## FIGURES

	<i>Page</i>
1.1 A response-based model of stress	15
1.2 A stimulus-based model of stress	16
1.3 An interactive model of stress	17
2.1 The interactive nature of the symptoms of stress	22
2.2 The interactive nature of the symptoms of stress: an example related to teachers	22
2.3 Path model of teacher turnover intentions	34
3.1 A model of occupational stress	37
3.2 The underload/overload inverted 'U' hypothesis	43
3.3 Mean monthly stress perceived by secondary and elementary teachers and principals in Kamloops	44
5.1 Incidence of mental illness among school teachers	113
6.1 Sources of job pressure: male and female differences	140
6.2 Sources of job pressure: school type differences	141
6.3 Sources of job pressure: teaching grade differences	141
6.4 Sources of job pressure: Type A and Type B differences	142

## TABLES

	<i>Page</i>
3.1 Facets of the job stress–employee health research domain: the personal facet	62
4.1 Sex of teachers	87
4.2 Age distribution of teachers	87
4.3 Marital status of teachers	87
4.4 Working pattern of teachers' partners	87
4.5 Number and age of children	88
4.6 Region in which they teach	89

4.7	Type of school in which they teach	89
4.8	Area in which the schools are based	90
4.9	Sector in which the schools are based	91
4.10	Number of teaching staff and pupils in school	91
4.11	Level of education	92
4.12	Current job title	92
4.13	Length of time in teaching	93
4.14	Incentive allowance held	93
4.15	Style of contract	93
4.16	Responsibility for staff	94
4.17	Workload in school	94–5
4.18	Average hours spent working at home each week	96
4.19	Percentage of teachers who are Type A or Type B with subgroup percentages	97
5.1	Teacher job satisfaction as compared to other occupational groups	101
5.2	Job satisfaction: in order of most satisfaction	101
5.3	Job satisfaction: comparison of male and female teachers	101
5.4	Job satisfaction: comparison of Type A and Type B individuals	101
5.5	Job satisfaction: comparison of primary and secondary teachers	103
5.6	Job satisfaction: comparison of teachers at various grades	103
5.7	Smoking behaviour of teachers	103
5.8	Alcohol consumption of teachers	105
5.9	Drug-taking behaviour of teachers	106
5.10	Intention to leave the profession	106
5.11	Self-reported absence and illness	109
5.12	Major significant illnesses in the last 12 months	109
5.13	Percentage of teachers scoring as high as, or higher than, psychoneurotic outpatients	111
5.14	Mental ill health of teachers compared to other occupational groups	112
5.15	Comparison of our results with those of Kyriacou and Pratt (1985)	113
5.16	The most popular coping strategies used by teachers	115
5.17	Comparison of teachers' stress-coping strategies with OSI normative data	116
5.18	Comparison of teachers' stress-coping strategies with other occupational groups	116
5.19	Frequency of respondents' choice of social support	117
5.20	Sources of pressure in the teacher's job	117–21
6.1	Factor analysis of the sources of pressure in the job	124–5
6.2	Factor analysis of the Bortner scale	136

**x Illustrations**

6.3	Factor analysis of the OSI coping scale	138
6.4	Who are the vulnerable teachers?	143
6.5	Who are the vulnerable female teachers?	145
6.6	Who are the vulnerable male teachers?	147
6.7	Who are the vulnerable primary teachers?	148
6.8	Who are the vulnerable secondary teachers?	151
6.9	Who are the vulnerable senior teachers?	151
6.10	Who are the vulnerable middle managers?	152
6.11	Who are the vulnerable main-scale teachers?	153
7.1	Levels of stress management and outcomes	158
7.2	Stress management interventions recommended by teachers	161
A3.1	Sources of pressure: male and female teachers	204
A3.2	Sources of pressure: school type	204
A3.3	Sources of pressure: teaching grade	205
A3.4	Sources of pressure: type A ( $A_1$ ) and type B ( $A_3$ )	206
