

Table of Contents

Invited Talks

Ad Exchanges: Research Issues	1
<i>S. Muthukrishnan</i>	
Adaptive Learning in Systems of Interacting Agents	13
<i>H. Peyton Young</i>	
Quantifying Outcomes in Games (Abstract)	17
<i>Éva Tardos</i>	

Regular Papers

Competitive Routing over Time	18
<i>Martin Hoefer, Vahab S. Mirrokni, Heiko Röglin, and Shang-Hua Teng</i>	
On 2-Player Randomized Mechanisms for Scheduling	30
<i>Pinyan Lu</i>	
On Stackelberg Pricing with Computationally Bounded Consumers	42
<i>Patrick Briest, Martin Hoefer, Luciano Gualà, and Carmine Ventre</i>	
On Best Response Dynamics in Weighted Congestion Games with Polynomial Delays	55
<i>Angelo Fanelli and Luca Moscardelli</i>	
Parametric Packing of Selfish Items and the Subset Sum Algorithm	67
<i>Leah Epstein, Elena Kleiman, and Julián Mestre</i>	
An Online Multi-unit Auction with Improved Competitive Ratio	79
<i>Sourav Chakraborty and Nikhil Devanur</i>	
Prediction Mechanisms That Do Not Incentivize Undesirable Actions ...	89
<i>Peng Shi, Vincent Conitzer, and Mingyu Guo</i>	
Pricing Strategies for Viral Marketing on Social Networks	101
<i>David Arthur, Rajeev Motwani, Aneesh Sharma, and Ying Xu</i>	
Consistent Continuous Trust-Based Recommendation Systems	113
<i>Ola Rozenfeld and Moshe Tennenholtz</i>	

The Stackelberg Minimum Spanning Tree Game on Planar and Bounded-Treewidth Graphs	125
<i>Jean Cardinal, Erik D. Demaine, Samuel Fiorini, Gwenaël Joret, Ilan Newman, and Oren Weimann</i>	
Tighter Bounds for Facility Games	137
<i>Pinyan Lu, Yajun Wang, and Yuan Zhou</i>	
Degrees of Guaranteed Envy-Freeness in Finite Bounded Cake-Cutting Protocols	149
<i>Claudia Lindner and Jörg Rothe</i>	
Approximate Pure Nash Equilibria via Lovász Local Lemma	160
<i>Thành Nguyen and Éva Tardos</i>	
Externalities in Keyword Auctions: An Empirical and Theoretical Assessment	172
<i>Renato Gomes, Nicole Immorlica, and Evangelos Markakis</i>	
Covering Games: Approximation through Non-cooperation	184
<i>Martin Gairing</i>	
Contract Auctions for Sponsored Search	196
<i>Sharad Goel, Sébastien Lahaie, and Sergei Vassilvitskii</i>	
Bidding for Representative Allocations for Display Advertising	208
<i>Arpita Ghosh, Preston McAfee, Kishore Papineni, and Sergei Vassilvitskii</i>	
Social Networks and Stable Matchings in the Job Market	220
<i>Esteban Arcaute and Sergei Vassilvitskii</i>	
Maximizing the Minimum Load: The Cost of Selfishness	232
<i>Leah Epstein, Elena Kleiman, and Rob van Stee</i>	
Competitive Repeated Allocation without Payments	244
<i>Mingyu Guo, Vincent Conitzer, and Daniel M. Reeves</i>	
Pseudonyms in Cost-Sharing Games	256
<i>Paolo Penna, Florian Schoppmann, Riccardo Silvestri, and Peter Widmayer</i>	
Computing Optimal Contracts in Series-Parallel Heterogeneous Combinatorial Agencies	268
<i>Yuval Emek and Michal Feldman</i>	
Nash Equilibria for Voronoi Games on Transitive Graphs	280
<i>Rainer Feldmann, Marios Mavronicolas, and Burkhard Monien</i>	

Selfish Scheduling with Setup Times	292
<i>Laurent Gourvès, Jérôme Monnot, and Orestis A. Telelis</i>	
Computational Aspects of Multimarket Price Wars	304
<i>Nithum Thain and Adrian Vetta</i>	
The Impact of Social Ignorance on Weighted Congestion Games	316
<i>Dimitris Fotakis, Vasilis Gkatzelis, Alexis C. Kaporis, and Paul G. Spirakis</i>	
The Complexity of Models of International Trade	328
<i>Christopher A. Wilkens</i>	
The Geometry of Truthfulness	340
<i>Angelina Vidali</i>	
Optimal Incentives for Participation with Type-Dependent Externalities	351
<i>Michal Feldman, Ran Tessler, and Yoav Wilf</i>	
Nash Dynamics in Congestion Games with Similar Resources	362
<i>Anand Bhalgat, Tanmoy Chakraborty, and Sanjeev Khanna</i>	
Online Ad Assignment with Free Disposal	374
<i>Jon Feldman, Nitish Korula, Vahab Mirrokni, S. Muthukrishnan, and Martin Pál</i>	
Truthful and Quality Conscious Query Incentive Networks	386
<i>Devansh Dikshit and Narahari Yadati</i>	
An Analysis of Troubled Assets Reverse Auction	398
<i>Saeed Alaei and Azarakhsh Malekian</i>	
Direction Preserving Zero Point Computing and Applications: (Extended Abstract)	410
<i>Xiaotie Deng, Qi Qi, and Jie Zhang</i>	

Short Papers

Continuity Properties of Equilibria in Some Fisher and Arrow-Debreu Market Models	422
<i>Vijay V. Vazirani and Lei Wang</i>	
Route Distribution Incentives	430
<i>Joud Khoury, Chaouki T. Abdallah, Kate Krause, and Jorge Crichigno</i>	
Wiretapping a Hidden Network	438
<i>Haris Aziz, Oded Lachish, Mike Paterson, and Rahul Savani</i>	

Refining the Cost of Cheap Labor in Set System Auctions	447
<i>Ning Chen, Edith Elkind, and Nick Gravin</i>	
On the Power of Mediators	455
<i>Josep Díaz, Dieter Mitsche, Navin Rustagi, and Jared Saia</i>	
Strong Nash Equilibria in Games with the Lexicographical Improvement Property	463
<i>Tobias Harks, Max Klimm, and Rolf H. Möhring</i>	
A Note on Strictly Competitive Games	471
<i>Ilan Adler, Constantinos Daskalakis, and Christos H. Papadimitriou</i>	
The Efficiency of Fair Division	475
<i>Ioannis Caragiannis, Christos Karamanolis, Panagiotis Kanellopoulos, and Maria Kyropoulou</i>	
Sequential Bidding in the Bailey-Cavallo Mechanism	483
<i>Krzysztof R. Apt and Evangelos Markakis</i>	
Subsidized Prediction Markets for Risk Averse Traders	491
<i>Stanko Dimitrov, Rahul Sami, and Marina Epelman</i>	
Envy, Multi Envy, and Revenue Maximization	498
<i>Amos Fiat and Amiram Wingarten</i>	
Nudging Mechanisms for Technology Adoption	505
<i>Jacomo Corbo and Yevgeniy Vorobeychik</i>	
Mechanism Design for Complexity-Constrained Bidders	513
<i>Ravi Kumar, Mohammad Mahdian, and Amin Sayedi</i>	
Priority Right Auction for Komi Setting (Extended Abstract)	521
<i>Xiaotie Deng and Qi Qi</i>	
Randomized Online Algorithms for the Buyback Problem	529
<i>B. V. Ashwinkumar and Robert Kleinberg</i>	
Envy-Free Allocations for Budgeted Bidders	537
<i>David Kempe, Ahuva Mu'alem, and Mahyar Salek</i>	
On the Inefficiency Ratio of Stable Equilibria in Congestion Games	545
<i>Arash Asadpour and Amin Saberi</i>	
Betting on the Real Line	553
<i>Xi Gao, Yiling Chen, and David M. Pennock</i>	
Characterization of Strategy-Proof, Revenue Monotone Combinatorial Auction Mechanisms and Connection with False-Name-Proofness	561
<i>Taiki Todo, Atsushi Iwasaki, and Makoto Yokoo</i>	

2D-TUCKER Is PPAD-Complete	569
<i>Dömötör Pálvölgyi</i>	
Bidder Optimal Assignments for General Utilities	575
<i>Paul Dütting, Monika Henzinger, and Ingmar Weber</i>	
A New Ranking Scheme of the GSP Mechanism with Markovian Users	583
<i>Xiaotie Deng and Jiajin Yu</i>	
Mediated Equilibria in Load-Balancing Games	591
<i>Joshua R. Davis, David Liben-Nowell, Alexa Sharp, and Tom Wexler</i>	
On the Impact of Strategy and Utility Structures on Congestion-Averse Games	600
<i>Thomas Voice, Maria Polukarov, Andrew Bye, and Nicholas R. Jennings</i>	
On Strong Equilibria in the Max Cut Game	608
<i>Laurent Gourvès and Jérôme Monnot</i>	
Stability and Convergence in Selfish Scheduling with Altruistic Agents	616
<i>Martin Hoefer and Alexander Skopalik</i>	
Gaming Dynamic Parimutuel Markets	623
<i>Qianya Lin and Yiling Chen</i>	
News Posting by Strategic Users in a Social Network	632
<i>Mangesh Gupte, MohammadTaghi Hajiaghayi, Lu Han, Liviu Iftode, Pravin Shankar, and Raluca M. Ursu</i>	
Author Index	641
