		Seite
<i>W. Beyer und H. Kunzmann</i>	Today's Realization of Traceability in Dimensional Metrology	1
<i>Y. Tarbeyev und I. Gurov</i>	A Noise-Immune Interferometric Method for Measuring the Dimensions of Regular-Shaped Bodies	15
<i>G. Ulbers</i>	A Sensor for Dimensional Metrology with an Interferometer in Integrated Optics Technology	21
<i>Z. Füzessy</i>	Applications of Holographic Interferometry in Machine Tool Industry	29
<i>J. Kato, J. Yamato, N. Kikuchi und S. Ozono</i>	Optical Non-contact Probing Sensor Applied Optical Feedback Effects in Laser Diode	37
<i>P. H. Osanna, N. M. Durakbasa, G. Kappis und R. Oberländer</i>	Concepts and Strategies for CAD/CAQ Data Communication of a Flexible Measuring Cell for Precision Mechanics	43
<i>P. H. Osanna, J. Vagszegi, N. M. Durakbasa und R. Oberländer</i>	Laser Profilometer	49
<i>I. Brezina</i>	Metrological Testing of Coordinate Measuring Machines	55
<i>W. Lüdge, K. Günther, H.-G. Kloss, H. Herz und R. Jäschke</i>	A New Method of Non-Contacting Wire Size Measurement	61
<i>M. Schwertz, R. Werz und G. Hübner</i>	Parameter-Based Generic Programming for Computer-Aided Coordinate Measuring Technology as an Economical Solution	67
<i>H. O. Y. Tikka</i>	Tetra-Test — Geometric Calibration Method	81
<i>K. Takamasu und T. Kasahara</i>	Three Dimensional Position Measurement of Spherical Target Using Optical Collimator	87
<i>R. Jablonski</i>	Scanning Laser Measurements of Fiber Manufacturing Process	93

<i>J. Carro und A. M. Sánchez-Pérez</i>	Calibration Procedures on Dimensional Metrology Instruments in Spain	101
<i>G. Akos und I. Héssas</i>	Laser Measuring Equipments Based on the Reference Grating Method	107
<i>H. Ming, Y. Sun, J. Xie und T. Nakajima</i>	Gradient-index Rod Lens Interferometer	113
<i>N. M. Durakbasa, P. H. Osanna, R. Oberländer und G. Kappis</i>	The Utilization of CMM's for the Comprehensive Analysis of Macro- and Micro-Geometry of Workpieces	119
<i>A. Weckenmann, M. Heinrichowski und H.-J. Mordhorst</i>	Conception of Gauges and Multipoint-Measuring- Systems by Using Coordinate Measuring Machines	127
<i>H.-H. Schüßler</i>	Periodical Supervision of Coordinate Measuring Machines by means of Calibrated Mechanical Standards	133
<i>E. Trapet und F. Wäldele</i>	Determination of the Parametric Errors of Co-Ordinate Measuring Machines and Machine Tools Using Reference Objects	163
<i>K.-J. Schalz</i>	Improved Thermal Error Compensation (TEC) of CMM's	177
<i>S. Sartori</i>	A method for the identification and correction of thermal deformations in a three coordinate measuring machine	185
<i>H.-J. Jacobs, B. Stange und M. Fulsche</i>	Realtime Recognition of Tool Failure in Turning Processes	193
<i>T. Pfeifer und J. Elzer</i>	Measuring Drill Wear with Digital Image Processing	199
<i>H. Goetze</i>	Integration of Measurement Controlling Systems into Flexible Production Lines	205

<i>A. J. Alvares und C. A. Schneider</i>	Dimensional Control of Parts with a Coordinate Measuring Machine Feedbacking the Process on a Flexible Manufacturing Cell	215
<i>T. Abbe, J. Hannemann, K. Herrmann, P. Hoffmann und P. Rogazewski</i>	Reduction of Uncertainty of Form Measurements by Increased Evaluation Efforts — Experiences and Problems	221
<i>H. Roehr</i>	New Possibilities by Using CMM's for Gear and Thread Measurement	227
<i>W. Lotze, H.-J. Will und X. Zhang</i>	A New Principle, Theory and Software for Screw Thread Measurement by Optical Two-Coordinate Measuring Instruments	233
<i>M. J. Santos Jr. und C. A. Schneider</i>	Screw Gauge Measurement — New Automated Methodology	239
<i>G. Linß</i>	Universal Personal Computer Instruments for Intelligent Multipoint Measuring Systems	245
<i>B. Lux</i>	Unit Assembly QUALIDAT — Hardware and Software Module which can be Used in Statistical Process Control Systems	251
<i>T. Pfeifer und P. W. Plapper</i>	Transputer-Based Multisensor System to Analyse Transient Signals	257
<i>E. Bott und H. Kirstein</i>	Connection of CNC Coordinate Measuring Machines to a CAD System	263
<i>C.-P. Keferstein und J. Braas</i>	Image Processing for Integrated Quality Assurance and High Precision Positioning of Semiconductor Chips in a Mounting Device	271
<i>M. Lehmann und E. Stegmaier</i>	A PC Based Vision System for Quality Control in Automated Production Lines	277
<i>K. Yamamoto</i>	On-Line Automatic Curvature Measurement of Steel Pipes on Moving Rollers	283
<i>W. Vordermark und R. O'Connor</i>	Recent Developments in Metrology Techniques for Process Optimisation and Maintenance of Plastics Processing Machines	289

<i>R. Staiger</i>	Mobile systems with angular measuring units — the new metrological standard for large objects	295
<i>D. Hofmann und K. Kariya</i>	Dimensional Metrology for Intelligent Quality Measurements	301
<i>W. F. Holler</i>	Production integrated quality	309
<i>B. Q. Nguyen</i>	Quality Control Network in F.M.S. Production	317
<i>B. Stürmer und E. Stegmaier</i>	Different Solutions for CAD Data Based Offline Programming of Coordinate Measuring Machines in the Quality Assurance Department of Volkswagen AG, Braunschweig	323
<i>R. Ohnheiser und C. Porta</i>	Conventional Procedures and Future Aspects for Measurement of Sculptured Surfaces with CAD-/CAQ-Methods	329
<i>T. Akuta und Y. Negishi</i>	Automatic 3-D Shape Measuring System Using New Auto-Focusing Method	337
<i>W. Ohnesorge, R. Brodmann und W. Smilga</i>	Investigating Surface Quality with an Optical Profilometer	343
<i>T. Miyoshi</i>	Measurement of Ultra-Precision Diamond Turned Surface Roughness Based on Fraunhofer Diffraction	351
<i>U. Schneider, A. Steckroth, N. Rau und G. Hübner</i>	Implementation of a Function-Oriented and Distortion-Free Filtering Method for Roughness Measurements of Highly Stressed Contact Surfaces	357
<i>H. Strøbæk Nielsen</i>	Calibration of Surface Roughness Instruments	365
<i>S. Ottmann und M. Sommer</i>	Absolute Length Calibration of Microindicators in the Nanometer Range	371
<i>S. Kaufmann und U. Teichmann</i>	Measuring Instruments and Gauges in Engineering Metrology Using Carbon Fibres	377
