<i>List of contributors</i>	<i>page</i> xi
<i>Series preface</i>	xvii
<i>Preface</i>	xxi
1 Historical aspects of mood and its disorders in young people	1
<i>William Ll. Parry-Jones</i>	
Introduction	1
Pre-nineteenth century	5
Nineteenth century	6
Twentieth century	12
Childhood suicide and its relation to depression	17
Treatment	19
Conclusions	19
References	21
2 Emotional behaviour and emotional understanding:	27
A developmental fugue	
<i>Mark Meerum Terwogt and Hedy Stegge</i>	
Introduction	27
The emotional process	28
The origin of knowledge about emotion	32
Knowledge and behaviour	35
Labelling emotions	37
Time-course of emotions and ambivalence	38
The subjective character of emotion: beliefs and desires	40
Social emotions: norms and values	42
Display-rules	45
Conclusions	46
References	48

Contents

3	The development of emotional regulation and emotional response	53
	<i>Elizabeth McCauley, Kim Kendall and Karen Pavlidis</i>	
	Introduction	53
	Family studies	54
	Temperament	55
	Attachment	57
	Self-schema and the nature of personality	67
	Adolescent challenges	71
	Conclusions	73
	References	74
4	Physiological processes and the development of childhood and adolescent depression	81
	<i>Jeanne Brooks-Gunn, Anne C. Petersen and Bruce E. Compas</i>	
	Introduction	81
	Continuity of rates of depression across age and gender	82
	Continuity in physiological bases of depression across developmental stages	83
	Physiological markers of depression	84
	Dysregulation in hypothalamic–endocrine systems	86
	Timing and sequencing of pubertal events	95
	Continuity in depression across generations: a physiological and environmental process	97
	Conclusions: physiological and environmental pathways to depression	99
	References	101
5	Childhood depression: Clinical phenomenology and classification	111
	<i>Israel Kolvin</i>	
	The concept of depression in childhood	111
	Depression as a symptom, syndrome or disorder	114
	Summary and conclusions	122
	References	123
6	The epidemiology of depression in children and adolescents	127
	<i>Adrian Angold and Elizabeth J. Costello</i>	
	Introduction	127
	Rates of depression in children and adolescents	128
	Depressive comorbidity	132
	Risk factors for depression	140
	Conclusions	143
	References	143

7	Family-genetic aspects of juvenile affective disorders	149
	<i>Michael Strober</i>	
	Introduction	149
	Family data in juvenile depression: prospects and caveats	150
	The offspring of affectively ill parents	152
	Psychiatric illness in adult relatives of affectively ill juveniles	161
	Early age-of-onset and familial aggregation	164
	Conclusions	166
	References	167
8	Life events and difficulties: Their nature and effects	171
	<i>Ian M. Goodyer</i>	
	Introduction	171
	The nature and characteristics of life experiences	172
	Life events and the onset of depression	174
	Events, onsets and outcome of depression – prospective studies	180
	Mechanisms and processes	183
	Resilience to adverse events and difficulties	189
	Conclusions	190
	References	191
9	Adolescent depression: Neuroendocrine aspects	195
	<i>Stan Kutcher and Stephen Sokolov</i>	
	Introduction	195
	Growth hormone	197
	Thyroid hormone	200
	Cortisol	204
	Melatonin	209
	Non-system specific challenge tests	213
	Other peripheral markers	213
	Conclusions	214
	References	215
10	Suicidal behaviour in adolescents	225
	<i>C. W. M. Kienhorst, E. J. de Wilde and R. F. W. Diekstra</i>	
	Introduction	225
	Epidemiology	226
	Correlates of suicidal behaviour	230
	Prevention	243
	Concluding remarks	244
	References	245
11	Psychopharmacology of depressive states in childhood and adolescence	253
	<i>Helmut Remschmidt and Eberhard Schulz</i>	
	Introduction	253

Contents

The evaluation of tricyclic antidepressants	254
Lithium salts in the treatment of young depressives	258
Alternative treatment strategies with serotonin-specific drugs	259
Psychopharmacological aspects of monoamine oxidase inhibition	263
Practical guide to antidepressant treatment	271
Conclusions	273
References	274
12 The psychotherapeutic management of major depressive and dysthymic disorders in childhood and adolescence: Issues and prospects	281
<i>Maria Kovacs and Leo J. Bastiaens</i>	
Introduction	281
Characteristics of major depressive and dysthymic disorders	283
Treatment approaches that have been tested	287
Empirical treatment-outcome studies	288
Current trends	293
Practical issues in the delivery of clinical services	294
Topics that require further attention	298
Conclusions	303
References	305
13 Longitudinal perspectives and affective disorder in children and adolescents	311
<i>Richard Harrington and Panos Vostanis</i>	
Introduction	311
Issues	312
Continuity and recurrence	317
Discontinuity and recovery	325
Course of early onset bipolar disorders	328
Prospects	329
Conclusions	333
References	334
<i>Index</i>	343
