List of Tables

Table		Page
5.1	Definitions of Kohlberg's stages of moral development	27
	0 Sources used in reconstructing the definitions	27
	1 Basis of moral judgment – **Level I**	28
	2 Stage of development – **Stage 1**	29
	3 Stage of development – **Stage 2**	30
	4 Basis of moral judgment – **Level II**	32
	5 Stage of development – **Stage 3**	33
	6 Stage of development – **Stage 4**	35
	7 Basis of moral judgment – **Level III**	37
	8 Stage of development – **Stage 5**	38
	9 Stage of development – **Stage 6**	41
5.2	Reliability estimates of Kohlberg's Moral Judgment Scale	44
5.3	Correlational evidence regarding the validity of Kohlberg's Moral Judgment Scale	45
6.1	The design of Kohlberg's 20-year longitudinal study	49
6.2	Analysis of variance for two cohorts and three ages computed on raw data in Kohlberg's 20-year longitudinal study	49
6.3	Summary of tests of log-linear models applied to data from Kramer (1968) and Holstein (1976)	50
6.4	Estimated interaction terms of the final model	51
6.5	Three-dimensional transition matrix of change in Modal Global Stage of moral reasoning at five test-retest intervals, analyzed from raw data in Kohlberg's 20-year longitudinal study	54
6.6	Transition matrix of change over one-year period for 49 preschool through second-grade children studied by Kuhn (1976)	55
6.7	Transition matrixes of change in Modal Global Stage for Holstein's (1976) adolescent longitudinal subjects	56
6.8	Transition matrixes of change in Modal Global Stage for Kramer's (1968) longitudinal subjects	56

Table **Page**

6.9 Transition matrixes of change in Modal Global Stage for Holstein's (1976) adult longitudinal subjects 57

6.10 Transition matrix of change in moral judgment scores of the control groups in Colby et al. (1976/77) 57

6.11 Summary of true longitudinal studies testing the sequentiality hypothesis 59

6.12 Summary of tests of the hypothesis of equal probability of progression and regression in Modal Global Stage of subjects classified as lower stage (Stage 1–4) at first testing 60

6.13 Summary of goodness of fit test statistics for data from Table 6.6 under various models 61

6.14 Expected values for data from Table 6.6 under the final model 62

6.15 Transition matrix of change over a three year period in Modal Global Stage among lower stage adolescents (Stage 1–4) studied by Kramer (1968) and Holstein (1976) combined 62

6.16 Summary of stages found in various cultures in various age groups studied 64

6.17 Summary of tests 65

6.18 Estimated interaction terms of the final model 65

6.19 The IEA data sets used 69

6.20 IEA scales and items used in the present study 70

6.21 Theory-oriented item analysis of four IEA items 71

6.22 Psychometric properties of 14 moral development scales 73

6.23 Ranges of correlations between moral development scales and scales of political attitudes 77

6.24 Summary of tests of significance of differences between category boundaries of groups. Age groups compared: 10;0–10;5 and 10;6–10;11 78

6.25 Summary of tests of significance of differences between category boundaries of groups. Age groups compared: 14;0–14;5 and 14;6–14;11 79

6.26 Summary of tests of significance of differences between category boundaries of groups. Age groups compared: 10;6–10;11 and 14;0–14;5 80

6.27 Order of difficulty—"horizontal decalages"—between four items at two cutting points 83

List of Figures

Figure		Page
6.1	Schematic printer plot for the variable Stage at six ages, computed from raw data in Kohlberg's 20-year longitudinal study	53
6.2	Holstein's (1976) hypothesized developmental sequence of male and female dominance	81
