

INTRODUCTION

Themes of Developmental Psychology 1

The Reliability of Memory 2

**Building a Science of
Developmental Psychology** 6

A Scientific Approach /
Observations, Hypotheses,
and Operational Definitions /
Conducting a Study /
Conceptualizing the Design
and Analyzing the Data /
Other Sources of Insight

**The Approach of This
Book** 14

Stages of Life, Domains of
Development / Facts and
Issues / Themes, Tensions,
and Organizing Principles /
Interludes

A First Signpost 19

PART I

INFANCY

23

Bonds of Attachment 25

Harry Harlow's Studies of Attachment in Monkeys 26
Monkeys with Surrogate Mothers / Isolated Monkeys

John Bowlby's Studies of Human Attachment 31
Origin of the Studies / Insights from Ethology / The Course of Attachment and Separation / The Meaning and Fate of Attachment: Bowlby's Conclusions

Further Research on Attachment 38
Studies Supporting Bowlby / Mary Ainsworth's Work with Infants in Uganda / Experimental Studies of Attachment and Separation / Multiple Caretakers, Fathers, and Peers: Revisions of Bowlby's Position

Early Attachment, Later Growth 50
The Crisis of Basic Trust / The Quality of Mother-Child Interaction: A Controversy

Signposts 55

2

Gaining Knowledge about the World 57

Competing Views of Cognition 58

What Should be Studied? / What Are the Ultimate Sources of Knowledge? / The Interaction View of Knowledge

Jean Piaget: A Guide to Cognition 61

Piaget's Method of Investigation / Three Aspects of Children's Behavior / The Sensorimotor Substages / The Child's Progress

Constructing a World of Objects in Space 72

The Early Substages / The Later Substages / Substage 6: The Object Concept Achieved / Extending and Revising Piaget

The Environmental-Learning View of Cognition 80

Classical Conditioning / Operant or Instrumental Conditioning / Classical and Instrumental Conditioning Applied to Infants

Complementary Perspectives 88

Signposts 90

3

From the Fetus to the Discovery of the Self 92

Our Biological Heritage 94

From Conception to Birth /
The Genetic Heritage / The
Newborn

The Contribution of Early Experience 106

The Effects of Stimulation on
Rats / The Early Experience
of Humans / Some General
Principles

The Three Developing Systems 113

Perceiving / Making / Feel-
ing / Interactions among the
Systems

Three Complex Behaviors 125

The Smile / The Fear
Response / Responses to Val-
ued Persons

The Beginnings of the Sense of Self 129

Signposts 132

INTERLUDE

The Origins of Child Study 135

Two Basic Views of Childhood 135

Jean-Jacques Rousseau's Contribution / John Locke's Different View / Philosophical Bequests to Current Developmental Psychology

Childhood in History 140

The Middle Ages / The Beginning of the Modern Era / Trends in Education / Trends in Children's Literature / Improving Treatment of Children / The Rise of Science

The Founding of Developmental Psychology 147

Baby Biographies / G. Stanley Hall's Contribution / The Emergence of Environmental-Learning Theory / A Productive Eclecticism

PART III

THE PRESCHOOL YEARS

155

4

Language Development 157

The Elements of Language 157

Sound, Order, Meaning / Linguists, Psychologists, Psycholinguists

The Earliest Stages of Language Use 162

Hearing and Producing the Sounds of Language / The Holophrase / The Duo

More Complex Linguistic Capacities 169

The Modulation of Meaning / The Mastery of More Complex Constructions / The Flowering of Linguistic Capacities / Conclusion

Probing the Child's Understanding 176

Methods / The Relation between Production and Understanding

Language and the World Beyond 180

Understanding "More" and "Less" / The Markedness Hypothesis / Language and Thought

Why Does Language Develop? 186

Imitation: The Traditional View / The Argument from Biology / The Centrality of Rules / Alternative Possibilities

Signposts 192

5

Acquiring Sex-Role and Social Behaviors 194

Sex and Gender 195

The Classical Theory of Identification 197

Sigmund Freud's Psychosexual View / Critique of Freud's Theory

Some Approaches to Imitation 203

The Traditional Environmental-Learning View / Albert Bandura's Social-Learning Stance / Altering Moral Judgments / A Cognitive-Structural Approach

A Contemporary Approach to Prosocial Behavior 209

Lawrence Kohlberg's Cognitive View / Kohlberg's Comments on Other Theories / The Kohlberg Perspective Analyzed

Clues toward a Possible Synthesis 213

Martin Hoffman's Description of Altruism / Justin Aronfreed's Studies of Self-Criticism / Evaluating Aronfreed's Contribution

Transsexualism Revisited 219

Factors Relevant to Sex-Role Identification / Behaviors and Thoughts

Signposts 225

The Playing Child 228

Defining Play 230

**Scientists Explain “Big Bear”:
Some Theories of Play** 233

Transitional Objects /
Donald Winnicott’s Views of
Transitional Objects / Play as
Coping / Play as a Partner in
Skill Building / Lev Vygotsky
on the Role of Play in
Development

**Empirical Efforts to Illuminate
Play** 240

The Range of Studies /
Corinne Hutt on Exploration
and Play

**Piecing Together the Puzzle
of Play** 242

The Many Uses of Play /
Piaget’s View of Play

Signposts 246

INTERLUDE

The Model of Development in Psychology 248

Heinz Werner's Organismic-Developmental Approach 249

The Orthogenetic Principle / End-States and Stages / Interactionism and Equilibrium / What Development Is—and Is Not

The Controversies over a Developmental Approach 255

Too Vague or Too Ambitious / Developmental Stages and End-States

The Contributions of the Developmental View 260

PART III

THE YEARS FROM FIVE TO SEVEN

263

7

Communication with Others and with Oneself 265

Clues in the Nervous System 268

Cortical Development /
Dominance of the Left
Hemisphere / The
Dangers and Dividends
of "Neurologizing"

The Molar View: Egocentrism and the Emergence of Communication Skills 272

Jean Piaget's Studies and
Some Recent Contributions /
Egocentrism Reexamined

The Molecular View: Mediation and the Solution of Problems 277

The Transposition Problem /
The Reversal Shift / Open-
ing Pandora's Box

Attempts at Synthesis 284

The Russian School of Psy-
chology / Fish and Bulbs:
How Language Comes to
Control Behavior / Combin-
ing the Molar and the Molec-
ular Approaches

Signposts 290

8

Influences of the Family, the Community, and the Society 293

Heredity versus Environment 294

The Controversy / Twin Studies / Studies of Socialization

The Family Unit 297

An Evolutionary Perspective / Styles of Childrearing / The Family as a System / Birth Order and Siblings / The Kennedys Revisited

The Community 306

The Peer Group / Social-Class Influences

Aggression in Childhood 315

Defining and Explaining Aggression / Parental Influences: The Sears Study / Developmental Trends in Aggressive Behavior

Influences of the Communications Media 320

Albert Bandura's Powerful Demonstration / Does Television Encourage Aggressive Behavior?

Signposts 326

The Symbols of the Young Artist 328

Mastering Symbol Use and Becoming an Artist 329

The Three Developing Systems on the Symbolic Level 332

Making / Perceiving / Feeling / Interactions among the Systems

The Effects of Specific Media 342

Representation in Diverse Media / Producing Diagonal Lines / Learning the Tricks of the Trade / Evaluating the Media Position

Symbols, Media, and Senses 347

The Effects of the Senses / Eidetic Imagery, Transformations, and the Puzzle of Synesthesia

The Creative World of the Child 350

The Origin of Artistic Inclinations / Creating the World: Creating the Self

Signposts 353

INTERLUDE

Another Perspective on Human Development 355

The Controversy over Infantile Autism 356

Leo Kanner's Original
Description / Bernard Rim-
land's Biological Argument /
Bruno Bettelheim's Psycho-
logical Argument / Treatment
for Autism

Conclusion: Other Lenses on Development 365

PART IV

MIDDLE CHILDHOOD

369

The Intellectual Revolution of Middle Childhood 371

Piaget's Concrete Operations 373

Evaluating Conservation of Quantity 376

Can Conservation Be
Trained? / Is Conservation
Ever Fully Learned?

Conservation of Number and Other Concrete Operations 381

Piaget's Original Study / Do
Preschool Children Under-
stand Number? / Whence
Number? Estimators and
Operators / Other Opera-
tions

An Evaluation of Concrete Operations 388

Is Conservation Spontaneous
or Trained? / The Relations
among Concrete Opera-
tions / Operations and Other
Views of Cognition

Signposts 399

Skills and Schooling 401

Introducing the Kpelle 403

**The Contribution of
Language** 404

Later Milestones in Language
Development / Sensitivity to
Metaphor and Logic / Some
Educational Implications

**The Capacity to
Remember** 408

Twelve Words to Recall / Age
Changes in Children's
Memory / Exceptions to In-
creasing Memory / The
Memory That Is Uncalled
For / Alternative Ways to
Conceptualize Memory

Classification 413

Sorting Objects and Pic-
tures / Sorting Words / Lev
Vygotsky's View / Figurative
and Operative Approaches /
The Balance between Figura-
tive and Operative Capacities

The Effects of Schooling 419

The Kpelle Revisited /
Schooling and Operative
Tasks / Schooling and
Culture / Schools under
Fire / A Developmental Look
at Schooling

Signposts 428

Individuality 431**Affect in the Latency****Period** 433

Clinical Studies / Case
Studies and Anecdotes

The Motive to Achieve 438

Measuring the Motive / Who
Needs to Achieve? /

Achievement and Failure

Creativity 441

Can Creativity be Meas-
ured? / Michael Wallach and
Nathan Kogan Focus on
Fluency

Cognitive Styles 446

Cognitive Control / Con-
ceptual Tempo / Field
Dependence and

Independence / Conclusion

Signposts 454

INTERLUDE

Theories and Facts in Developmental Psychology 456

A Dialogue among Six Developmental Psychologists 458

A Cognitive-Structuralist
Influenced by Piaget / A
Personality Psychologist
Influenced by Freud and
Erikson / A Behaviorist in the
Operant and Social-Learning
Traditions / An Environmen-
tal-Learning Theorist in the
Mediation and Russian
Schools / An Organismic-
Developmentalist / An An-
thropologist with Psychologi-
cal Training / Afterthoughts
**Joachim Wohlwill's Program
for Integrated Research** 465

Facts, Methods, and Theories 467

Are Facts and Methods Neu-
tral? / Does Psychology Have
Legitimate Theories? /
Closing Thoughts on Possible
Models

PART V

ADOLESCENCE

473

Thought during Adolescence 475

Piaget's Formal Operations 478

Colorless Liquids / Billiard
Balls / The Status of Formal
Operations

Thinking about Morality: Lawrence Kohlberg's

Approach 484

Should Heinz Have Stolen
the Drug? / Claims and
Evidence / Criticism of the
Kohlberg Claims—and Some
Responses

A Look at the Lighter

Side 493

The Development of a Sense
of Humor / The Capacity to
Appreciate Irony

Conclusion: Beyond Formal Operations 499

Signposts 501

The Confirmation of Individual Identity 503

**Physical Changes in
Adolescence** 503

**Two Views of Adoles-
cence** 506

The Classical View / The
Classical View Challenged:
Margaret Mead in Samoa

**Varieties of Adolescence and
Rites of Initiation** 509

Rites and Sex-Role Identity /
Rites in Our Culture

**Variations within American
Society** 514

Onset of Puberty / Ethnic
Background / Values and Be-
havioral Patterns

**Clinicians' Views of
Adolescence** 525

Harry Stack Sullivan's Stages
of Childhood / Erik Erikson's
Concept of Identity /
Creating a Metaphor of the
Self

Signposts 533

EPILOGUE

The Self across the Life Span 535

Cognition in Adulthood 535

The Quality of Adulthood 537

The Course of the Self 539

The Early Stages /
At Maturity

A Final Signpost 547

APPENDIX

Studying Children: Projects and Exercises 549

Chapter 1: Attachment /
Chapter 2: Infants' Ways of
Knowing / Chapter 3: Infants'
Reflexes / Chapter 4: Com-
plex Language Construc-
tions / Chapter 5: Prosocial
Behaviors / Chapter 6: Prob-
lem Solving through Play /
Chapter 7: The Cognitive As-
pects of Games / Chapter 8:
The Effects of Birth Order /
Chapter 9: Children's Art /
Chapter 10: Conservation of
Quantity / Chapter 11: Clas-
sification / Chapter 12: Con-
ceptual Tempo / Chapter 13:
A Sense of Humor / Chap-
ter 14: Dual Ambivalence
