

# Contents

|          |   |    |
|----------|---|----|
| <b>1</b> | <b>Introduction and Summary</b>                       | 1  |
| 1.1      | Introduction  | 1  |
| 1.2      | Preliminary Examples                                  | 1  |
| 1.3      | Summary of the Following Chapters                     | 6  |
| <b>2</b> | <b>Continuous-Time Markov Decision Processes</b>      | 9  |
| 2.1      | Introduction  | 9  |
| 2.2      | The Control Model                                     | 10 |
| 2.3      | Continuous-Time Markov Decision Processes             | 13 |
| 2.4      | Basic Optimality Criteria                             | 16 |
| <b>3</b> | <b>Average Optimality for Finite Models</b>           | 19 |
| 3.1      | Introduction  | 19 |
| 3.2      | $n$ -bias Optimality Criteria                         | 20 |
| 3.3      | Difference Formulas of $n$ -biases                    | 23 |
| 3.4      | Characterization of $n$ -bias Policies                | 29 |
| 3.5      | Computation of $n$ -bias Optimal Policies             | 36 |
| 3.5.1    | The Policy Iteration Algorithm for Average Optimality | 36 |
| 3.5.2    | The 0-bias Policy Iteration Algorithm                 | 39 |
| 3.5.3    | $n$ -bias Policy Iteration Algorithms                 | 43 |
| 3.6      | The Linear Programming Approach                       | 46 |
| 3.6.1    | Linear Programming for Ergodic Models                 | 46 |
| 3.6.2    | Linear Programming for Multichain Models              | 49 |
| 3.7      | Notes   | 52 |
| <b>4</b> | <b>Discount Optimality for Nonnegative Costs</b>      | 55 |
| 4.1      | Introduction  | 55 |
| 4.2      | The Nonnegative Model                                 | 55 |
| 4.3      | Preliminaries   | 56 |
| 4.4      | The Discounted Cost Optimality Equation               | 60 |
| 4.5      | Existence of Optimal Policies                         | 63 |
| 4.6      | Approximation Results                                 | 63 |

|           |  |            |
|-----------|--|------------|
| 4.7       | The Policy Iteration Approach . . . . .                    | 66         |
| 4.8       | Examples . . . . .   | 68         |
| 4.9       | Notes . . . . .  | 69         |
| <b>5</b>  | <b>Average Optimality for Nonnegative Costs . . . . .</b>  | <b>71</b>  |
| 5.1       | Introduction . . . . .                                     | 71         |
| 5.2       | The Average-Cost Criterion . . . . .                       | 72         |
| 5.3       | The Minimum Nonnegative Solution Approach . . . . .        | 73         |
| 5.4       | The Average-Cost Optimality Inequality . . . . .           | 76         |
| 5.5       | The Average-Cost Optimality Equation . . . . .             | 80         |
| 5.6       | Examples . . . . .   | 81         |
| 5.7       | Notes . . . . .  | 84         |
| <b>6</b>  | <b>Discount Optimality for Unbounded Rewards . . . . .</b> | <b>87</b>  |
| 6.1       | Introduction . . . . .                                     | 87         |
| 6.2       | The Discounted-Reward Optimality Equation . . . . .        | 89         |
| 6.3       | Discount Optimal Stationary Policies . . . . .             | 95         |
| 6.4       | A Value Iteration Algorithm . . . . .                      | 98         |
| 6.5       | Examples . . . . .   | 98         |
| 6.6       | Notes . . . . .  | 102        |
| <b>7</b>  | <b>Average Optimality for Unbounded Rewards . . . . .</b>  | <b>105</b> |
| 7.1       | Introduction . . . . .                                     | 105        |
| 7.2       | Exponential Ergodicity Conditions . . . . .                | 106        |
| 7.3       | The Existence of AR Optimal Policies . . . . .             | 109        |
| 7.4       | The Policy Iteration Algorithm . . . . .                   | 113        |
| 7.5       | Examples . . . . .   | 119        |
| 7.6       | Notes . . . . .  | 124        |
| <b>8</b>  | <b>Average Optimality for Pathwise Rewards . . . . .</b>   | <b>127</b> |
| 8.1       | Introduction . . . . .                                     | 127        |
| 8.2       | The Optimal Control Problem . . . . .                      | 129        |
| 8.3       | Optimality Conditions and Preliminaries . . . . .          | 129        |
| 8.4       | The Existence of PAR Optimal Policies . . . . .            | 131        |
| 8.5       | Policy and Value Iteration Algorithms . . . . .            | 138        |
| 8.6       | An Example . . . . .                                       | 139        |
| 8.7       | Notes . . . . .  | 142        |
| <b>9</b>  | <b>Advanced Optimality Criteria . . . . .</b>              | <b>143</b> |
| 9.1       | Bias and Weakly Overtaking Optimality . . . . .            | 143        |
| 9.2       | Sensitive Discount Optimality . . . . .                    | 147        |
| 9.3       | Blackwell Optimality . . . . .                             | 159        |
| 9.4       | Notes . . . . .  | 160        |
| <b>10</b> | <b>Variance Minimization . . . . .</b>                     | <b>163</b> |
| 10.1      | Introduction . . . . .                                     | 163        |

- 10.2 Preliminaries . . . . . 164
- 10.3 Computation of the Average Variance . . . . . 164
- 10.4 Variance Minimization . . . . . 170
- 10.5 Examples . . . . . 171
- 10.6 Notes . . . . . 173
  
- 11 Constrained Optimality for Discount Criteria . . . . . 175**
  - 11.1 The Model with a Constraint . . . . . 175
  - 11.2 Preliminaries . . . . . 177
  - 11.3 Proof of Theorem 11.4 . . . . . 182
  - 11.4 An Example . . . . . 184
  - 11.5 Notes . . . . . 186
  
- 12 Constrained Optimality for Average Criteria . . . . . 187**
  - 12.1 Average Optimality with a Constraint . . . . . 187
  - 12.2 Preliminaries . . . . . 188
  - 12.3 Proof of Theorem 12.4 . . . . . 192
  - 12.4 An Example . . . . . 192
  - 12.5 Notes . . . . . 194
  
- A . . . . . 195**
  - A.1 Limit Theorems . . . . . 195
  - A.2 Results from Measure Theory . . . . . 197
  
- B . . . . . 203**
  - B.1 Continuous-Time Markov Chains . . . . . 203
  - B.2 Stationary Distributions and Ergodicity . . . . . 206
  
- C . . . . . 209**
  - C.1 The Construction of Transition Functions . . . . . 209
  - C.2 Ergodicity Based on the  $Q$ -Matrix . . . . . 214
  - C.3 Dynkin's Formula . . . . . 218
