

# DETAILED CONTENTS

To the Student	xxiii
To the Instructor	xxv

## PART ONE INTRODUCTION 1

<b>1</b>	<b>BASIC QUESTIONS, MAJOR THEORIES</b>	<b>3</b>
	Describing and Explaining	5
	Similarities or Differences: Which Should We Study?	6
	What Are the Major Influences on Development?	7
	The Nature Side of the Equation	7
	The Nurture Side of the Equation	9
	Interactionist Views of Nature and Nurture	14
	What Is the Nature of Developmental Change?	17
	Theories of Development	17
	Biological Theories	18
	Learning Theories	19
	■ Some Applications of Learning Principles to Child Rearing	24
	Psychoanalytic Theories	25
	Cognitive-Developmental Theories	26
	Contrasting the Theories	27
	Finding the Answers: Research on Development	28
	Describing Behavior	28
	Describing Changes with Age	31
	Describing Relationships Among Variables	33
	Explaining Development: Experiments and Quasi Experiments	34
	<b>Summary</b>	<b>37</b>
	<b>Critical Thinking Questions</b>	<b>38</b>
	<b>Key Terms</b>	<b>39</b>
	<b>Suggested Readings</b>	<b>40</b>
	<b>Project 1: Observation of a Child</b>	<b>41</b>

<b>2</b>	<b>PRENATAL DEVELOPMENT</b>	<b>45</b>
	Conception	46
	The Basic Genetics of Conception	48
	Gametes	48
	Genes	49
	Males and Females	50
	Twins and Siblings	52
	Genotypes and Phenotypes	52
	Development from Conception to Birth	54
	The Germinal Stage: From Conception to Implantation	54
	The Embryonic Stage	55
	The Fetal Stage	56
	Prenatal Sexual Differentiation	59
	Explanations of the Normal Sequence of Development	60
	Genetic Errors	61
	Chromosomal Problems	61
	Single Gene Defects	64
	Diagnosing Chromosomal Anomalies and Single Gene Defects	65
	Environmental Influences: Disease, Drugs, and Diet	65
	Diseases of the Mother	65
	■ Genetic Counseling: Better Information Brings Difficult Decisions	66
	Drugs Taken by the Mother	69
	The Mother's Diet	73
	■ Diet and Exercise During Pregnancy	74
	Other Teratogens	76
	Other Characteristics Affecting the Normal Sequence	76
	The Mother's Age	76
	Number of Pregnancies	78
	The Mother's Emotional State	79
	Risks and Long-Term Consequences of Prenatal Problems	79
	Sex Differences in Prenatal Development	81
	Social Class Differences in Prenatal Development	82
	<b>Summary</b>	<b>82</b>
	<b>Critical Thinking Questions</b>	<b>84</b>
	<b>Key Terms</b>	<b>84</b>
	<b>Suggested Readings</b>	<b>86</b>
	<b>Project 2: Investigation of Available Prenatal Services</b>	<b>86</b>

### **3 BIRTH AND THE NEWBORN CHILD 89**

Birth	90
The Normal Process	90
The First Greeting: Parents and Newborns	92
Birth Choices	93
Problems at Birth	99
Assessing the Newborn	102
Adapting to the Newborn	103
■ Postpartum Depression	104
What Can the Newborn Do?	105
Reflexes	105
Perceptual Skills: What the Newborn Sees, Hears, and Feels	106
Motor Skills: Moving Around	107
Learning and Habituation	107
Social Skills	110
The Daily Life of Infants	112
Sleeping	112
Crying	113
Eating	115
Individual Differences Among Babies	115
Temperament	115
■ Breast-Feeding Versus Bottle-Feeding	116
Sex and Social Class Differences in Infants	118
■ Cross-Cultural Differences in Temperament	119
<b>Summary</b>	<b>119</b>
<b>Critical Thinking Questions</b>	<b>121</b>
<b>Key Terms</b>	<b>121</b>
<b>Suggested Readings</b>	<b>122</b>
<b>Project 3: Observation in a Newborn Nursery</b>	<b>122</b>
<b>Project 4: Observation of Turn-Taking During Feeding</b>	<b>123</b>

## **PART THREE THE PHYSICAL CHILD 125**

### **4 PHYSICAL DEVELOPMENT 127**

Four Reasons for Studying Physical Development	129
The Child's Growth Makes New Behaviors Possible	129
The Child's Growth Determines Experience	129

The Child's Growth Affects Others' Responses	129
The Child's Growth Affects Self-Concept	130
Basic Sequences and Common Patterns	131
Height and Weight	131
Shape	132
Bones	133
Muscles	134
Fat	135
Development of the Nervous System	135
Hormones	138
Development of Sexual Maturity	140
Sexual Development in Girls	141
Sexual Development in Boys	142
Other Changes in Puberty	143
Using the Body: The Effects of Physical Changes on Behavior	144
Motor Development	144
Adolescent Sexuality	146
Big or Fast Versus Slow or Small: Some Individual Differences in	
Physical Development	147
Differences in Rate	147
■ Motor Development and Toys	150
Sex Differences in Physical Growth	154
Social Class and Racial Differences	155
Health and Illness in Childhood and Adolescence	156
Determinants of Growth: Explanations of Physical	
Development	158
Maturation	158
Heredity	159
Environmental Effects	159
■ Eating Disorders: Obesity, Bulimia, and Anorexia	160
The Shape of Physical Development: A Last Look	163
<b>Summary</b>	<b>163</b>
<b>Critical Thinking Questions</b>	<b>164</b>
<b>Key Terms</b>	<b>165</b>
<b>Suggested Readings</b>	<b>166</b>
<b>Project 5: Plotting Your Own Growth</b>	<b>167</b>

## **5 PERCEPTUAL DEVELOPMENT** 169

Methods for Studying Early Perception	171
Basic Sensory Skills	172
Seeing	172
Hearing	174

Other Senses	175	
Complex Perceptual Skills: Preferences, Discriminations, and Patterns	176	
Looking	177	
Listening	181	
Cross-Modal Transfer: Combining Information from Several Senses	184	
■ Blind Babies Can “See” with Their Ears	186	
Ignoring Perceptual Information: The Perceptual Constancies		187
The Object Concept	189	
Object Perception	190	
Object Permanence	190	
Object Identity	192	
Individual Differences in Perception		193
Differences in Rate	193	
Differences in Speed or Efficiency		193
Differences in Style	194	
Sex and Social Class Differences		196
Explanations of Perceptual Development		196
Nativism Versus Empiricism	197	
An Alternative Theoretical Approach: Eleanor Gibson's Views	198	
Perceptual Development: A Summing Up		200
<b>Summary</b>	<b>201</b>	
<b>Critical Thinking Questions</b>	<b>202</b>	
<b>Key Terms</b>	<b>203</b>	
<b>Suggested Readings</b>	<b>203</b>	
Project 6: Development of the Object Concept		204

## PART FOUR THE THINKING CHILD 205

### 6 COGNITIVE DEVELOPMENT I: COGNITIVE POWER 207

Three Views of Intelligence	208	
Measuring Intellectual Power: IQ Tests		210
The First IQ Tests	210	
Modern IQ Tests	211	
■ The Wechsler Intelligence Scale for Children-Revised (WISC-R)	212	

Achievement Tests	213	
What IQ Tests Predict	214	
School Performance	214	
Later Job Success	215	
■ Testing in the Schools	216	
Stability of IQ Test Scores	218	
Limitations of Traditional IQ Tests	219	
An Alternative View: Sternberg's Triarchic Theory of Intelligence	220	
Explaining the Differences: Factors Influencing IQ Test Scores		222
Influence of Heredity on IQ: A Journey into Some Classic Research	222	
The Influence of the Environment on IQ	225	
Differences in Environments Between Families	225	
Differences in Environments Within Families	229	
School Experiences and Special Interventions	230	
Interaction of Heredity and Environment: Reaction Range		234
Group Differences in IQ: Race and Sex Differences	235	
Racial Differences in IQ	235	
Sex Differences in IQ	237	
The Measurement of Intelligence: A Last Look	239	
<b>Summary</b>	<b>240</b>	
<b>Critical Thinking Questions</b>	<b>241</b>	
<b>Key Terms</b>	<b>241</b>	
<b>Suggested Readings</b>	<b>242</b>	
<b>Project 7: Investigation of IQ Testing in Local Schools</b>		<b>243</b>

## **7 COGNITIVE DEVELOPMENT II: STRUCTURE AND PROCESS 245**

Piaget's Basic Ideas	246	
The Processes of Adaptation	247	
The Sensorimotor Period: From Birth to 18 Months	250	
Piaget's View of the Sensorimotor Period	250	
Current Work on the Sensorimotor Period	253	
Overview of the Sensorimotor Period	254	
Preoperational Thought: From 18 Months to 6 Years	254	
Piaget's View of the Preoperational Period	255	
■ Young Children's Play	256	
Current Work on the Preoperational Period	259	

Overview of the Preoperational Child	263	
Concrete Operational Thought: From 6 to 12 Years	264	
Piaget's View of Concrete Operations	264	
Post-Piagetian Work on Concrete Operations	265	
Overview of the Concrete Operational Child	267	
Formal Operational Thought: From Age 12 On	268	
Piaget's View of Formal Operational Thought	268	
Current Work on Formal Operations	269	
Overview of the Stages of Cognitive Development	272	
Criticisms of Piaget's Theory	272	
The Timing of Developments	272	
Are There Stages?	272	
Information Processing in Children	275	
Developmental Approaches to Information Processing	276	276
Individual Differences in Information Processing	282	282
Putting the Three Approaches Together	284	
<b>Summary</b>	<b>285</b>	
<b>Critical Thinking Questions</b>	<b>286</b>	
<b>Key Terms</b>	<b>286</b>	
<b>Suggested Readings</b>	<b>287</b>	
<b>Project 8: The Game of 20 Questions</b>	288	
<b>Project 9: Conservation of Number, Mass, and Weight</b>	290	
<b>Project 10: The Pendulum</b>	293	

## **8 THE DEVELOPMENT OF LANGUAGE 295**

What Is Language Anyway?	296	
The Early Steps of Language Development	298	
Before the First Word: The Prelinguistic Phase	298	298
The First Words	299	
The First Sentences	303	
The Development of Grammar	304	
Stage I Grammar	304	
Stage II Grammar	305	
Later Grammar Development	307	
Overview of Grammatical Development	308	
The Development of Word Meaning	308	
What Comes First, the Meaning or the Word?	308	
■ Learning Two Languages: Bilingual Children	310	
Extending the Class	312	
How Does a Child Know What a Word Refers To?	313	

Using Language: Communication and Self-Direction	315
Explaining Language Development	317
The Influence of the Environment on Language Development	317
Early Theories: Imitation and Reinforcement	317
Newer Environmental Theories: Talking to the Child and Other Input Theories	318
The Child's Role in Language Development	321
Innateness Theories	321
Cognitive Processing Explanations	323
■ Language in the Deaf	324
■ Universals and Variations: Studies of Many Languages	325
Connectionist Models: A New Approach	326
A Combined View	327
Individual Differences in Language Development	328
Power Differences	328
Differences in Style of Language	330
An Application of the Basic Knowledge: Learning to Read	331
<b>Summary</b>	<b>332</b>
<b>Critical Thinking Questions</b>	<b>333</b>
<b>Key Terms</b>	<b>334</b>
<b>Suggested Readings</b>	<b>334</b>
<b>Project 11: Beginning Two-Word Sentences</b>	<b>335</b>
<b>Project 12: Conversation Between Mother and Child</b>	<b>336</b>

## PART FIVE THE SOCIAL CHILD 337

### 9 PERSONALITY DEVELOPMENT: ALTERNATIVE VIEWS 339

The Major Alternative Views of Personality	342
A Biological Approach: Temperament	342
The Evidence	345
■ The Inheritance of Personality Patterns: Evidence from Adults	346
Strengths, Weaknesses, and Implications	348
Learning Approaches to Personality	349
Radical Behaviorists and Personality	349
■ Temperament and Behavior Problems	350
Social Learning Theorists and Personality	352
Strengths, Weaknesses, and Implications	354

Psychoanalytic Theories	356	
Some Differences Between Freud and Erikson		357
Freud's Psychosexual Stages	357	
Erikson's Psychosocial Stages	360	
Other Psychoanalytic Views	363	
The Evidence	364	
■ The Effects of Divorce: One Test of Psychoanalytic Theory		366
Strengths, Weaknesses, and Implications	368	
A Tentative Synthesis	369	
<b>Summary</b>	<b>371</b>	
<b>Critical Thinking Questions</b>	<b>372</b>	
<b>Key Terms</b>	<b>373</b>	
<b>Suggested Readings</b>	<b>373</b>	

## 10 THE CONCEPT OF SELF IN CHILDREN 375

The Concept of Self: Developmental Patterns	376	
The First Step: The "Existential Self"	377	
The Second Step: The Categorical Self	377	
Identity in Adolescence	380	
Summary of Developmental Changes in Self-Concept		383
Individual Differences in the Self-Concept	384	
Self-Esteem	384	
Identity Achievement	388	
The Self-Concept: A Summing Up	389	
The Development of Gender and Sex-Role Concepts		389
Some Definitions	390	
Developmental Patterns	391	
Theories of Sex-Role Concepts and Sex-Role Behavior		395
Psychoanalytic Explanations	395	
Social-Learning Explanations	396	
Cognitive-Developmental Explanations	398	
A New Alternative: Gender Schemas	399	
Individual Differences in Sex Roles and Stereotypes		400
Cross-Sex Children	401	
■ Sex Stereotyping on TV and in Books		402
Androgyny	402	
<b>Summary</b>	<b>406</b>	
<b>Critical Thinking Questions</b>	<b>407</b>	
<b>Key Terms</b>	<b>408</b>	
<b>Suggested Readings</b>	<b>408</b>	
<b>Project 13: Sex Roles on TV</b>	<b>409</b>	

Types of Relationships	412	
Attachment Theory: Concepts and Terminology	413	
The Formation of the Parents' Bond to the Child	414	
The First Step: The Initial Bond	414	
The Second Step: The Meshing of Attachment Behaviors	416	
Father-Child Bonds	417	
■ When Mutuality Fails: Child Abuse and Other Consequences of Failure of Bonding	418	
The Attachment Process: Child to Parent	421	
Phase 1: Initial Preattachment	421	
Phase 2: Attachment in the Making	421	
Phase 3: Clear-Cut Attachment	422	
Attachments to Parents in Preschool and Elementary School Children	424	
Parent-Child Relationships at Adolescence	425	
Attachments to Fathers and Mothers	426	
Individual Differences in the Quality of Infants' Attachments	427	
Secure and Insecure Attachments	428	
Is the Security of Attachment Stable Over Time?	428	
■ Secure and Insecure Attachments in Other Cultures	430	
How Is a Secure Attachment Formed?	431	
Security of Attachment Versus Temperament	432	
Long-Term Effects of Secure/Insecure Attachment	433	
Horizontal Relationships: The Child's Relationships with Other Children	434	
Developmental Trends in Peer Relationships	434	
Friendship	437	
Prosocial Behavior	439	
Negative Interactions: Aggression and Dominance	440	
Individual Differences in Peer Relationships	441	
Popularity	441	
■ Rearing Helpful and Altruistic Children	442	
Sex Differences	445	
<b>Summary</b>	<b>448</b>	
<b>Critical Thinking Questions</b>	<b>449</b>	
<b>Key Terms</b>	<b>450</b>	
<b>Suggested Readings</b>	<b>450</b>	
<b>Project 14: Observation of Children's Play Groups</b>	<b>451</b>	
<b>Project 15: Observation of Altruistic Behavior</b>	<b>453</b>	

## 12 THINKING ABOUT RELATIONSHIPS: THE DEVELOPMENT OF SOCIAL COGNITION 455

Some General Principles and Issues	456
The Cognitive Side of Social Cognition	456
The Social Side of Social Cognition	457
Thinking About Other People: Feelings and Qualities	458
The Development of Empathy	458
Describing Other People	460
Thinking About Relationships	462
Thinking About What People <i>Ought</i> to Do	463
Piaget's Early Ideas About Moral Judgments	464
Kohlberg's Stages of Moral Development	466
Eisenberg's Model of Prosocial Reasoning	473
Gilligan's Ethic of Caring	475
Social Cognition and Behavior	477
Social Cognition and General Cognitive Development	481
■ Moral Education and Moral Development	482
<b>Summary</b>	<b>483</b>
<b>Critical Thinking Questions</b>	<b>484</b>
<b>Key Terms</b>	<b>485</b>
<b>Suggested Readings</b>	<b>485</b>
<b>Project 16: Understanding Friendship</b>	<b>486</b>

## PART SIX THE WHOLE CHILD 489

### 13 THE ECOLOGY OF DEVELOPMENT: THE IMPACT OF FAMILIES, SCHOOLS, AND CULTURE 491

Theoretical Approaches	493
Systems Theory	493
Bronfenbrenner's Ecological Approach	494
The Key Microsystem: The Family	496
Significant Dimensions of Family Interactions	496
■ To Spank or Not to Spank	500
Patterns of Child Rearing	501
Other Elements in the Family Microsystem	504

A Second Microsystem: Day Care	508	
Who Is Taking Care of the Children?	508	
Direct Effects of Day Care on the Child	509	
The Effects of Day Care on the Child's Attachment to Parents	510	
The Quality of Care	512	
Schools: A Third Microsystem	512	
Some Exosystem Effects: The Impact of Parents' Work and Social Support on the Family Microsystem	513	
The Impact of Parents' Jobs on the Family and the Child		514
Social Support for Parents	517	
Macrosystem Effects: The Impact of the Larger Culture		518
Ethnic Groups	518	
Social Class	520	
A General Cultural Effect: Television	521	
A Reprise: Systems and Interpretations	524	
<b>Summary</b>	<b>525</b>	
<b>Critical Thinking Questions</b>	<b>526</b>	
<b>Key Terms</b>	<b>527</b>	
<b>Suggested Readings</b>	<b>527</b>	
<b>Project 17: Television Aggression</b>	528	
<b>Project 18: Assessing Information About Children from     Lay Sources</b>	528	
<b>Project 19: Assessment of Day-Care Centers</b>	529	
<b>Project 20: Investigation of Day-Care Arrangements Available</b>		530

## 14 ATYPICAL DEVELOPMENT 533

How Common Are Such Problems?	534	
The Psychopathologies of Childhood	536	
Developmental Psychopathology: A New Approach		536
Externalizing Problems	538	
Internalizing Problems: The Example of Depression		542
■ Adolescent Suicide	544	
The Role of Short-Term Stress in Psychopathology		546
Vulnerability or Resilience	546	
Developmental Psychopathology: A Reprise		548
Intellectually Atypical Development	548	
Mental Retardation	548	
Learning Disorders	552	
Giftedness	554	

Physically Atypical Development	556	
Autism	556	
Blindness and Hearing Impairments	557	
Sex Differences in Atypical Development	558	
■ Basic Attachments Between Blind Babies and Their Mothers		560
The Impact of an Atypical Child on the Family	561	
A Final Point	562	
<b>Summary</b>	<b>563</b>	
<b>Critical Thinking Questions</b>	<b>564</b>	
<b>Key Terms</b>	<b>565</b>	
<b>Suggested Readings</b>	<b>565</b>	
<b>Project 21: Investigating Programs for the Gifted and Retarded</b>		<b>566</b>

## **15 PUTTING IT ALL TOGETHER: THE DEVELOPING CHILD**

Ages and Stages	570	
Transitions and Consolidations	570	
Systems	571	
From Birth to 18 Months	571	
The Preschool Years: From 18 Months to 6 Years	575	
The Elementary School Years: From 6 to 12	578	
Adolescence: From 12 to 20	579	
Returning to Some Basic Questions	583	
What Are the Major Influences on Development?	583	
Does Timing Matter?	585	
What Is the Nature of Developmental Change?	588	
Individual Differences	590	
Sex Differences in Development	590	
Vulnerability or Resilience	591	
A Final Point: The Joy of Development	594	
<b>Summary</b>	<b>595</b>	
<b>Critical Thinking Questions</b>	<b>596</b>	
<b>Suggested Readings</b>	<b>597</b>	

Glossary	599
References	605
Picture Credits	635
Author Index	637
Subject Index	645
