

Contents

PART I. PERCEPTION OF FORM

1. Differential Functions of Central and Peripheral Visual Field Representations in Monkey
Prestriate Cortex 3
Shigeya Yaginuma, Yasutaka Osawa, Kiyoko Yamaguchi, and Eiichi Iwai
2. Impaired Pattern Vision in Monkeys with Removal of Posterior Inferotemporal Cortex 16
Eiichi Iwai, Yasutaka Osawa, Kiyoko Yamaguchi, and Shigeya Yaginuma
3. Serial Processing of Visual Object-Features in the Posterior and Anterior Parts of the Inferotemporal Cortex 34
Keiji Tanaka, Ichiro Fujita, Eucaly Kobatake, Kang Cheng, and Minami Ito
4. An Analysis at the Population Level of the Processing of Faces in the Inferotemporal Cortex 47
Malcolm P. Young and Shigeru Yamane
5. Information Processing in the Monkey Somatosensory Cortex for the Recognition of Objects 71
Yoshiaki Iwamura and Michio Tanaka
6. A Role of Expectation in Visual and Tactile Processing Within the Temporal Cortex 83
Jari K. Hietanen and David I. Perrett
7. Extraretinal Representations in Visual Areas of Macaque Cerebral Cortex 104
John H. R. Maunsell and Vincent P. Ferrera

PART II. PERCEPTION OF MOTION

8. Hierarchical Neural Analysis of Optical Flow in the Macaque Visual Pathway 121
Hide-aki Saito
9. Motion Processing for Guiding Self-Motion 141
Robert H. Wurtz, Charles J. Duffy, and Jean-Pierre Roy
10. Neural Mechanisms of Perception of Linear and Rotary Movement in Depth in the Parietal Association Cortex of the Monkey 166
Hideo Sakata, Makoto Kusunoki, and Yuji Tanaka
11. From Direction of Motion to Patterns of Motion: Hierarchies of Motion Analysis in the Visual Cortex 183
Richard A. Andersen, Stefan Treue, Michael Graziano, Robert J. Snowden, and Ning Qian
12. Microstimulation of Visual Area MT: Effects on Choice Behavior in the Absence of Moving Visual Stimuli 200
Chieko M. Murasugi, C. Daniel Salzman, and William T. Newsome

PART III. MEMORY: LIMBIC SYSTEM

13. The Organization of Declarative and Nondeclarative Memory 219
Larry R. Squire
14. The Entorhinal Cortex of the Monkey: A Summary of Recent Anatomical Findings 228
David G. Amaral, Menno P. Witter, and Ricardo Insausti
15. The Memory System Damaged in Medial Temporal Lobe Amnesia: Findings from Humans and Nonhuman Primates 241
Stuart Zola-Morgan and Larry R. Squire
16. Anterograde Amnesia and the Comparative Neuropsychology of Limbic Structures 258
John P. Aggleton

17. Neurophysiological and Theoretical Analysis of How the Primate Hippocampus Functions in Memory 276
Edmund T. Rolls and Shane O'Mara
18. Where Perception Meets Memory: Functional Coding in the Hippocampus 301
Howard Eichenbaum and Tim Otto
19. Neural Mechanisms of Recognition and Memory in the Limbic System 330
Taketoshi Ono, Ryoji Tamura, Hisao Nishijo, and Kiyomi Nakamura
20. Contribution of Monkey Basal Forebrain to Learning and Memory 356
Masaji Fukuda, Ryoichi Masuda, and Taketoshi Ono
21. The Role of the Hippocampus in Learning and Memory 370
Patricia E. Sharp

PART IV. PERCEPTION AND MEMORY: NEOCORTEX

22. Neural Mechanisms of the Pictorial Long-term Memory in the Primate Temporal Cortex 397
Yasushi Miyashita, Kuniyoshi Sakai, Hiroyuki Okuno, Yasuyuki Tanatsugu, and Yasunori Ninomiya
23. Comparisons of Single Neuronal Activities in the Temporal Cortex and the Amygdala of the Rhesus Monkey During a Visual Discrimination and Memory Task 405
Akichika Mikami, Katsuki Nakamura, and Kisou Kubota
24. The Effects of Selective Attention on Visual Processing Measured with Performance and Positron Emission Tomography 413
Steven E. Petersen, Maurizio Corbetta, Francis Miezin, Gordon Shulman, and Marcus E. Raichle
25. Memory Cells in Primate Cortex and the Activation of Memory Networks 426
Joaquin M. Fuster

26. Allocation of Function in Distributed Circuits 445
Patricia S. Goldman-Rakic, Matthew Chafee, and Harriet Friedman
27. Delayed Response and Perseverative Errors in Newborn Infant Rhesus Monkeys 457
Kisou Kubota
28. Premotor and Supplementary Motor Cortex in Sequential Motor Tasks 464
Jun Tanji, Hajime Mushiake, and Masahiko Inase
29. Prefrontal Cortex in the Organization and Control of Voluntary Movement 473
Kazuo Sasaki and Hisae Gemba
30. Role of the Basal Ganglia in Motor Learning: A Hypothesis 497
Okihide Hikosaka

PART V. NEURAL PLASTICITY

31. In Vitro Study of Visual Cortical Development and Plasticity 517
Keisuke Toyama, Yukio Komatsu, and Nobuhiko Yamamoto
32. Potentiation and Depression in Visual Cortical Neurons: A Functional Approach to Synaptic Plasticity 533
Yves Frégnac and Dominique Debanne
33. Molecular Mechanisms Underlying Long-term Potentiation/Depression in the Developing Visual Cortex: An Overview 562
Tadaharu Tsumoto
34. Aberrant Projections in Developing Brains: Their Role in Neuronal Plasticity 584
Fujio Murakami

35. Reconstruction of Mammalian Central
Neural Circuitry 599
*Saburo Kawaguchi, Miyahiko Murata, and
Yasuo Kurimoto*
36. GABA_A Receptor and Glycine Receptor in the Rat
Cerebral Cortex and Hippocampal Formation 604
*Masaya Tohyama, Jian-Hua Zhang, Toshiyuki Araki,
Kohji Sato, Masahiro Fujita, Makoto Sato, and
Hiroshi Kiyama*

PART VI. NEURAL MODELING AND REPRESENTATION

37. Neural Network Modeling of Brain Lesions 619
M. A. Virasoro
38. Neural Representation of Information by
Sparse Encoding 630
Shun-ichi Amari
39. Real-time Optical Recording of Neuronal Activities in
the Brain 638
*Michinori Ichikawa, Toshio Iijima, and
Gen Matsumoto*

PART VII. PERSPECTIVES ON THOUGHT AND CONSCIOUSNESS

40. How Does the Cerebellum Facilitate Thought? 651
Masao Ito
41. Evolution of Consciousness 659
Sir John Eccles
- Index 673
