Preface	VII
Introduction by D. Gunnisson	IX
PART I: THE RESERVOIR IN PERSPECTIVE	
1 Environmental effects of reservoirs <i>by R.M. Baxter</i>	1
2 Characterization of the reservoir ecosystem <i>by R.H. Kennedy, K.W. Thornton and D.E. Ford</i>	27
PART II: TRANSITION FROM TERRESTRIAL TO AQUATIC ECOSYSTEM	
3 Chemistry and microbiology of newly flooded soils: relationship to reservoir-water quality <i>by D. Gunnison, R.M. Engler and W.H. Patrick Jr.</i>	39
4 Vegetative succession and decomposition in reservoirs <i>by G.L. Godshalk and J.W. Barko</i>	59
PART III: THE ESTABLISHED RESERVOIR	
5 Microbiological water quality of reservoirs <i>by G.A. Burton Jr.</i>	79
6 Interactions of reservoir microbiota: eutrophication – related environmental problems <i>by G.R. Lanza and J.K.G. Silvey</i>	99
7 Sediment-water interactions and mineral cycling in reservoirs <i>by J.M. Brannon, R.L. Chen and D. Gunnison</i>	121
8 Pathogenic micro-organisms in thermally altered reservoirs and other waters <i>by R.L. Tyndall</i>	135
9 Modeling geomicrobial processes in reservoirs <i>by D. Gunnison, J.M. Brannon and R.L. Chen</i>	155
10 Microbial ecology and acidic pollution of impoundments <i>by A.L. Mills and A.T. Herlihy</i>	169
Index	191
