

Contents

Part I General Research Methodology in Child Development

1. The Study of Child Behavior and Development 3
Alfred L. Baldwin, Cornell University
2. Research Design in the Study of Developmental Problems 36
William Kessen, Yale University
3. Observational Child Study 71
Herbert F. Wright, University of Kansas
4. The Laboratory-Experimental Study of Child Behavior 140
Sidney W. Bijou and Donald M. Baer, University of Washington

Part II The Study of Biological Growth and Development

5. Methods of Studying Physical Growth 201
Howard V. Meredith, State University of Iowa
6. Chemical and Physiologic Growth 252
Icie G. Macy and Harriet J. Kelly, Merrill-Palmer Institute
7. Receptor Functions 284
Austin H. Reisen, University of Chicago

Part III The Study of Cognitive Processes

8. Experimental Methods of Studying Perception in Children 311
Eleanor J. Gibson and Vivian Olum, Cornell University
9. Research Methods in Children's Learning 374
Charles C. Spiker, State University of Iowa
