
Concluding comment	100
<i>Summary</i>	101
<i>Problems</i>	101
<i>Notes</i>	102

**6 Intertemporal choice and capital markets 103**

<i>Key words and phrases</i>	103
Introduction	103
The production opportunity curve and the internal rate of return	103
Access to a perfect capital market	106
The separation of investment and consumption decisions	107
Rules for selecting the optimal investment–production plan	110
Interdependent production opportunities	111
Capital market imperfection	112
Concluding comment	114
<i>Summary</i>	114
<i>Problems</i>	115
<i>Note</i>	116

**7 Choice in the face of risk 117**

<i>Key words and phrases</i>	117
Introduction	117
The idea of expected utility	117
Probability and cardinal utility	118
Diminishing marginal utility and expected utility	119
Insurance and gambling	122
Insurance and gambling: further analysis	124
Further analysis of risk	127
Equilibrium demand for insurance	131
A note on moral hazard and adverse selection	133
Concluding comment	133
<i>Summary</i>	134
<i>Problems</i>	135

**Part III PRODUCTION AND COSTS**

**8 Production functions 139**

<i>Key words and phrases</i>	139
Introduction	139
Ownership, control and the entrepreneur	140
Production	141
Activities and the isoquant	142

The production function	145
Long-run and short-run analysis	146
The long-run production function: some preliminaries	146
Returns to scale	147
Factors leading to variable returns to scale	151
Substitutability	152
The elasticity of substitution	153
The short-run production function and returns to a factor	156
More on diminishing returns	158
The general Cobb-Douglas function	159
Concluding comment	162
<i>Summary</i>	163
<i>Problems</i>	164
<i>Note</i>	164

**9 Cost functions 165**

<i>Key words and phrases</i>	165
Introduction	165
Expenditure on inputs and the cost function	166
Long-run cost minimisation	166
Long-run total cost and the expansion path	170
Average and marginal costs in the long run	172
Long-run costs with varying returns to scale	172
The short run	174
Short-run cost functions	175
Short- and long-run average cost – the ‘envelope’	177
Fixed and variable costs	179
* From production to cost functions in the short run – a formal treatment	180
Concluding comment	181
<i>Summary</i>	181
<i>Problems</i>	182

**10 Production functions, cost functions, and the demand for factors of production 184**

<i>Key words and phrases</i>	184
Introduction	184
From production to cost functions in the long run	185
Fixed proportions technology	188
Perfect substitutability	190
Cobb-Douglas technology	191
Conditional factor demand functions	194
Costs when input prices change	194
The cost function and conditional factor demand functions	195

Some properties of conditional factor demand functions	196	Demand elasticity and price discrimination	250
The effect of changes in input prices on average and marginal costs	199	Perfect price discrimination	252
Concluding comment	201	Multipart tariffs	253
<i>Summary</i>	201	Classifying types of price discrimination	254
<i>Problems</i>	202	Concluding comment	255
		<i>Summary</i>	256
		<i>Problems</i>	257

## Part IV BASIC THEORY OF THE FIRM

<b>11 Perfect competition</b>	<b>205</b>	<b>13 Product differentiation and monopolistic competition</b>	<b>259</b>
<i>Key words and phrases</i>	205	<i>Key words and phrases</i>	259
Introduction	205	Introduction	259
The profit-maximisation hypothesis	206	Goods, attributes and choice	260
The perfectly competitive firm's demand function	206	The basic framework	260
Total, average and marginal revenue	207	A simple application – brand loyalty	263
The firm's short-run supply curve	210	An elaboration – combining brands	264
* A formal treatment	212	Product differentiation and market research	265
Price determination in the short run	214	Advertising	267
The firm and the industry in the long run	215	Differentiated products and monopolistic competition	268
The properties of the competitive industry	218	The firm in monopolistic competition	269
The U-shaped average cost curve and managerial inputs	221	Monopolistic competition and efficiency	270
Inter-firm differences in efficiency	222	* A more formal analysis	272
Variations in factor prices in the short run	224	Mark-up pricing	273
Factor price variations in the long run	226	Criticisms of monopolistic competition	275
Perfect competition and the supply curve	227	Concluding comment	275
* Appendix – returns to scale and profitability in the Cobb-Douglas case	227	<i>Summary</i>	276
<i>Summary</i>	230	<i>Problems</i>	277
<i>Problems</i>	231	<b>14 Alternative theories of the firm</b>	<b>279</b>
<i>Note</i>	231	<i>Key words and phrases</i>	279
<b>12 Monopoly</b>	<b>232</b>	Introduction	279
<i>Key words and phrases</i>	232	Corporate governance	280
Introduction	232	Revenue maximisation in a competitive market	282
The demand curve, total revenue, and marginal revenue	233	The revenue-maximising hypothesis under monopoly	283
* A formal treatment of the relationship between demand and marginal revenue – some examples	237	The effects of lump-sum taxes	284
Profit-maximising price and output	238	The competitive labour-managed firm – an introduction	286
* A formal treatment of monopoly equilibrium	241	Maximising income per worker	286
Natural monopoly	242	Enterprise choices in the short run	288
Producer's surplus and the cost of monopoly	245	* A more formal treatment	289
Price discrimination	247	A comparison of income-per-worker-maximising and profit-maximising firms	290
		The short-run supply curve	291
		The labour-managed firm in the long run	295
		Labour-managed and profit-maximising firms with free entry	297
		Concluding comment	298

<i>Summary</i>	298
<i>Problems</i>	299

**Part V**  
**OLIGOPOLY AND STRATEGIC INTERACTION**

<b>15 Oligopoly – an introduction</b>	<b>303</b>
<i>Key words and phrases</i>	303
Introduction	303
Collusive and non-collusive behaviour	303
The oligopoly problem	304
An illustration of the oligopoly problem:	
the kinked demand curve	305
Collusive behaviour – cartels	307
Cheating and retaliation	310
Concluding comment	311
<i>Summary</i>	311
<i>Problems</i>	311
<i>Notes</i>	312

<b>16 Oligopoly and strategic interaction</b>	<b>313</b>
<i>Key words and phrases</i>	313
Introduction	313
The Cournot model	314
Isoprofit curves and reaction functions	315
* A more formal treatment of the Cournot model	321
More on the non-collusive approach	323
The Bertrand model	324
Price leadership	328
Stackelberg equilibrium	330
* A formal treatment of the Stackelberg model	332
Collusive and non-collusive behaviour compared – the contract curve	333
* Conjectural variations	335
Concluding comment	337
<i>Summary</i>	338
<i>Problems</i>	338

<b>17 Game theory</b>	<b>340</b>
<i>Key words and phrases</i>	340
Introduction	340
Dominant strategies	341
Nash equilibrium	342
The prisoners' dilemma	343
Optimal cartel bargaining	346
Repeated games	348
Credibility and punishment in cartels	349

Tit-for-tat	352
Sequential games	354
Entry deterrence and predatory pricing	355
Credibility and commitment	357
Mixed strategies	357
Concluding comment	360
<i>Summary</i>	361
<i>Problems</i>	362

**Part VI**  
**FACTOR MARKETS**

<b>18 Factor demand</b>	<b>365</b>
<i>Key words and phrases</i>	365
Introduction	365
Physical products and revenue products	365
Factor demand in the short run	368
* The firm's factor demand in the long run	371
Industry demand for labour	372
Influences on the elasticity of factor demand	373
Factor payments, the value of output and the Euler theorem	374
* The firm's factor demand in the long run – a formal analysis	378
Factor demand under monopoly	382
The monopolist's factor demand curves	382
* A formal treatment	386
Monopsony	387
Discriminating monopsony	390
Concluding comment	394
<i>Summary</i>	394
<i>Problems</i>	396

<b>19 Factor supply</b>	<b>397</b>
<i>Key words and phrases</i>	397
Introduction	397
Flows, stocks and their relationship	397
Supply to the firm and the industry	398
Transfer price and rent	399
Quasi-rent	401
The individual's supply of labour	402
The nature of the choice problem	402
Variations in the wage rate	404
Overtime payments	406
The effect of fixing the length of the working week	407
Household production – the simple case	408
Household production and the labour market	409

<b>25 Economics of information</b>	<b>501</b>	The voting paradox	525
<i>Key words and phrases</i>	501	The median voter	527
Introduction	501	The median voter and income redistribution	529
The idea of asymmetric information	502	The influence of the tax rate on mean income and tax revenue	531
The market for lemons	503	The median voter's problem	532
Adverse selection, quality choice and informed consumers	506	Redistribution through the provision of public goods	533
Adverse selection and moral hazard	509	Variations in productivity and the extent of redistribution	534
Solutions to adverse selection – signals	513	The significance and limitations of the median voter theorem	535
Signalling in the labour market	514	Costly information	536
Hidden action and managerial incentives	517	Interest group politics	537
Concluding comment	520	Rent seeking	537
<i>Summary</i>	521	Concluding comment	537
<i>Problems</i>	521	<i>Summary</i>	538
<i>Note</i>	522	<i>Problems</i>	539
<b>26 Public choice</b>	<b>523</b>	<b>Further reading</b>	<b>541</b>
<i>Key words and phrases</i>	523	<b>Index</b>	<b>545</b>
Introduction	523		
Why vote at all?	525		

## Supporting resources

Visit [www.pearsoned.co.uk/estrin](http://www.pearsoned.co.uk/estrin) to find valuable online resources

### Companion Website for students

- Extra practice and self-assessment problems linked to the boxes in the text
- Solutions to selected problems in the text
- An online glossary of key terms
- Flashcards to test your understanding of key terms
- Annotated links to relevant economics sites on the web

### For instructors

- Complete, downloadable Instructor's Manual
- Detailed solutions to end-of-chapter problems in the text
- New to this edition, testbank of customisable questions for formative or summative assessment
- PowerPoints of all figures and captions in the book

Also: The Companion Website provides the following features:

- Search tool to help locate specific items of content
- E-mail results and profile tools to send results of quizzes to instructors
- Online help and support to assist with website usage and troubleshooting

For more information please contact your local Pearson Education sales representative or visit [www.pearsoned.co.uk/estrin](http://www.pearsoned.co.uk/estrin)

# LIST OF BOXES

1.1 The hog cycle or cobweb model	5	12.1 The demand curve and price elasticity	235
2.1 Defining budget constraints	16	12.2 The determinants of marginal revenue	235
2.2 More on indifference curves	18	12.3 Natural monopoly	243
2.3 More on consumer equilibrium	22	12.4 A single price monopolist	248
2.4 More on the income consumption curve	27	12.5 More on price discrimination	251
2.5 More on price consumption curves	29	13.1 Product differentiation: a simple example	262
2.6 Deriving the Engel curve	31	13.2 More on breakfast cereals	266
2.7 More on the demand curve	32	13.3 More on the inefficiency of monopolistic competition	271
3.1 More on income and substitution effects	44	14.1 A formal treatment of revenue maximisation	285
3.2 Perfect substitutes and perfect complements	46	14.2 A more formal treatment of the short-run supply curve under labour management	294
3.3 More on Hicks and Slutsky	52	15.1 Collusion and cheating: an example	308
3.4 Hicksian compensating and equivalent variations	55	16.1 The strategic interaction of Cournot oligopolists	314
3.5 Slutsky compensating and equivalent variations	58	16.2 Deriving Cournot isoprofit curves	317
3.6 Measuring the cost of living	63	16.3 Deriving Cournot reaction functions	320
3.7 More on measuring the cost of living	64	16.4 Deriving Bertrand reaction functions	326
4.1 Calculating consumer's surplus	72	16.5 More on Stackelberg equilibrium	331
4.2 Calculating the Marshallian consumer's surplus	77	17.1 Oligopoly and the prisoners' dilemma	345
5.1 More on saving and borrowing	93	17.2 Most-favoured-customer clauses	351
5.2 More on the windfall effect	97	17.3 Tit-for-tat in the Cournot model of oligopoly	352
5.3 Savings, bond purchases and interest rate changes	100	18.1 Industry factor demand in a competitive market: a simple example	369
6.1 More on present value and the internal rate of return	105	18.2 The so-called 'adding up' problem	377
6.2 Separation of investment and consumption: a worked example	108	18.3 Value of marginal product and marginal revenue product	384
7.1 Utility of wealth functions	121	18.4 Monopsony and competitive firms	389
7.2 Maximum insurance outlay	124	18.5 A discriminating monopsonist	392
8.1 Deriving isoquants	145	20.1 Rent maximisation	421
8.2 Calculating factor productivities	147	21.1 Competitive equilibrium and Walras' law	447
8.3 More on returns to scale	148	22.1 The Robinson Crusoe economy	460
8.4 Constant returns with a Cobb-Douglas function	150	23.1 Competitive equilibrium and Pareto optimality	474
8.5 The elasticity of substitution	154	24.1 Externalities and the theory of the second best	492
9.1 Equilibrium in production with a Cobb-Douglas function	168	24.2 An application of the Coase theorem	495
9.2 The expansion path	171	25.1 Adverse selection and insurance: a simple example	510
11.1 More on marginal revenue	209	25.2 Incentive schemes and risk averse managers	519
11.2 The shut down decision	211	26.1 Arrow's impossibility theorem	526
11.3 Returns to scale and profitability	220
