<b>Chapter 1</b>	<b>What is a theory of mind?</b>	<b>1</b>
	Introduction	1
	Utility of a conception of mind	5
	Evolutionary history of conception of mind	8
	Why a conception of mind rather than a theory of behaviour?	9
	Conception of mind encapsulated in culture and literature	10
	A very big mystery	12

---

<b>Chapter 2</b>	<b>Evolution and a meeting of minds in apes</b>	<b>14</b>
	War and peace	14
	Communication between minds	17
	Linguistic apes	20
	Eye contact and communication	25
	Secondary benefits of linguistic competence	30
	The dawning of linguistic competence	31

---

<b>Chapter 3</b>	<b>The dawning of an understanding of minds in apes</b>	<b>34</b>
	Mirror self-recognition	34
	Tracing the evolution of a conception of mind	36
	Reports of insightful behaviour	37
	Do apes understand intention?	41
	Deception	44
	Linking seeing with knowing	46
	Relationship between understanding knowledge and mirror self-recognition	48
	Limitations in the chimp's conception of mind	50
	Chimpanzee society	54

<b>Chapter 4</b>	<b>Background of autism</b>	<b>57</b>
	Introduction	57
	History	57
	Stories	59
	Defining autism	62
	Diagnosis: Kanner, Asperger and the triad of impairments	64
	The cause of autism	67
	The site of autism within the brain	69
	Conclusions	71
<hr/>		
<b>Chapter 5</b>	<b>Theory of mind hypothesis of autism</b>	<b>72</b>
	Introduction	72
	Understanding about false belief	73
	Criticisms of the seminal study	78
	Impairment of communication	81
	Impairment of emotional relatedness	86
	Further difficulties in understanding about mind	87
	Conclusions	89
<hr/>		
<b>Chapter 6</b>	<b>Beyond the theory of mind hypothesis of autism</b>	<b>91</b>
	Introduction	91
	Success in acknowledging false belief	91
	Second-order belief attribution	92
	Further problems with the theory of mind hypothesis	94
	Executive dysfunction in autism	95
	Problems with the executive dysfunction hypothesis	102
	Another look at social and affective impairments	105
	Impaired conception of mind in other psychological disorders	108
	Conclusions	111
<hr/>		
<b>Chapter 7</b>	<b>The normal development of an understanding of mind</b>	<b>112</b>
	Introduction	112
	Have children been underestimated?	114
	The importance of deceptive box and state change	118
	Children's understanding of sources of knowledge	121
	The trouble with seeing-believing	126
	Conclusions	128

<b>Chapter 8</b>	<b>A radical shift in the child's understanding?</b>	<b>129</b>
	Introduction	129
	Age trend in acknowledging false belief: a second look	129
	Another look at state change	134
	Explaining behaviour	138
	Difficulty in acknowledging false belief in older children	141
	Difficulty in acknowledging false belief in adults	142
	Adults' difficulty with appearance and reality	146
	Conclusions	149
<hr/>		
<b>Chapter 9</b>	<b>Deception</b>	<b>150</b>
	Introduction	150
	Dominance and deception	152
	Early understanding of deception	155
	Has children's competence been overestimated?	158
	Are children being underestimated?	162
	Conclusions	165
<hr/>		
<b>Chapter 10</b>	<b>Pretence and communication</b>	<b>166</b>
	Introduction	166
	The significance of pretence	167
	Pretence and social sensitivity	168
	Have children been overestimated?	170
	Are toddlers being underestimated?	172
	Early communication	174
	Assigning a tentative status to verbal messages	177
	<i>Understanding that messages arise from minds</i>	178
	<i>Understanding that utterances have to be interpreted</i>	180
	Even later developments	182
	Conclusions	183
