

Contents

CHAPTERS

- 1 Introduction *1*
- 2 Methods of Assessment *20*
- 3 The Stability of Behavior: I Passivity and Dependency *49*
- 4 The Stability of Behavior: II Aggression *85*
- 5 The Stability of Behavior: III Achievement and Recognition *120*
- 6 The Stability of Behavior: IV Sexuality, Social Interaction, and Selected Behaviors *156*
- 7 Maternal Practices and the Child's Behavior *204*
- 8 Sources of Conflict and Anxiety *229*
- 9 Summary and Conclusions *266*
References *287*

APPENDICES

- 1 Inter-rater reliabilities for longitudinal variables *293*
- 2 Adult assessment: Interview schedule and question guide for interviewer *295*
- 3 Inter-rater reliabilities for interview variables *302*
- 4 Relation between childhood nurturance and adult behavior *304*
- 5 Relation between childhood fear of bodily harm and adult behavior *305*
- 6 Relation between childhood hyperkinesis and adult behavior *307*

- 7 Adult derivatives of childhood passivity and dependency 308
- 8 Adult derivatives of childhood aggression 309
- 9 Adult derivatives of childhood achievement 312
- 10 Correlations between maternal treatment and passive and dependent behaviors in the child 313
- 11 Correlations between maternal treatment and achievement behavior in the child 316
- 12 Correlations between maternal treatment and aggressive behavior in the child 320
- 13 Correlations between maternal treatment and child's behavior 325
- 14 Intercorrelations among average recognition thresholds for tachistoscopic scenes 330
- 15 Correlations between educational level of family and recognition thresholds for tachistoscopic scenes 331
- 16 The monologues used in autonomic assessment of conflict 332
- 17 Correlations between heart rate and conductance changes for alerting reaction and total reaction 335
- 18 Intercorrelations among conductance changes to the 12 stimulus conditions 336
- 19 Intercorrelations among heart rate changes to the 12 stimulus conditions 337
- 20 Intercorrelations among heart rate or conductance changes to the five monologues 338
- 21 Correlations between recognition threshold for aggressive scenes and aggressive behavior 339
- 22 Correlations between autonomic changes to aggressive monologues and aggressive variables 341
- 23 Correlations between recognition threshold for dependency scenes and dependent behavior 343
- 24 Correlations between recognition threshold for sex scenes and sexual behavior 344
- 25 Correlations between autonomic changes to the sex monologue and sex variables 345
- 26 Correlations between recognition threshold for physical harm scenes and adult and child behavior 346
- 27 Correlations between autonomic changes to physical harm monologue and adult and child behavior 347
- 28 Correlations between heart rate changes to stressors and behavioral variables 348
- 29 Correlations between palmar conductance changes to stressors and behavioral variables 349

- 30 Position identification: Correlations with adult and child behavior 350
- 31 Self-Rating Scale 352
- 32 Intercorrelations among child variables
- A — Period I 365
 - B — Period II 366
 - C — Period III 368
 - D — Period IV 370
- 33 Intercorrelations among interview variables 372
- Author Index 375
- Subject Index 379
