Preface *v*

Acknowledgments *ix*

Chapter 1
Introduction *1*

Overview 2
Why Study Cognition? 2
The Concept of Cognition 4
Scientific Revolutions 5
The Period of the Cognitive Revolution 7
The Period of the Life-Span Revolution 12
Cognitive Development in a Life-Span Context 15

Cognitive Development as a Continual Change Process, 16
Cognitive Development as an Interaction of Person and Context, 16
Cognitive Development as a Multidirectional and Multiply Determined Process, 17

Summary 19

Key Terms, 20 Suggested Readings, 21

Chapter 2
Theories and Methods in the Study of Cognitive Development 22
Overview 23
Various Psychological Theories 24
Organismic Developmental Approaches 25
The Impact of Piaget, 27 Overview of Piaget's Theory, 29 Stages of Development, 33 Werner's Theory, 38
Information-Processing Approaches 40
Other Theoretical Approaches 49
Behavioristic Theories, 49 Contextualistic Theories, 53
Theoretical Descriptions of Cognitive Change 56
Structural versus Behavioral Change, 56 Qualitative versus Quantitative Change, 57 Continuous versus Discontinuous Change, 58 Universal versus Nonuniversal Change, 59
Nature, Nurture, and Cognitive Development 59
The Nature-Nurture Controversy, 59 Alternatives to the Nature-Nurture Controversy, 64 Critical Periods and Cognitive Development, 65
Current Methods in Cognitive Developmental Research 66
Research Designs, 66 Sample Selection and Measurement Equivalence, 70 Contextual Validity, 72
Summary 73
Key Terms, 74 Suggested Readings, 74

Chapter 3
Perceptual and Attentional Development 76
Overview 77
Some Questions about Perception 77
Definition of Perception 78
Nature-Nurture Revisited 79
Empiricism, 79 Nativism, 79
Theories of Perceptual Development 80
Piaget's Constructivist Position, 80 Gibson's Differentiation Position, 81 Neisser's Perceptual Cycle Model, 84

Life-Span Changes in Basic Sensory Processes 88

Vision, 89 Practical Implications of Visual Changes, 91 Audition, 91 Touch, Taste, and Smell, 94 Sensory Coordination, 95 Illusions, 100

The Selective Nature of Perception 102

Attention in Young Infants, 103 Attentional Changes in Children and Adults, 106 Perceptual Salience, 107

Automatic Processes and the Limits of Attention 109

Divided Attention, 112 Automaticity, 115

Attention and Arousal 117

Individual Differences in Perception and Attention 119

Field Dependence and Field Independence, 119 Reflectivity and Impulsivity, 121 Categorization and Conceptualization Styles, 123

Summary 124

Key Terms, 126 Suggested Readings, 126

Chapter 4

Spatial Cognition and Imagery ***128***

Overview 129

Different Conceptions of Space 129

Absolute versus Relative Space, 130 Euclidean versus Non-Euclidean Space, 131 Practical versus Representational Space, 131 The Origins of Spatial Concepts, 132

Spatial Organization in Infants 133

Head and Eye Orientation, 133 Depth Perception, 134 Object Constancy, 137 Object Concept, 138

Spatial Representation 144

Mental Imagery, 145 Mental Rotation, 149 Analogical and Propositional Representation, 153 Cognitive Mapping, 154 Small-Scale and Large-Scale Space, 158

Spatial Reference Systems 160

Spatial Egocentrism, 163 Everyday Spatial Behavior, 166

Individual Differences in Spatial Ability 167
Sex Differences in Spatial Ability, 167 Cross-Cultural Differences in Spatial Ability, 171

Summary 172
Key Terms, 173 Suggested Readings, 173

Chapter 5
Language Development ***175***
Overview 176
The Study of Human Language 176
Language and Communication 178
Intentional Communication, 179 Egocentric Communication, 181

Language and Cognition 185
Lev Vygotsky, 185 Benjamin Whorf, 187 Jean Piaget, 188 Language and Cognition Reconsidered, 190

Describing Language Development 191
Phonological Development 191
Syntactical and Semantic Development 194
First Words and Sentences 195
Ages 2–5 198
Later Developments 202

Explaining Language Development 209
Learning Theories, 209 Biological Theories, 211 Cognitive Theories, 215 Toward an Interactional Synthesis, 217

Individual and Group Factors Influencing Language 221
Sex Differences, 222 Bilingualism, 223 Black English, 224

Summary 225
Key Terms, 226 Suggested Readings, 227

Chapter 6
Memory Development ***228***
Overview 229
Some Uses of Memory 230
Models of Memory 233
Organismic Models, 233 Information-Processing Models, 236

Other Models of Memory 238
Behavioristic Models, 238 Contextualistic Models, 241

Some Structural Features of Memory 243
Sensory Register, 243 Short-Term Store and Long-Term Store, 247 Developmental Changes in Memory Strategies, 253 Encoding, Storage, and Retrieval, 255 Episodic and Semantic Memory, 257 Levels of Processing, 264 Automatic and Effortful Processing, 267

Remote Memory 268
Metamemory 270
Memory, the Individual, and Society 275
Summary 277
Key Terms, 278 Suggested Readings, 279

Chapter 7
Problem Solving and Creativity ***281***
Overview 282
A Sample Problem 282
Definitions and Distinctions 283
Problem Solving, 283 Creativity, 285

Theories of Problem Solving 285
Gestalt Theory, 286 Information Processing, 288

Piagetian Research 294
Conservation, 294 Class Inclusion and Multiple Classification, 300 Seriation and Transitive Inference, 301

Extending Piagetian Research across the Life Span 305
Traditional Problem-Solving Tasks 306
Concept Learning, 306 Verbal Search, 314

Creativity 316
Creative Persons, 318 Creative Products, 320 Creative Processes, 324

Measurement of Creativity 326
Problems in Measuring Creativity, 327 Changes in Creativity across the Life Span, 327 Developmental Theory of Creativity, 329

Summary 330
Key Terms, 331 Suggested Readings, 331

Chapter 8
Intellectual Development and Complex Thinking Processes ***333***
Overview 334
Definitions of Intelligence 334
Psychometric Models of Intelligence 338
Binet and the First Intelligence Test, 339 Spearman's "G", 344 The Structure-of-Intellect Model, 345 The Fluid-Crystallized Model of Intelligence, 346 The Age Differentiation–Dedifferentiation Hypothesis, 350

Intellectual Development Over the Life Span 354
Intelligence in Infancy, 354 Intelligence in Childhood and Adolescence, 356 Intelligence in Adulthood, 363 Individual Differences in Intelligence in Adulthood, 366

Complex Thinking Processes 376
Formal Operations, 376 Age and Formal Operations, 381 Beyond Formal Operations, 382 Wisdom and Development, 385

Summary 386
Key Terms, 388 Suggested Readings, 388

Chapter 9
Social Cognitive Development ***390***
Overview 391
The Importance of Social Cognition 391
Social and Nonsocial Cognition 393
Models of Social Cognitive Development 394
Conceptions of Self 396
Search for Identity, 399 Self-Concept in Adulthood, 399

Conceptions of Others 402
Person Perception, 402 Perceptions of Aging Persons, 405 Egocentrism and Self-Other Differentiation, 406

Role Taking 408
Development of Role-Taking Skills, 409 Role Taking as a Problem-Solving Skill, 413

Moral Development and Moral Behavior 415

Moral Judgment, 418 Kohlberg's Stage Model of Moral Reasoning, 420 Moral Reasoning beyond Adolescence, 425

Relations of Social Cognition to Social Behavior 428
Toward Development of the Whole Person 430
Summary 432

Key Terms, 434 Suggested Readings, 434

Chapter 10
Intervention in Cognitive Development ***436***

Overview 437
The Concept of Intervention 437
Types of Intervention Research 438

Theoretical-Developmental Research, 438 Practical-Educational Research, 444

Goals of Intervention 449

Remediation, 450 Prevention, 451 Enrichment, 452

Levels of Intervention 453

Individual and Small-Group Level, 453 Societal Level, 455

Intervention Strategies 458

Social Learning Strategies, 458 Training-Practice Strategies, 460 Ecological Change Strategies, 464

The Evaluation of Intervention Research 465

Developmental Plasticity versus Invariance, 467 Maintenance and Generalization, 469 U-Shaped Development, 470

Ethical Concerns 471
Summary 474

Key Terms, 475 Suggested Readings, 475

Chapter 11
Epilogue ***477***

Overview 478
The Cognitive Revolution: Revolution or Conspiracy? 478

Challenges to Piaget's Theory, 479 Challenges to Information-Processing Theories, 480

New Directions in Cognitive Development 482

Context and Cognition, 483 Intellectual Plasticity and Constraints, 484 Interindividual Differences in Cognitive Change, 485 Applications of Cognitive Developmental Research, 486

Conclusion 487

References ***488***

Glossary ***533***

Name Index ***545***

Subject Index ***557***
