

CONTENTS

Chapter 1

THE GENETICS OF SOCIAL BEHAVIOR

Benson E. Ginsburg

I. Introduction	1
II. The Genetic Roulette Wheel	3
III. The Tender Trap of Adaptation	4
IV. The Problem of Homogeneity	7
V. Nonrandom Sampling of Restricted Gene Pools	8
VI. The Evolutionary Advantages of Social Behavior	9
VII. Acknowledgments	13
VIII. References	13

Chapter 2

THE ECOLOGICAL SIGNIFICANCE OF BEHAVIORAL DOMINANCE

Sidney A. Gauthreaux, Jr.

I. Introduction	17
II. Historical Considerations	18
III. Behavioral Dominance as a Natural Regulatory System	21
IV. The Dominance-Dispersal Model	27
V. Supportive Data and Discussion	30
VI. Summary	38
VII. Acknowledgments	39
VIII. References	39

*Chapter 3***HOW DOES BEHAVIOR DEVELOP?****P. P. G. Bateson**

I. Abstract	55
II. Introduction	55
III. Discontinuities in Development	58
IV. Explanations for Discontinuities	60
A. Reduction in Variability	60
B. Changes in Relationship	60
C. Separate Determination of Timing	61
D. Self-Stabilization	61
E. Lack of Equivalence in Behavior	62
F. Change in Control	63
G. New Sources of Variation	63
V. Conclusion	65
VI. Acknowledgments	66
VII. References	66

*Chapter 4***CONTINUITY AND STAGE IN HUMAN DEVELOPMENT****Jerome Kagan**

I. The Meanings of Continuity	67
II. Continuity in Stage Theory	70
III. The Historical Bases for Faith in Continuity	72
A. Evolutionary Theory and Infant Determinism	74
IV. Evidence for Continuity in Human Development	75
A. Some Recent Data	77
B. A Suggested Interpretation	77
C. Summary	82
V. Acknowledgments	83
VI. References	84

*Chapter 5***FEEDING BEHAVIOR OF *LEMUR CATT* IN DIFFERENT HABITATS****Norman Budnitz**

I. Introduction	85
II. Description of the Habitat	87
A. Location	87

B.	Vegetation Types	88
C.	Statistical Vegetation Analysis—Ordination	90
D.	Plant-Species Diversity	92
III.	Lemur Behavior	95
A.	Population Structure and Home Ranges	95
B.	Eating and Searching Behavior	97
C.	Activity Rhythms	100
D.	Use of Forest Levels	100
E.	Day Ranges	100
F.	Use of <i>Tamarindus indica</i>	101
G.	Feeding Behavior—Total Feeding Time	102
IV.	Discussion	105
V.	Acknowledgments	107
VI.	References	107

Chapter 6

STATUS AND HIERARCHY IN NONHUMAN PRIMATE SOCIETIES

Ted D. Wade

I.	Definitions	109
II.	A Straw-Man Theory	110
III.	Triadic Processes—One Alternative	113
IV.	Is Dominance Natural?	115
V.	Dominance or Subordination?	118
VI.	Stress, Status, and Learning	122
VII.	Questions of Function	124
VIII.	Hierarchy Formation and Mathematics	126
IX.	Summary	130
X.	Acknowledgments	131
XI.	References	131

Chapter 7

HIDDEN REGULATORY PROCESSES IN EARLY SOCIAL RELATIONSHIPS

Myron A. Hofer

I.	Abstract	135
II.	Introduction	135
III.	Olfactory Processes Regulating the Mother–Infant Interaction	139

A.	Maternal Behavior	139
B.	Infant Behavior	140
IV.	Regulation of the Infants' Autonomic Function by the Mothers' Milk	142
V.	Infant Behavioral Arousal	145
A.	Thermal Influences	146
B.	Tactile Stimulation	147
C.	Olfactory Stimulation	151
D.	Vestibular Stimulation	152
VI.	Regulation of Rhythmic Functions of the Infant	154
VII.	Implications for Infant Development	157
A.	Toward Understanding the Responses to Early Mother- Infant Separation	157
B.	Developmental Outcome	160
VIII.	References	163

Chapter 8

SOCIAL BEHAVIOR ON ISLANDS

Robert A. Wallace

I.	Introduction	167
II.	Behaving in the Caribbean	168
III.	Island Influences on Biota	170
IV.	Behavioral Traits of Colonizers	173
V.	The Effect of Wide Niches on Behavior	175
VI.	Aggression on Islands	177
VII.	The Behavioral Effects of Increased Numbers on Islands	178
VIII.	The Relative Social Effects of Competition and Predation on Islands	180
IX.	Multiple Invasions, Populations, and Niche Size	181
X.	Shallow Island Niches	182
XI.	Behavioral Correlates of Niche Broadening	183
A.	Range Expansion	183
B.	Habitat Expansion	183
C.	Increase in Variation	185
D.	Increase in Sexual Dimorphism	187
E.	Increase in Size	192
XII.	Summary	198
XIII.	References	199

Chapter 9

**ON PREDATION, COMPETITION, AND THE
ADVANTAGES OF GROUP LIVING**

Daniel I. Rubenstein

- I. Abstract 205
- II. Introduction 206
- III. The Major Selective Forces 206
- IV. Predation and Resource Competition: Influences of
Environment, Individuals, and Species 208
 - A. Predation 208
 - B. Resource Competition 211
- V. Predation and Resource Competition: Their Combined Action 214
 - A. Games against Nature 214
 - B. Social Games 217
- VI. Discussion and Conclusions 227
- VII. Acknowledgments 229
- VIII. Appendix—Glossary of Terms 229
- IX. References 230

Chapter 10

IS HISTORY A CONSEQUENCE OF EVOLUTION?

L. B. Slobodkin

- I. Abstract 233
- II. Introduction 233
- III. Causality in Evolution and History 240
- IV. Evolution Considered as an Existential Game 243
- V. The Peculiar Evolutionary Strategy of Man 246
- VI. Residual Evolutionary Problems 251
- VII. Acknowledgments 253
- VIII. References 254

- INDEX 257**
