List of contributors	page ix
Foreword, by <i>Howard E. Gruber</i>	xi
Preface	xiv
Acknowledgments	xvii

Part I Theoretical frameworks for comparative developmental studies

- 1 Origins of comparative developmental evolutionary studies of primate mental abilities 3
Sue Taylor Parker
- 2 How scientific usages reflect implicit theories: *Adaptation, development, instinct, learning, cognition, and intelligence* 65
Sue Taylor Parker and Bernard Baars
- 3 New perspectives on instincts and intelligence: Brain size and the emergence of hierarchical mental constructional skills 97
Kathleen Rita Gibson
- 4 Why big brains are so rare: Energy costs of intelligence and brain size in anthropoid primates 129
Sue Taylor Parker

Part II Comparative developmental perspectives on cebus intelligence

- 5 The comparative study of cognitive ontogeny in four primate species 157
Francesco Antinucci
- 6 Sensorimotor development in hand-reared and mother-reared tufted capuchins: A systems perspective on the contrasts 172
Dorothy Munkenbeck Fragaszy
- 7 Tool use, imitation, and deception in a captive cebus monkey 205
Kathleen Rita Gibson
- 8 The role of innate motor patterns in ontogenetic and experiential development of intelligent use of sticks in cebus monkeys 219
Sue Taylor Parker and Patricia Poti

Part III Questions regarding imitation, “language,” and cultural transmission in apes and monkeys

- 9 Do monkeys ape? 247
Elisabetta Visalberghi and Dorothy Munkenbeck Fragaszy
- 10 Cultural transmission in the tool use and communicatory signaling of chimpanzees? 274
Michael Tomasello
- 11 Primate cognition: From representation to language 312
Jacques Vauclair

Part IV Developmental perspectives on social intelligence and communication in great apes

- 12 The emergence of intentional communication as a problem-solving strategy in the gorilla 333
Juan Carlos Gómez
- 13 “Social tool use” by free-ranging orangutans: A Piagetian and developmental perspective on the manipulation of an animate object 356
Kim A. Bard
- 14 The development of peer social interaction in infant chimpanzees: Comparative social, Piagetian, and brain perspectives 379
Anne E. Russon
- 15 Spatial expression of social relationships among captive *Pan paniscus*: Ontogenetic and phylogenetic implications 420
Ben G. Blount

Part V Development of numerical and classificatory abilities in chimpanzees and other vertebrates

- 16 The development of numerical skills in the chimpanzee (*Pan troglodytes*) 435
Sarah T. Boysen and Gary G. Berntson
- 17 Spontaneous sorting in human and chimpanzee 451
Tetsuro Matsuzawa
- 18 Conceptual abilities of some nonprimate species, with an emphasis on an African Grey parrot 469
Irene Maxine Pepperberg

Part VI Comparative developmental perspectives on ape “language”

- 19 The cognitive foundations for reference in a signing orangutan 511
H. Lyn White Miles

20	Grammatical combination in <i>Pan paniscus</i> : Processes of learning and invention in the evolution and development of language <i>Patricia Marks Greenfield and E. Sue Savage-Rumbaugh</i>	540
	Index	579
