

Contents

Preface	xi
List of Contributors	xiii
1. Introduction: My Journey into Biological Psychology	1
<i>Knut Larsson</i>	
I DEVELOPMENTAL PSYCHOBIOLOGY	11
<i>Jean-Marie Guastavino</i>	
2. Aggressive Aspects of Maternal Behavior in the Rat	15
<i>Anne D. Mayer, Elizabeth M. Factor, and Jay S. Rosenblatt</i>	
Course of Aggression and its Relation to Maternal Behavior	
Hormonal Factors Influencing the Onset of Aggression	
Sensory Factors in Maternal Aggression	
The Peripeduncular Nucleus of the Midbrain and Maternal Aggression	
Conclusions	
3. Learning Early in Life: A Neurological Analysis	29
<i>Michael Leon</i>	
Early Olfactory Learning in Human Infants	
Early Olfactory Learning in Rats	
Neural Correlates of Early Olfactory Learning	
Differential Respiration	
Anatomical Changes	
Changes in Olfactory Bulb Output Signal	
Pharmacological Mechanisms	
Conclusions	
4. Ontogeny of Ultrasonic Vocalization in the Rat: Influence of Neurochemical Transmission Systems	37
<i>Ernest Hård and Jörgen Engel</i>	
Introduction	
General Procedure	
Influence of Anxiolytics (Pharmacological Validation)	
Influence of the GABA System	
Influence of Monoamine Systems	
Influence of Catecholamine Systems: Dopamine	
Influence of Catecholamine: Noradrenaline	
General Conclusions	

5.	Neuroendocrine Integration of Social Behavior in Male Songbirds <i>Cheryl F. Harding</i>	53
	Neuroendocrine Integration of Social Behavior in Male Songbirds Castration Hormone Replacement Studies Neural Androgen and Estrogen Receptors Hormone Effects on Neurotransmitter Systems Future Directions	
II	SEXUAL BEHAVIOR I <i>Thorsten Klint</i>	67
6.	The Physiological Significance of Acute Activation of the Gonadal Hormonal Axis <i>Nanne E. van de Poll</i>	69
	Activation of the Gonadal Axis and Behavioral Change Central Activation of the Gonadal Axis as Stimulus Factor Central Activation of the Gonadal Axis and Affect Central Activation of the Gonadal Axis and Human Sexuality	
7.	The Neuropharmacology of Lordosis Behavior: Serotonergic Mechanisms <i>Bengt J. Meyerson</i>	75
	Pharmacological Consideration Serotonin and Lordosis Inhibition 5-HT Antagonists and Lordosis Behavior 5-HT Agonists and Lordosis Behavior 5-HT and Stimulation of Lordosis Behavior 5-HT _{1A} Agonists and LR Progesterone Enhances the Effects of 5-HTP and 5-HT Agonists Concluding Remarks	
8.	Testosterone Metabolism and Sexual Behavior in Male Rats <i>Per Södersten</i>	85
	Effects of Estradiol on Sexual Behavior The "Aromatization-5 α -Reduction" Hypothesis Estradiol-5 α -Dihydrotestosterone Interaction in the Brain Androgenic Activation of Sexual Behavior Interference with Aromatization and 5 α -Reduction Effects on Testosterone-Activated Sexual Behavior 3 α -Androstane-dione: A "Weak Androgen" that is Not Weak Possible Mechanisms of Action of Estradiol Role of Androgen Inactivation Summary	

9.	Motivation and Performance: Region-Selective Changes in Forebrain Monoamine Synthesis Due to Sexual Activity in Rats <i>Sven Ahlenius, Viveka Hillegaart, and Knut Larsson</i>	93
	Experimental Procedures Effects of NSD-1015 on the Male Rat Sexual Behavior Effects of Rat Sexual and Social Interactions on Striatal Monoamine Synthesis Effects of Sexual Interaction on Forebrain Monoamine Synthesis in Sexually Naive Male Rats Motivation versus Performance Summary and Conclusions	
III	SEXUAL BEHAVIOR II <i>Alonso Fernandez-Guasti, O. Picazo, B. Roldán-Roldán, and A. Saldivar</i>	105
10.	Neuroendocrine and Psychological Mechanisms Underlying Masculine Sexual Behavior <i>Barry J. Everitt</i>	111
	Effects of Lesions of the Medial Preoptic-Anterior Hypothalamic Area Effects of Testosterone in the Medial Preoptic-Anterior Hypothalamic Area Neurochemical Manipulations of the Medial Preoptic-Anterior Hypothalamic Area Studies of Appetitive and Reward-Related Aspects of Sexual Behavior Following Hypothalamic Lesions and Neuroendocrine Treatments Dopamine, the Ventral Striatum and Appetitive Aspects of Sexual Behavior The Limbic Forebrain and Sexual Behavior	
11.	Vagino-cervical Afference as a Trigger for Analgesic, Behavioral, Autonomic, and Neuroendocrine Processes <i>Barry R. Komisaruk</i>	123
	Vagino-cervical Stimulation (VS) Inhibits Responses to Noxious Stimulation VS Inhibits Sensory Responses to Noxious Stimulation Functional Significance of VS-Produced Analgesia Mechanism of VS-Produced Analgesia Possible Role of the Primary Afferent Neuropeptide, Vasoactive Intestinal Peptide (VIP), in VS-Produced Analgesia Conclusion	
12.	Sexual Differentiation of a Neuropeptide Circuit Regulating Female Reproductive Behavior <i>Paul E. Micevych</i>	139
	Steroid Effects on Cholecystokinin Cholecystokinin Regulation of Reproduction Development Ontogeny of pCCK mRNA Expression	

Sexual Differentiation of Adult Response to
Cholecystokinin
Conclusion

13. **Functional Implications of Progesterone Metabolism: Effects on Psychosexual Development, Brain Sexual Differentiation, and Perception** 151
Carlos Beyer and Gabriela González-Mariscal
- Metabolism of Progesterone
Structure-Activity Relationships
Behavioral Responses to Progestins
Behaviors Linked to the Action of Delta-4-3-Keto Progestins
Behaviors Linked to the Action of Ring A-Reduced Progestins
Summary and Conclusions
- IV **CLINICAL PSYCHOBIOLOGY** 167
Frank O. Ödberg
14. **Neonatal Imitation: A Social and Biological Phenomenon** 173
Mikael Heimann
- Support for the Existence of an Early Imitative Capacity
Methodological Issues
Individual Differences
Neonatal Imitation and Early Cognitive and Social Development
Psychobiological Considerations
Conclusion
15. **Normal Brain Functions and Signs of Dysfunction** 187
Ivan Divac
16. **Social Inhibition—Development and Implications** 191
C. Philip Hwang and Anders G. Broberg
- Definitions
Inhibition—Research Findings
“The Gothenburg Child Care Project”
Clinical Comments
17. **Psychobiological Approaches in Clinical Practice** 199
Sven G. Carlsson
- Psychobiological Models
Biofeedback
A Psychophysiological Therapy for Dental Fear
Conclusion

V	ANIMAL PSYCHOBIOLOGY <i>Berend Olivier and Jan Mos</i>	207
18.	Studies on the Effects of Ethyl Alcohol on Rodent Behavior in Diverse Tests <i>Paul F. Brain and Mansour A. Al-Hazmi</i>	229
	The Tests	
	Ethyl Alcohol	
	Effects of Ethanol on Tube Restraint-Induced Attack by Swiss Mice	
	Effects of Doses of Alcohol on Murine Exploration in the Platform Apparatus	
	Effects of Alcohol on Nest-Building in Male and Female Mice	
	Effects of Alcohol on Social Behavior in Naive Male and Female Mice	
	General Discussion	
19.	Neurotransmitters in Affective Disorders <i>Gerard J. Marek and Lewis S. Seiden</i>	243
	Classification of Affective Disorders	
	Neurotransmitters in Etiology and/or Pathogenesis of Affective Disorders	
	Mechanism of Action of Antidepressant Drugs	
	Use of Behavioral Antidepressant Drug Screens: Mechanism of Drug Action	
20.	Unitary Concepts in Behavioral Biology <i>Trevor Archer and Lars-Göran Nilsson</i>	255
	Aspects of Neuroendocrine Involvement in Affective Disorders	
	Prenatal Stress and Ontogeny	
	Neurotransmitter-Hormonal Interactions in Learning Tasks	
	Subject Index	267
