

<b>1</b>	<b>The technical and economic status of wind energy</b>	<b>1</b>
	D. Lindley and D. T. Swift-Hook	
1.1	Introduction	1
1.2	Practical experience with a modern wind farm	2
1.3	Economics in Europe	2
1.4	Operation, maintenance and plant life	3
1.5	Rates of return	3
1.6	Cost calculations	4
1.7	Conclusions	5
1.8	References	5
<b>2</b>	<b>The impact of environmental aspects on wind energy in The Netherlands</b>	<b>6</b>
	J. C. Berkhuizen and A. F. L. Slob	
2.1	Introduction	6
2.2	Damage to birds	8
2.3	Safety	9
2.4	Noise	10
2.5	Public acceptance	11
2.6	Conclusions	12
2.7	References	13
<b>3</b>	<b>Legal aspects of wind energy exploitation: an EEC perspective</b>	<b>14</b>
	N. O'Neill	
3.1	Introduction	14
3.2	Planning legislation/construction permits	15
3.3	Technical standards	18
3.4	Product liability	20
3.5	State aids	21
3.6	Electricity generation	21
3.7	International trade	22
3.8	Conclusions	22
<b>4</b>	<b>Local authority rating of the WEG Ltd. wind turbine generator in Devon</b>	<b>23</b>
	R. Lord	
4.1	Introduction	23
4.2	Early days	23
4.3	Assessment of the rates	24
4.4	Generating authority rates	24
4.5	The local appeal	24

4.6	Further appeals	25
4.7	Alternative courses of action	26
4.8	Other rating aspects	26
4.9	The future	26
4.10	Conclusions	27
4.11	Appendix	28
<b>5</b>	<b>International energy agency: Recommended practices 4. Measurement of noise emission from wind turbines</b>	<b>31</b>
	S. Ljunggren and A. Gustafsson	
5.1	Foreword	31
5.2	Scope and field of application	32
5.3	Introduction	32
	5.3.1 Definitions	33
	5.3.2 Instrumentation	35
	5.3.3 Measurements	38
	5.3.4 Derived results	42
	5.3.5 Additional information to be recorded	43
	5.3.6 Information to be reported	45
	5.3.7 Acknowledgements	46
	5.3.8 References	47
	Appendices	
A1.	Periodic unsteady blade loads	50
A2.	Microphone mounting	51
A3.	Prediction of noise levels	55
A4.	Measurement of background sound	57
A5.	Variable rotational speed	58
<b>6</b>	<b>Propagation of noise from wind turbine generators</b>	<b>59</b>
	J. N. Pinder, M. A. Price and M. G. Smith	
6.1	Introduction	59
6.2	Analytical modelling of noise propagation from wind turbines	60
6.3	Predicted behaviour upwind	62
6.4	Predicted behaviour downwind	62
6.5	Measured sound propagation from WTGs	63
<b>7</b>	<b>A Swedish solution to the noise problem: wind turbines with variable RPM</b>	<b>67</b>
	S. Ljunggren and S. Engström	
7.1	Introduction	67
7.2	Spectrum shape	69
7.3	Noise level as a function of rotor speed	69
7.4	Amplitude modulation	70
7.5	Studies in background sound	72
7.6	References	72
<b>8</b>	<b>Noise emission from a 25 metre vertical axis wind turbine—its measurement and assessment</b>	<b>73</b>
	B. L. Elliot	
8.1	Introduction	73
8.2	Measurement methodology	73
8.3	VAWT noise levels at reference position	75
8.4	Frequency characterisation	76
8.5	Measurements beyond 50 metre reference distance	78

8.6	Effect of wind on measurement	79
8.7	References	80
<b>9</b>	<b>Environmental acceptability of the advanced wind energy converter</b>	<b>81</b>
	M. S. Vasudevan, A. Mewburn-Crook, P. R. Bullen and V. Kuhn	
9.1	Introduction	81
9.2	The advanced wind energy converter (AWEC)	81
9.3	Instrumentation and data analysis	82
9.4	Field measurements	83
<b>10</b>	<b>Electromagnetic interference—the requirements of a method of machine testing and approval</b>	<b>90</b>
	R. J. Chignell	
10.1	Introduction	90
10.2	The origin of the interface	91
10.3	Machine manufacturers requirements	92
10.4	The way forward	92
10.5	The requirements of a measurement system	93
10.6	Conclusion	93
10.7	References	94
<b>11</b>	<b>Large wind turbines; a source of interference for TV broadcast reception</b>	<b>95</b>
	P. J. van Kats and J. van Rees	
11.1	Introduction	95
11.2	Interference mechanism	96
11.3	Basic equations for the planning model	97
11.4	TV picture quality	98
11.5	Measurement results of the (bistatic) radar cross section	99
11.6	Application of the measurement result	101
11.7	Conclusions	103
	Appendix	104
<b>12</b>	<b>Recent developments in the Dutch safety regulations for WECs</b>	<b>105</b>
	L. A. H. Machiels and H. H. Ottens	
12.1	Introduction	105
12.2	Description of the safety regulations NEN 6096	105
12.3	The chapter on structural safety	106
12.4	Safety system	106
12.5	Design load cases	106
12.6	Load specification	108
12.7	Structural integrity check	109
12.8	Further developments	111
12.9	Conclusions	111
12.10	References	111
<b>13</b>	<b>An analysis of blade throw from wind turbines</b>	<b>112</b>
	D. M. Turner	
13.1	Introduction	113
13.2	Review of previous work	113
13.3	Three dimensional aerodynamic calculation	117
13.4	Conclusions	125
13.5	Acknowledgement	126
13.6	References	126

Appendices	
A1. Rigid body dynamics	127
<b>14 Wind energy development in Greece</b>	<b>136</b>
J. L. Tsipouridis	
14.1 Introduction	136
14.2 The institutional framework	136
14.3 The environment—Greek islands	137
14.4 PPC's wind energy programme	138
<b>15 An aerogenerator in a residential environment—the experiences of residents and motorists in the energy park, Milton Keynes</b>	<b>142</b>
L. Cousins and C. Ledward	
15.1 Background	142
15.2 Objectives of the research	143
15.3 Research methods	143
15.4 Main findings	143
15.5 Conclusions	145
<b>16 Local attitudes to three existing wind turbine sites in the UK</b>	<b>148</b>
M. J. Varley, T. D. Davies, C. G. Bentham and J. P. Palutikof	
16.1 Introduction	148
16.2 Measurement of attitudes	149
16.3 The sites and turbines	153
16.4 Results and discussion	154
16.5 Conclusions	157
<b>17 Off-shore wind power</b>	<b>160</b>
D. T. Swift-Hook	
17.1 Introduction	160
17.2 Cost calculations	161
17.3 Environmental problems and legal constraints	161
17.4 Worldwide off-shore wind power studies	162
17.5 Off-shore wind power cost projections	164
17.6 Off-shore wind turbine installations	165
17.7 Very large machines	165
17.8 References	166
