Preface	xii
1 / Introduction and Methods	1
Introduction	1
Reactivity	4
Measuring Play	6
Other Activity Recording Systems	19
2 / Theoretical Overview	25
Introduction	25
Two Approaches	26
The Philosophical Approach	26
Hedonic Theory	27
Contemporary Play Theory	29
Stimulation Seeking	31
Arousal Seeking	33
Sources of Arousal	34
Repetitious Responding	36
Summary	38
3 / Attributes Modulating Preference	39
Introduction	39
Physical Properties	39

Novelty and Familiarity	44
Stimulus Complexity	50
Novelty, Complexity and Play	53
The Familiarity-Preference Hypothesis Revisited	55
Summary	62

4 / Activity of Children **63**

Introduction	63
Intentional Behavior	63
Activity Level	64
Activity of Down's Syndrome Children	68
Hyperactivity and Hyperkinesis	72
Periodicities in Activity	84
Summary	99

5 / Boredom and Creativity **101**

Introduction	101
Stereotyped Behavior	102
Physiological Correlates of Play	108
Development of Creativity	112
Summary	121

6 / Review and Preview **123**

Failures	123
Successes	124
Preview	126

Bibliography **132**

A / Names and Derivations of Dependent Variables Originated in Various Experiments **151**

B / Camera Details **161**

C / Description of Heart Rate Telemeter **162**

D /	Limitations of the Douglas Valve Compared to the Portable Respiratory Helmet	164
E /	Portable Respiratory Helmet Construction	165
F /	Karlsson Behavior Problem Checklist	167
	Index	169
