Preface ix

1.	INTRODUCTION	1
	The Nature and Determinants of Motivated Behaviors 3	
	Factors that Initiate and Influence Motivated Behavior 7	
	Differential Contributions of Factors and Determinants of Motivated Behaviors 13	
	Ontogeny of Motivated Behaviors 14	
	The Neural Substrates of Behavior 15	
	Summary 23	
2.	BIOLOGICAL FOUNDATIONS, EXPERIMENTAL STRATEGIES, AND TECHNIQUES FOR THE STUDY OF MOTIVATED BEHAVIORS	25
	Biological Foundations 26	
	Research Strategies and Experimental Techniques for the Study of the Neural Substrates of Motivated Behaviors 41	
	Summary 57	
3.	THERMOREGULATORY BEHAVIOR	58
	Body-Temperature Regulation 59	

	Characteristics of Thermoregulatory Behavior	66	
	Factors that Contribute to Thermoregulatory Behavior	67	
	Ontogeny of Thermoregulatory Behaviors	72	
	Neural Integrative Systems Subservicing Physiological and Behavioral Thermoregulatory Responses	74	
	Summary	84	
4.	FEEDING BEHAVIOR		86
	Characteristics of Feeding Behavior	86	
	Food Intake and Body-Energy Homeostasis	87	
	Factors that Initiate and Contribute to Feeding Behavior	93	
	Ontogeny of Feeding Behavior	99	
	Neural Substrates of Feeding Behavior	100	
	Summary	118	
5.	DRINKING BEHAVIOR		121
	Characteristics of Drinking Behavior	120	
	Water Intake and Water Balance	122	
	Factors that Initiate and Contribute to Drinking Behavior	127	
	Ontogeny of Drinking Behavior	135	
	Neural Substrates of Drinking Behavior	137	
	Summary	149	
6.	SEXUAL BEHAVIOR <i>by Boris Gorzalka and Gordon Mogenson</i>		151
	Characteristics of Sexual Behavior	151	
	Factors that Influence and Determine Sexual Behavior	152	
	Ontogeny of Sexual Behavior	158	
	Hormonal Determinants of Sexual Behavior	163	
	Neural Determinants of Sexual Behavior	169	
	Future Directions of Research	180	
	Summary	184	
7.	SLEEP AND WAKING		187
	Characteristics of Sleep	188	
	Ontogeny of Sleep	194	

	Factors that Influence Sleep and Waking	197
	The Neural Substrates of Sleep and Waking	202
	Summary	210
8.	BRAIN SELF-STIMULATION BEHAVIOR	
	<i>by E. T. Rolls and G. J. Mogenson</i>	212
	Characteristics of Brain Self-Stimulation	214
	Factors that Influence Brain Self-Stimulation	217
	The Neural Basis of Brain-Stimulation	
	Reward	221
	Summary	235
9.	EMOTIONAL BEHAVIORS	237
	Characteristics of Emotional Behavior	237
	Factors that Contribute to Emotional Behavior	241
	The Neural Substrates of Emotional Behaviors	249
	Neural Substrates of Abnormal Behavior and Psychiatric Disorders	258
	Summary	264
	Appendix A	265
10.	PROBLEMS AND STRATEGIES FOR FUTURE RESEARCH	269
	Problems of Measurement and of Experimental Techniques	270
	The Problem of Nonspecificity of Experimental Manipulations of the CNS	271
	The Virtues and Limitations of Theoretical Models	274
	The Hypothalamus and Motivated Behavior: Current Status	276
	Current and Future Developments	279
	References	282
	Glossary	312
	Author Index	317
	Subject Index	327
