

CHAPTER 1 THE STUDY OF HUMAN DEVELOPMENT	1
A Child of Nature?	2
The Legacy of Itard	3
The rise of a new discipline	4
Modern developmental psychology	6
The Central Questions of Developmental Psychology	6
Questions about continuity	6
<i>Are human beings distinctive?</i>	7
<i>Is individual development continuous?</i>	8
<i>Are there critical periods in development?</i>	10
Questions about the sources of development	11
<i>The biological-maturation perspective</i>	12
<i>The environmental-learning perspective</i>	14
<i>The interactional perspective</i>	14
<i>The cultural-context perspective</i>	16
The Discipline of Developmental Psychology	18
Criteria of scientific description	18
Techniques of data collection	19
<i>Self-reports</i>	19
<i>Naturalistic observation</i>	19
Observation in many contexts	20
Observation in a single context	21
Limitations of naturalistic observations	22
<i>Experimental methods</i>	22
Ethics and experimentation	25
Experiments and artificiality	26
<i>Clinical methods</i>	26
Research designs	29
<i>Longitudinal designs</i>	29
<i>Cross-sectional designs</i>	30
The role of theory	32

This Book and the Field of Developmental Psychology	32
BOX 1.1 Philosophical forefathers of developmental psychology	12
BOX 1.2 Correlation does not imply causation	24
BOX 1.3 Ethical standards for research with children	27
Summary	35
Key terms	36
Suggested readings	36

PART I IN THE BEGINNING 37

CHAPTER 2 THE HUMAN HERITAGE: GENES AND ENVIRONMENT 41

Sexual Reproduction and Genetic Transmission 43

Mitosis: A process of cell replication 43

Meiosis: A source of variability 45

Sexual determination: A case of variability 46

The Laws of Genetic Inheritance 48

Genotype and phenotype 50

Sex-linked genetic effects 50

Genes, the Organism, and the Environment 51

Studying gene-environment interactions 51

The range of reaction for human genotypes 53

Feedback in gene-environment interactions 53

Picturing gene-environment interactions 54

Four questions about gene-environment
interactions 55

Is there a developmental program? 55

Do genes determine the phenotype? 56

Do genes determine capacity? 56

Do genes determine tendencies? 57

Mutations and Genetic Abnormalities 58

Sickle-cell anemia: An example of gene-
environment interaction 58

Down's Syndrome: An example of chromosomal error	61
Sex-linked chromosomal abnormalities	62
Phenylketonuria: A treatable genetic disease	63

Biology and Culture	63
Acquired characteristics	63
Coevolution	66
BOX 2.1 Twinning	46
BOX 2.2 Genetic counseling	64
Summary	68
Key terms	69
Suggested readings	69

CHAPTER 3 PRENATAL DEVELOPMENT 71

The Periods of Prenatal Development	74
The germinal period	74
<i>The first cells of life</i>	74
<i>The emergence of new forms</i>	76
<i>Implantation</i>	77
The embryonic period	78
<i>Sources of nutrition and protection</i>	78
<i>The growth of the embryo</i>	79
The fetal period	80
<i>Fetal activity</i>	81
<i>Functions of fetal activity</i>	85

The Developing Organism in the Prenatal Environment	86
The fetus's sensory capacities	87
<i>Motion</i>	87
<i>Vision</i>	87
<i>Sound</i>	87
Fetal learning	87
Maternal conditions and prenatal development	88
<i>The effects of maternal attitudes and psychological stress</i>	88
<i>Nutritional influences on prenatal development</i>	89
Extreme malnutrition	90
Undernourishment and associated factors	91
Teratogens: Environmental sources of birth defects	94
<i>Drugs</i>	94
Prescription and nonprescription drugs	95
Smoking	95
Alcohol	96
Methadone and heroin	96

<i>Infections</i>	97
Rubella	97
Acquired immune deficiency syndrome (AIDS)	97
<i>Rh incompatibility</i>	97
<i>Radiation</i>	99
<i>Pollution</i>	99
<i>Principles of teratogenic effects</i>	100
Prenatal Development Reconsidered	100
BOX 3.1 The development of sexual differentiation	82
BOX 3.2 Fathers and pregnancy	90
Summary	102
Key terms	103
Suggested readings	103
CHAPTER 4 BIRTH: STARTING LIFE ON THE OUTSIDE	105
Giving Birth	107
The stages of labor	107
Cultural variations in childbirth	108
Childbirth in the United States	109
<i>Childbirth pain and its medication</i>	110
<i>Medical interventions during childbirth</i>	111
The Baby's Condition	112
Assessing the baby's viability	113
<i>Physical state</i>	115
<i>Behavioral condition</i>	115
Problems and complications	116
<i>Prematurity</i>	116
<i>Low birth weight</i>	117
<i>Developmental consequences</i>	118
Newborn Behavior	119
Sensory capacities	120
<i>Hearing</i>	120
<i>Vision</i>	120
Visual acuity	121
Visual scanning	121
Pattern perception	121
<i>Taste and smell</i>	126
<i>Touch, temperature, and position</i>	126
Response capacities	127
<i>Reflexes</i>	127
<i>Emotions</i>	127
<i>Temperament</i>	130

Beginning the Parent-Child Relationship	132
The baby's appearance	133
Early parent-infant contact	134
Social expectations	136
BOX 4.1 Prepared childbirth	112
BOX 4.2 The baby's experience of birth	114
BOX 4.3 The categorical perception of speech sounds	124
BOX 4.4 The parents' response to the baby's arrival	134
Summary	137
Key terms	138
Suggested readings	138

PART II INFANCY 139

CHAPTER 5 DEVELOPMENTAL CHANGE IN EARLY INFANCY 143

Becoming Coordinated	144
Sleeping	146
Feeding	148
Crying	148

Mechanisms of Developmental Change	151
From sucking to nursing	151
The biological-maturation perspective	152
<i>Reflexes and the brain</i>	152
<i>Evidence from studies of babies with abnormalities</i>	155
<i>Evidence from studies of reflexes and later behavior</i>	155
The environmental-learning perspective	158
<i>Classical conditioning</i>	159
<i>Operant conditioning</i>	162
The interactional perspective: Jean Piaget	164
<i>Piaget's theory of developmental change</i>	164
<i>The sensorimotor period and its substages</i>	165
<i>Piaget's theory and the social environment</i>	166
The cultural-context perspective	168

Integrating the Separate Threads of Development	170
The first postnatal bio-social-behavioral shift	171
The emergence of social smiling	172
Summing up the first two and a half months	174
BOX 5.1 Comforting techniques for fussiness	150
BOX 5.2 Experience and the development of the brain	156

BOX 5.3 Imitation in the newborn?	160
Summary	175
Key terms	176
Suggested readings	176

CHAPTER 6 THE ACHIEVEMENTS OF THE FIRST YEAR 179

Biological Changes	181
Size and shape	181
Muscle and bone	182
The brain	182
Motor Development	183
Reaching and grasping	183
Locomotion	185
The role of practice in motor development	186
Cognitive Changes	189
Piaget's sensorimotor substages	189
<i>Substage 3: Secondary circular reactions</i>	189
<i>Substage 4: Coordination of secondary circular reactions</i>	189
Out of sight, out of mind?	190
Stages of object permanence	192
<i>Stages 1 and 2 (birth to 4 months)</i>	192
<i>Stage 3 (4 to 8 months)</i>	192
<i>Stage 4 (8 to 12 months)</i>	192
<i>The role of familiarity in object permanence</i>	194
<i>Explaining the acquisition of object permanence</i>	194
Problems associated with motor skills	194
Problems remembering	195
Problems separating movement and location	195
Integrating the different properties of objects	197
Learning about kinds of things	198
The growth of memory	199
Recall and wariness	200
A New Relationship to the Social World	201
The role of uncertainty in wariness	201
A new form of emotional relationship	202
The changing nature of communication	205
A New Bio-Social-Behavioral Shift	206
BOX 6.1 Action and understanding	196
Summary	208
Key terms	209
Suggested readings	209

CHAPTER 7 THE END OF INFANCY	211
Biological Maturation	213
Changes in brain structure	213
Motor control	214
<i>Walking</i>	215
<i>Manual dexterity</i>	215
<i>Control of elimination</i>	215
A New Mode of Thought	216
Completing the sensorimotor substages	216
<i>Substage 5: Tertiary circular reactions</i>	216
<i>Substage 6: Representation</i>	217
Mastery of object permanence	218
Problem solving	219
Play	220
Imitation	222
The growth of categorizing ability	223
First words	224
The Development of Child-Caretaker Relations	226
The course of attachment	226
Explanations of attachment	227
<i>Sigmund Freud's drive-reduction explanation</i>	227
<i>Erik Erikson's psychosocial explanation of attachment</i>	227
<i>John Bowlby's evolutionary explanation</i>	228
<i>Evidence from animal models</i>	229
Patterns of attachment	232
<i>The causes of different patterns of attachment</i>	233
<i>Stability of patterns of attachment</i>	236
A New Sense of Self	236
A sense of standards	237
Self-description	238
Self-recognition	238
The End of Infancy	239
BOX 7.1 Attachment to fathers and others	234
Summary	240
Key terms	241
Suggested readings	241

CHAPTER 8 EARLY EXPERIENCE AND LATER LIFE 243

Optimal Conditions for Infant Development	245
Spoiling: Responding too much	247
Learned helplessness: Responding too little	248

Effects of Separation	249
Temporary separation from parents	249
Extended separation from parents	251
<i>Children of the crèche</i>	251
<i>Children reared in well-staffed orphanages</i>	252
Isolated children	255
Vulnerability and Resilience	255
Family characteristics	255
Characteristics of the community	256
Characteristics of the child	256
Transactional models of development	256
Recovery from Deprivation	258
Harlow's monkeys revisited	258
Recovery from the effects of isolation	259
Implications for human recovery	260
The Primacy of Infancy Reconsidered	260
Attachment	262
Psychological functioning	262
Coming to terms with limited predictability	263
BOX 8.1 Out-of-home care in the first year of life	250
Summary	264
Key terms	265
Suggested readings	265

PART III EARLY CHILDHOOD **267**

CHAPTER 9 LANGUAGE ACQUISITION **271**

The Puzzle of Language Development	273
The problem of reference	273
The problem of syntax	274

Explanations of Language Acquisition	275
The learning theory explanation	275
<i>Classical conditioning</i>	275
<i>Operant conditioning</i>	276
<i>Imitation</i>	276
A structural-innatist explanation	276
Interactionist explanations	277
Theoretical approaches compared	278

Four Subsystems of Language	279
Sounds	279
<i>Pronunciation</i>	279
<i>Sounds and meaning</i>	280
Words	281
<i>Words as mediators</i>	282
<i>The earliest vocabulary</i>	283
<i>Early word meanings</i>	283

Overextensions	284
Underextensions	284
<i>The changing structure of the lexicon</i>	285
<i>Words or sentences?</i>	287
Sentences	288
<i>Two-word utterances</i>	288
<i>Increasing complexity</i>	289
The uses of language	292
<i>Conversational acts</i>	292
<i>Taking account of the listener</i>	292
Language and Thought	293
The environmental-learning perspective	293
Piaget's interactionist perspective	293
The structural-innatist perspective	294
A cultural-context perspective	295
The Essential Ingredients of Language	
Acquisition	297
Language and other species	297
The environment of language development	200
<i>Partial deprivation</i>	299
<i>Language and activity</i>	301
<i>Is there a role for deliberate instruction?</i>	302
BOX 9.1 Gulliver among the Laputans	286
BOX 9.2 Figurative language	296
Summary	304
Key terms	305
Suggested readings	305

CHAPTER 10 PARADOXES OF THE PRESCHOOL MIND 307

Piaget's Account of the Preschool Mind	309
Egocentrism	310
Distinguishing appearance from reality	312
Precausal reasoning	313
The Study of Preschool Thinking after Piaget	314
The problem of uneven levels of performance	315
<i>Nonegocentric reasoning</i>	315
<i>Distinguishing appearance from reality</i>	316
The search for alternatives	318
Neo-Piagetian theories of cognitive development	318
Information-processing approaches	319
Biological accounts of preschoolers' mental development	324
<i>The growth of the brain</i>	324
<i>Mental modules</i>	324
<i>Assessing modularity explanations</i>	325

Culture and preschoolers' mental development	326
<i>Contexts and schemas</i>	326
<i>The mental representation of contexts</i>	328
<i>The function of scripts</i>	328
Cultural context and the unevenness of development	329
<i>Assessing the cultural-context explanation</i>	332
Applying the Theoretical Perspectives	332
Constructing stages	333
An information-processing approach	335
Drawing as a mental module	335
A cultural-context account of the development of drawing	336
Reconciling Alternative Perspectives	338
BOX 10.1 Preschool witnesses	320
BOX 10.2 Socio-dramatic play	330
Summary	339
Key terms	340
Suggested readings	340

CHAPTER 11 SOCIAL DEVELOPMENT IN EARLY CHILDHOOD 343

Acquiring a Social Identity	345
Sex-role identity	345
Identification through differentiation	346
Identification through affiliation	347
Identification through observation and imitation	350
Identification through cognition	351
<i>Sex-role knowledge and sex-role behavior</i>	352
<i>Sex-role constancy</i>	353
Theories of identification compared	354
Developing the Ability to Regulate Oneself	354
Internalization	356
Self-control	356
Aggression and Prosocial Behavior	360
The development of aggression	360
What causes aggression?	362
<i>The argument from evolution</i>	362
<i>Rewarding aggression</i>	362
<i>Modeling</i>	362
Controlling human aggression	363
<i>Evolutionary theories</i>	363
<i>Frustration and the catharsis myth</i>	365
<i>Punishment</i>	366

<i>Rewarding nonaggressive behaviors</i>	367
<i>Cognitive training</i>	367
The development of prosocial behavior	367
<i>Evolutionary explanations</i>	367
<i>Empathy</i>	368
<i>Evidence on the development of prosocial behavior</i>	368
<i>Promoting prosocial behavior</i>	370
Taking One's Place in the Social Group	372
BOX 11.1 Sigmund Freud	348
BOX 11.2 Erik Erikson	358
BOX 11.3 Siblings and socialization	370
Summary	373
Key terms	374
Suggested readings	374
CHAPTER 12 SOCIALIZATION: CONTEXTS AND MEDIA	377
Cultural Variations in Family Socialization	379
Modal patterns of parenting in the United States	382
Factors influencing family interaction patterns	385
Socialization and social inequality	388
Media Linking Community and Home	389
Television: What is real? What is pretend?	389
<i>The problem of television form</i>	389
<i>The problem of television content</i>	390
<i>Family influences</i>	391
Books	393
<i>The form of early literacy experiences</i>	393
<i>The content of early reading</i>	394
The Child in the Community	395
Varieties of day care	396
<i>Home care</i>	396
<i>Family day care</i>	396
<i>Day-care centers</i>	396
Developmental effects of day care	397
<i>Shortcomings of the evidence</i>	397
<i>Intellectual effects</i>	398
<i>Impact on social development</i>	398
Nursery school	400
<i>Preschools and the "War on Poverty"</i>	400
On The Threshold	402
BOX 12.1 Growing up in a single-parent household	386

BOX 12.2	The sense of nonsense verse	395
	Summary	403
	Key terms	404
	Suggested readings	404

PART IV MIDDLE CHILDHOOD 405

CHAPTER 13 COGNITIVE AND BIOLOGICAL ATTAINMENTS OF MIDDLE CHILDHOOD 409

Biological Developments	412
Physical growth	413
Brain developments	413
A New Quality of Mind?	416
New forms of remembering	416
<i>Memory capacity</i>	417
<i>Memory strategies</i>	417
<i>Knowledge base</i>	418
<i>Metamemory</i>	418
<i>The combined picture</i>	419
New forms of reasoning: concrete operations	419
<i>Conservation</i>	420
<i>Logical classification</i>	423
Considering two things at a time	425
<i>Perceiving two things at a time</i>	426
<i>Declining egocentrism</i>	426
<i>The growth of effective communication</i>	426
<i>Social perspective-taking</i>	426
Cultural variations in cognitive change	428
<i>Studies of concrete operations</i>	429
<i>Studies of memory</i>	431
<i>Is middle childhood a universal stage of development?</i>	433
Summary	433
Key terms	434
Suggested readings	434

CHAPTER 14 SCHOOLING AND DEVELOPMENT IN MIDDLE CHILDHOOD 437

The Contexts in which Skills Are Taught	438
The Nature of School Learning	440
The development of literacy and schooling	440
Literacy and schooling in modern times	443
The development of the alphabet	443
Learning to read	444

Learning arithmetic	445
The special language of schooling	449
The Cognitive Consequences of Schooling	452
Concrete operations	453
The organization of word meanings	453
Memory	453
Metacognitive skills	455
The evidence in overview	456
Aptitude for Schooling	456
The origins of intelligence testing	457
The legacy of Binet and Simon	459
<i>The nature of intelligence: general or specific?</i>	460
<i>Population differences and the nature-nurture controversy</i>	462
<i>IQ performance and school success: current research</i>	464
The School and the Community	467
Peer influence	467
School atmosphere	469
Out of school	470
BOX 14.1 Teaching the basics	450
BOX 14.2 Teacher expectations and school success	468
Summary	471
Key terms	472
Suggested readings	472
CHAPTER 15 THE SOCIAL RELATIONS OF MIDDLE CHILDHOOD	475
Games and Group Regulation	478
Games and rules	478
Games and life	479
Reasoning and Action in Different Rule Domains	482
Moral rules	484
Rules of fairness	488
Reasoning about social conventions	491
Relations with Other Children	493
Friendship	493
<i>Friendship and perspective-taking</i>	494
<i>Boys, girls, and friends</i>	495
Popularity	496
Socialization Practices and Peer Relations	497
<i>Competition and cooperation</i>	498
<i>Competition and conflict</i>	499

Developmental Consequences of Peer Interaction	500
Changing Relations with Parents	503
A New Sense of Self	505
Self-definition	506
Social comparison	507
Self-esteem	508
Middle Childhood Reconsidered	510
BOX 15.1 Boys' games, girls' games	483
BOX 15.2 Maternal employment and child welfare	504
Summary	511
Key Terms	512
Suggested Readings	512
PART V ADOLESCENCE	513
CHAPTER 16 BIOLOGICAL AND SOCIAL FOUNDATIONS OF ADOLESCENCE	517
Traditional Conceptions of Adolescence	520
Modern Theories of Adolescence	521
The biological-maturation perspective	521
<i>Arnold Gesell</i>	521
<i>Sigmund Freud</i>	521
The environmental-learning perspective	523
The interactional perspective	524
<i>Jean Piaget</i>	524
<i>Erik Erikson</i>	524
The cultural-context perspective	525
Puberty	526
The growth spurt	526
Sexual development	527
The timing of the events of puberty	529
Consequences of early and late maturation	531
The Reorganization of Social Life	532
A new relationship to peers	532
<i>Friendship</i>	532
<i>Popularity</i>	534
<i>The transition to sexual relationships</i>	536
Cliques and crowds	536
Peer group leaders	538
Sexual activity	539
<i>Sex as a scripted activity</i>	539
Sexual expectations	541
<i>Initial responses to sexual intercourse</i>	543

<i>Changing sexual habits</i>	543
<i>Teenage pregnancy</i>	545
Parents and peers	546
<i>The relative influence of parents and peers</i>	546
<i>Peer pressure to conform</i>	548
<i>The content and severity of adolescent-parent conflict</i>	550
Work	552
The Bio-social frame and adolescent development	555
BOX 16.1 Recapitulation and development	522
BOX 16.2 Homosexuality	540
BOX 16.3 The traditional Kikuyu script for adolescent sex	542
Summary	555
Key terms	556
Suggested readings	557

CHAPTER 17 THE PSYCHOLOGICAL ACHIEVEMENTS OF ADOLESCENCE 559

Research on Adolescent Thought	561
Formal operations	561
<i>Are formal operations universal?</i>	564
Studies among U.S. subjects	564
Sex differences in formal operations	565
Cultural variations in formal operations	566
Alternative approaches to adolescent thought	567
<i>Information-processing theories</i>	567
<i>A changing relation of thought to language</i>	568
<i>The cultural-context perspective</i>	569
Adolescent Thinking and the Social Order	574
Thinking about politics	574
<i>Reasoning processes</i>	574
<i>Social control</i>	575
<i>Political idealism</i>	575
Thinking about moral issues	577
<i>Sex differences in moral reasoning</i>	579
<i>Cultural variation in moral reasoning?</i>	581

Integration of the Self	582
The psychosexual resolution	583
Resolving the identity crisis	584
<i>Evaluating Erikson's ideas about identity</i>	586
<i>Sexual and cultural variation in identity formation</i>	589
The Transition to Adulthood	590
Is adolescence a distinctive stage of development?	591
Adolescence in modern societies	592
Looking ahead	593
BOX 17.1 Formal operations in a nonliterate culture	570
Summary	594
Key terms	595
Suggested readings	595
CHAPTER 18 DEVELOPMENT AND LATER LIFE	597
The discovery of adulthood	599
Theoretical approaches to adulthood and old age	600
The biological, social, and behavioral course of later life	602
<i>Biological change</i>	602
<i>Cognitive changes</i>	604
Social factors and later psychological change	606
<i>Variability in the social structuring of the life course</i>	609
<i>The influence of social factors on cognition and biology</i>	611
Decline or continuing development?	612
References	627
Sources of Photographs	675
Name Index	679
Subject Index	689
