

Contents

0	Preliminaries	1
0.1	Notation	1
0.2	Useful Theorems	4
1	Laplace's Equation	7
1.1	Introduction	7
1.2	Green's Theorem	8
1.3	Fundamental Harmonic Function	9
1.4	The Mean Value Property	10
1.5	Poisson Integral Formula	14
1.6	Gauss' Averaging Principle	21
1.7	The Dirichlet Problem for a Ball	24
1.8	Kelvin Transformation	32
1.9	Poisson Integral for Half-space	33
1.10	Neumann Problem for a Disk	39
1.11	Neumann Problem for the Ball	42
1.12	Spherical Harmonics	49
2	The Dirichlet Problem	53
2.1	Introduction	53
2.2	Sequences of Harmonic Functions	54
2.3	Superharmonic Functions	59
2.4	Properties of Superharmonic Functions	65
2.5	Approximation of Superharmonic Functions	71
2.6	Perron-Wiener Method	75
2.7	The Radial Limit Theorem	88
2.8	Nontangential Boundary Limit Theorem	92
2.9	Harmonic Measure	100

3	Green Functions	107
3.1	Introduction	107
3.2	Green Functions	107
3.3	Symmetry of the Green Function	115
3.4	Green Potentials	122
3.5	Riesz Decomposition	135
3.6	Properties of Potentials	144
4	Negligible Sets	149
4.1	Introduction	149
4.2	Superharmonic Extensions	149
4.3	Reduction of Superharmonic Functions	158
4.4	Capacity	163
4.5	Boundary Behavior of the Green Function	178
4.6	Applications	182
4.7	Sweeping	189
5	Dirichlet Problem for Unbounded Regions	197
5.1	Introduction	197
5.2	Exterior Dirichlet Problem	197
5.3	PWB Method for Unbounded Regions	204
5.4	Boundary Behavior	210
5.5	Intrinsic Topology	223
5.6	Thin Sets	224
5.7	Thinness and Regularity	228
6	Energy	241
6.1	Introduction	241
6.2	Energy Principle	241
6.3	Mutual Energy	249
6.4	Projections of Measures	257
6.5	Wiener's Test	260
7	Interpolation and Monotonicity	267
7.1	Introduction	267
7.2	Hölder Spaces	268
7.3	Global Interpolation	273
7.4	Interpolation of Weighted Norms	280
7.5	Inner Norms	284
7.6	Monotonicity	288
8	Newtonian Potential	303
8.1	Introduction	303
8.2	Subnewtonian Kernels	303
8.3	Poisson's Equation	316
8.4	Hölder Continuity of Second Derivatives	319
8.5	The Reflection Principle	326

9	Elliptic Operators	333
9.1	Introduction	333
9.2	Linear Spaces	334
9.3	Constant Coefficients	335
9.4	Schauder Interior Estimates.....	338
9.5	Maximum Principles	343
9.6	The Dirichlet Problem for a Ball	347
9.7	Dirichlet Problem for Bounded Domains.....	353
9.8	Barriers	358
10	Apriori Bounds	371
10.1	Introduction	371
10.2	Green Function for a Half-space	372
10.3	Mixed Boundary Conditions for Laplacian	376
10.4	Nonconstant Coefficients	385
11	Oblique Derivative Problem	391
11.1	Introduction	391
11.2	Boundary Maximum Principle	391
11.3	Curved Boundaries	405
11.4	Superfunctions for Elliptic Operators	410
11.5	Regularity of Boundary Points	420
	References	431
	Index	435
	Notation	439
