Volume 1

Water Resources Management in the Federal Republic of Germany K.-R. Nippes	1
--	---

S e s s i o n 1

REGIONAL WATER BALANCES

General Report I. Simmers	17
Regional Hydrology of Semi-Arid Regions: An Evaluation G. W. Annandale	25
Simplified Equation for Evapotranspiration in Arid Regions N. S. Kharrufa	39
The Development of the Hydrodynamic System in Connection with the Formation of the Jordan Graben and its Effects on the Generation of Oil E. Salameh	49
Direct Runoff Retention in Catchments F.-K. Holle and K. Ludwig	67
Man-made Water Balance in the Ruhr Catchment Area F. W. Renz	79
On the Estimation of Lake Evaporation Losses for the Operation of the Ruhr Reservoir System G. Morgenschweis	93
Hydrological Investigations in Arctic and Antarctic Drainage Basins Underlain by Continuous Permafrost W.-A. Flügel	111
Water Balance of the Eastern Segment of the Arabian Peninsula R. L. de Jong	127

The Eastern Side of the Oriental Carpathians - Quantitative Evaluation of the Precipitation and of the Runoff V. Apopei	137
--	-----

S e s s i o n 2

RUNOFF CHARACTERISTICS OF RIVERS

General Report D. E. Walling	149
Hydrological Characteristics of Runoff Regimen in SE Nigeria. The Imo River Basin W. E. Grabs	153
Base Flow within the Upper Vistula Basin I. Dynowska	173
Hydrological Problems of the Rio Piray / Bolivia H.-B. Kleeberg and H. Overland	183
Changes of Low Water Conditions in the River Rhine Basin E. Wildenhahn	197

S e s s i o n 3

DYNAMICS OF RUNOFF AND LOAD

General Report D. E. Walling	215
Sediment Rating Curves of the Ljusnan at Funäsdalen M. B. Jansson	219
Dissolved Loads of Alpine Creeks and Rivers K.-H. Prosl	235
Suspended Heavy Metals in the River Nidda Catchment - Rhine-Main Area W. L. F. Brinkmann	245

Assesment of Relationships between Runoff and Load in the Mahaweli Ganga in Sri Lanka P. Puvaneswaran	261
Regional Variation of Temperature in Devon Streams and Rivers B. W. Webb and D. E. Walling	277
Countrywide Patterns of Background Water Quality in the UK and their Controls D. E. Walling and B. W. Webb	299
The Regional Variations of Controlling Factors of Water Quality in Small Rivers W. Symader	317

S e s s i o n 4

PARAMETRISATION AND TRANSFER OF HYDROLOGICAL DATA

General Report G. Kovacz	331
An Outline and Preliminary Application of a Systematic Problem Oriented Methodology for Hydrological Data Regionalisation I. Simmers	339
Data Base Establishment for Water Resources Masterplan Studies S. Robinson	357
Regional Potential Evaporation Mapping in Areas of Sparse Climatic Data R. E. Schulze	373
Extension of Runoff Series and Interpolation Using Empirical Orthogonal Functions T. Jutman	387
A Comparison of Data Pooling Techniques for Regional Flood Estimation S. E. Wiltshire and M- A. Beran	399
How does One Estimate Flood Peaks in Small Catchments in Switzerland without Discharge Measurements ? F. R. Naef	415

Optimizing the Choice of Parameters for Predicting Mean Annual Flood S. T. Wong	429
Preparing Reservoir Inflow Series from Inadequate Data by Information Transfer A. D. Mohile and L. N. Gupta	443
Factors Affecting the Estimated Total Runoff for Surface Water Catchments in the East Bank of Jordan Y. Farhan	457
Prediction of Design Flood with Regional Parametric Approach in Upper Narmada and Tapi Region S. M. Huq	471

Volume 2

S e s s i o n 5

HYDROLOGY OF SMALL BASINS

General Report A. Herrmann	481
Hydrological Characteristics of IHP Representative Basins in Korea S. Lee	487
Methodological Research in Small Basins S. Blidaru, P. Stanciu and E. Drăgoi	509
Small Basins as a Tool to Study Human Impacts P. Seuna	527
The Influence of Regulation on the Regional Hydrography of Lake Oulujärvi P. Åman	545
Testing and Comparison of a Linear and Nonlinear Model for Flood Control Studies on a Small Watershed J. F. Jaton, P. Wisner and H. Fraser	557

S e s s i o n 6

SCALE PROBLEMS IN SPACE AND TIME

General Report U. Streit	573
Methodological Aspects of Mapping Regional Hydrological Systems G. B. Engelen	577
Space Scale of Water Balance Elements, Taking Poland as an Example M. Gutry-Korycka	587
Determination of Interannual Drought Characteristics of Swiss Watersheds Using Simple Climatologic Data M. Walter	601
Spatial Disaggregation of Hydrologic Data Using an Adjusting Approach U. Streit	615
Evaluation of Runoff Volume for a Large Area S. L. Liang	635

S e s s i o n 7

SPECIAL ASPECTS OF REGIONAL WATER MANAGEMENT SYSTEMS

General Report H. E. Müller	647
Evaporation from Fresh and Salt Water Lakes- Studies for Two Hydro-Solar Energy Projects H. Wittenberg	651
Feasibility Study of Inland Water for Snow Removal and Snow Melting in Built-Up Areas of Snowy Cities in Japan M. Higashiura	667
The Delaware River Basin Commission: An Innovative Approach to Water Management within a Federal System K. W. Muckleston	685

S e s s i o n 8
MEASURING PROBLEMS

General Report A. Herrmann	701
Requirements of Hydrological Networks by Example of the Rhine River W. Teuber	705
Regional and Seasonal Variability of Systematic Error of Precipitation Measurement in Switzerland B. Sevruck	725

S e s s i o n 9
REGIONAL SOIL-AND GROUNDWATER BALANCES

General Report J. Balek	743
Towards Representing Soil Moisture Conditions of Catchments J. A. van den Berg and T. Louters	749
Water Infiltration under Rain and Poned Conditions N. Al-Masri and T. Sharif	775
Three Dimensional Groundwater Flow System Revealed by Groundwater Temperature I. Kayane, M. Taniguchi and K. Sanjo	791
The Equivalent Radius of a Source (Sink) in the Network of Finite Element Analysis of Groundwater Flow P. K. Mahanti	803
Regional Differentiation of Dynamic and Hydrochemical Conditions of Groundwater of the Southern and Eastern Baltic Sea Coast Cz. Pietrucien	809
Spatial Temporal Variation and the Human Dimension of the Groundwater of Jaffna Peninsula K. M. Puvaneswaran	827
