Preface by *Günter Blöschl, Nick van de Giesen, D. Muralidharan, Liliang Ren, Frédérique Seyler, Uttam Sharma & Jaroslav Vrba* v

Keynote Paper 1

Managing aquifer recharge and discharge to sustain irrigation livelihoods under water scarcity and climate change *Peter Dillon, Ian Gale, Samuel Contreras, Paul Pavelic, Richard Evans & John Ward*

1 Water Resources Availability

Simulation of the proportion and interaction of surface and groundwater resources *Josef Buchtele & Miroslav Tesar* 15

Groundwater development in Fergana Valley: the adaptation strategy for changed water management in Syrdarya basin *Akmal Karimov, Aslon Mavlonov, Vladimir Smakhtin, Hugh Turral & Gracheva Inna* 22

Tank management in Andhra Pradesh, India: percolation *versus* irrigation *Jérôme Perrin, Cédric Mascré, Sylvain Massuel & Shakeel Ahmed* 28

Modelling of the urban water cycle and the consequences of massive rain runoff infiltration for Copenhagen *Jan Jeppesen & Steen Christensen* 34

Assessment of managed aquifer recharge to improve the security of urban water supply in western NSW, Australia *C. M. Jewell, D. V. Egelton & C. B. Wicenciak* 42

The evaluation of groundwater environmental restoration by artificial recharge in Pingtung Plain, Taiwan *Yung-Chang Tu, Hsin-Tien Tsai & Cheh-Shyh Ting* 50

2 Water for Food

Impact of irrigation intensification on inter-sectoral water allocation in a deficit catchment in India *T. V. Reshmidevi & Shrinivas Badiger* 61

Adaptive surface and groundwater management for vulnerable hydro-ecosystems in the northeastern region of India *U. C. Sharma & Vikas Sharma* 69

Groundwater externalities of large, surface irrigation transfers: insights from the Godavari–Krishna river link, India *Bharat R. Sharma, Sylvain Massuel, K. V. G. K. Rao & Jean-Philippe Venot* 76

Modelling water resources in the Sana'a basin, Yemen, using a WEAP model *Abdulla Noaman & Chris Swartz* 84

Quantitative analysis of ecological protection objectives in the Yellow River basin *Yan Cai, Hui-Xiao Wang, Che-Sheng Zhan, Jing-Shan Yu & Yunhui Guo* 90

Indirect water management: how we all can participate *Peter Bayer, Stephan Pfister & Stefanie Hellweg* 98

3 Water Quality

- Studies on the quality of the waters of Morocco and training in environmental geochemistry *Mohamed El Wartiti, Tarik Bahaj, Naima Saddiki, Amina Malaki & Rafeale Cabo* 105
- Water resources challenges in Nigeria: pathways to water security and sustainability *Ifeyinwa C. Okeke & Lekan Oyebande* 113
- Integrated water resources management of the Idemili River and Odo River drainage basins, Nigeria *E. I. Okoro, B. C. E. Egboka, O. L. Anike & A. G. Onwuemesi* 117
- Hydrological characterization and groundwater resource studies in coastal areas: Sagar Island region, West Bengal, India *Ranjit Kumar Majumdar & Debabrata Das* 123
- Impact of land-use change on groundwater quality in the Indo-Gangetic Plains, India *S. C. Rai & Anupama Dubey* 130
- Impacts of land use on groundwater quality in Western Australia *Priyantha Ranjan Sarukkalgige* 136
- Dissolved nitrogen removal in the ponded streams of an alluvial, suburban basin with a developing city, western Japan *Yuta Shimizu, Shin-Ich Onodera, Mitsuyo Saito, Yasuyuki Hirayama & Hidehiro Takahashi* 143
- River-mouth dam effect on integrated management of a coastal water resource in a Seto Inland Sea watershed, Western Japan *Mitsuyo Saito, Shin-Ichi Onodera, Misa Sawano, Yuta Shimizu, Hidehiro Takahashi & Masato Fukuoka* 150
- A laboratory model of the evolution of an island freshwater lens *Zhao Jun, Wen Zhong Hui, Shu Long Cang, Zhen Li, Zhou Cong Zhi & Liu Li Hong* 154

4 Floods and Droughts

- Groundwater flooding in fractured permeable aquifers *Andrew Ireson, Adrian Butler & Alex Gallagher* 165
- Assessing the influence of drought on vegetation vigour within the Laohahe catchment, China, by NDVI and PDSI indices *Xiaofan Liu, Liliang Ren, Fei Yuan, Bo Lu, Jing Xu & Bang Yang* 173
- Application of a fuzzy comprehensive model for drought assessment: Jinan City, China, case study *Wei Liu, Liliang Ren & Shengle Cao* 181
- Integrated water resources management in the vulnerable Indian environment *R. B. Singh* 187

5 Change Assessment and Management

- Impact of human activities on the flow regime of the Hanjiang *Guobin Lu, Jun Wang, Jianhua Zhao & Meixiu Yu* 197
- Impact of the Three Gorges Reservoir operation on the downstream ecological water use *Hongjie Wang, Jun Wang, Jianhua Zhao, Zhenhua Zou, Guobin Lu, Xue Bai & Qiongfang Li* 203

Effects of the South–North Water Transfer Project on surface water and groundwater resources in Haihe River basin in a climate changing world <i>Wang Rui, Xia Jun, Zhu Xinjun, Wang Zhonggen, Li Lu & Dejuan Meng</i>	210
Changes in the reliance on groundwater <i>versus</i> surface water resources in Asian cities <i>Makoto Taniguchi, Akihisa Yoshikoshi, Shinji Kaneco, Somkid Buapeng, Robert Delinom, Fernando Siringan, Chung-Ho Wang, Backjin Lee, Yohei Shiraki, Takahiro Endo & Akio Yamashita</i>	218
Caractérisation du ruissellement et de l'érosion de la parcelle au bassin versant en zone sahélienne: cas du petit bassin versant de Tougou au nord du Burkina Faso / Characterisation of runoff and soil water erosion at the plot and catchment scale in the Sahel: Tougou catchment case study, northern Burkino Faso <i>Harouna Karambiri, Hama Yacouba, Bruno Barbier, Gil Mahé & Jean-Emmanuel Paturel</i>	225
Retreating snowpacks under climate change: implications for water resources management in the Austrian Alps <i>Davy Vanham & Wolfgang Rauch</i>	231
Hydrological modelling and possible climate change impacts in a wetland system: the case of the Okavango Delta, Botswana <i>B. F. Alemaw</i>	239
Examples of possible water management measures for elimination of climate change impacts on water resources <i>Oldřich Novický, Magdalena Mrkvíčková & Ladislav Kašpárek</i>	247
Use of high resolution climate change data to simulate hydrological change at the small catchment scale <i>Georg Hörmann, Anna Luisa Renken & Nicola Fohrer</i>	254

6 Monitoring and Optimisation

Monitoring groundwater variability from space: the GRACE satellite gravity mission <i>John Wahr, Virendra M. Tiwari & Sean Swenson</i>	263
Vegetation phenology to partition groundwater- from surface-water-irrigated areas using MODIS 250-m time-series data for the Krishna River basin <i>M. K. Gumma, P. S. Thenkabail & N. M. Velpuri</i>	271
New perspectives in monitoring water resources in large tropical transboundary basins based on satellite imagery and radar altimetry <i>Frédérique Seyler, Stéphane Calmant, Joecila da Silva, Juan-Gabriel Leon, Frédéric Frappart, Marie-Paule Bonnet, Naziano Filizola, Emmanuel Roux, Gérard Cochonneau, Ana-Carolina Zoppas Costi, Eurides de Oliveira, Jean-Loup Guyot & Patrick Seyler</i>	282
Representation of uncertainties in spatial modelling of decision processes in integrated water resources management <i>Ana Cristina S. Silva, Carlos O. Galvao, Iana A. A. Rufino, Janiro C. Rego & J. Patrocinio Tomaz Albuquerque</i>	289
Optimal real-time management of an integrated water resources system by ANN-based hedging rules <i>Camilo Allyson Simões De Farias, Alcigeimes B. Celeste, Koichi Suzuki & Akihiro Kadota</i>	295
Integrated approaches for water resources management: examples from France <i>Sandra Lanini & Didier Pennequin</i>	303
Fuzzy group decision making and its application in water resource planning and management <i>Hojjat Mianabadi & Abbas Afshar</i>	311

Application of GA-based TOPSIS optimization schemes for dynamic control of reservoir water levels <i>Guo Yan, Liang Zhongmin & Li Lei</i>	319
---	-----

7 Integrating Water Resources Management

Managing the competing water demands from off-stream and in-stream users—a conceptual framework <i>Md. Reaz A. Mullick, Mukand S. Babel & Sylvain R. Perret</i>	327
On the relationship between water demand management and integrated water resources management in China <i>Xinju Zhang, Boming Luo & Lu Lu</i>	334
Water demand management instead of water supply management: a case study of Yulin City in northwestern China <i>Wang Xiao-jun, Zhang Jian-yun, Liu Jiu-fu, Wang Guo-qing, He Rui-min, Wang Yan-can, Zhang Ming & Liu Cui-shan</i>	340
Economic assessment of differential-quality water demands from a metropolis and its peri-urban environments <i>Venkatesh Dutta</i>	347
Assessing water allocation strategies in the Krishna River basin, South India <i>Luna Bharati, B. K. Anand, Kaushal Garg & Sreedhar Acharya</i>	354
Integrated surface water and groundwater resources management in Makueni District, Kenya <i>Shadrack M. Kithiia</i>	362
Managing space for water in regional integrated water resources planning in China <i>Hui Xu & Cen Cui</i>	368
