

# Contents

## **1 Historical Perspectives on Cooperative Behavior, 3**

- 1.1 Introduction, 3
- 1.2 Early philosophical ponderings on cooperation, 4
- 1.3 Early evolutionary biology and the study of cooperation, 5
- 1.4 Experimental work on cooperation: Warder Clyde Allee and the “The Chicago School” of animal behavior, 8
- 1.5 “Modern” approaches to the study of cooperative behavior, 10
- 1.6 Onward and upward, 13

## **2 Theoretical Perspectives on the Evolution of Cooperation, 14**

- 2.1 Introduction, 14
- 2.2 Inclusive fitness, 15
- 2.3 Within- and between-group selection, 17
- 2.4 Reciprocity and the prisoner’s dilemma, 19
- 2.5 Byproduct mutualism, 31
- 2.6 The cooperator’s dilemma game, 34
- 2.7 Onward and upward, 44

## **3 Cooperation in Fishes, 45**

- 3.1 Introduction, 45
- 3.2 Egg trading and reciprocity in simultaneously hermaphroditic fishes, 45
- 3.3 Helpers-at-the-nest, 50
- 3.4 Nest raiding in three-spined sticklebacks, 53
- 3.5 Intraspecific cleaning, 53
- 3.6 Cooperative foraging, 55
- 3.7 Shreckstoff, 58
- 3.8 Mobbing behavior, 59
- 3.9 Predator inspection, 59
- 3.10 Summary, 70

## **4 Cooperation in Birds, 71**

- 4.1 Introduction, 71
- 4.2 Territoriality and cooperation, 71

- 4.3 Cooperative hunting, 77
- 4.4 Food calls, information, and food sharing, 78
- 4.5 Alarm calls, 85
- 4.6 Mobbing behavior, 87
- 4.7 Summary, 89

## **5 Cooperation in Mammals I: Nonprimates, 90**

- 5.1 Introduction, 90
- 5.2 Grooming behavior, 91
- 5.3 Stotting, tail flagging, alarm signals, and vigilance, 94
- 5.4 Coalitions, 99
- 5.5 Alloparenting and helping behavior, 101
- 5.6 Cooperative hunting, 111
- 5.7 Bloodsharing and reciprocal altruism in bats, 113
- 5.8 Care-giving behavior in dolphins, 114
- 5.9 Summary, 115

## **6 Cooperation in Mammals II: Nonhuman primates, 116**

- 6.1 Introduction, 116
- 6.2 Grooming behavior, 116
- 6.3 Nongrooming-based coalitions, 125
- 6.4 Cooperative hunting, 130
- 6.5 Intergroup conflicts and cooperation, 131
- 6.6 Scanning, alarm calls, and other anti-predator behaviors, 135
- 6.7 Alloparenting and helping 138
- 6.8 Summary, 140

## **7 Cooperation in Insects, 142**

- 7.1 Introduction, 142
- 7.2 The evolution of eusociality, 143
- 7.3 Worker “policing” in honeybees, 149
- 7.4 Honeybee colonies as superorganisms: foraging, anti-predator behavior, and hive thermoregulation, 151
- 7.5 “Social contracts” in paper wasps, 157
- 7.6 Colony founding, 158
- 7.7 Summary, 163

## **8 To the Future, 164**

- 8.1 A key to categories of cooperation, 164
- 8.2 Quantifying the payoff matrix, 165
- 8.3 Correlates of cooperation, 166

8.4	Does the skew towards reciprocity in the theoretical literature reflect nature?,	167
8.5	Spatial games and the evolution of cooperation,	168
8.6	The bright side and the dark side,	168
