

Inhaltsverzeichnis

Carsten Binnig Generating Meaningful Test Databases	11
Christoph Bockisch An Efficient and Flexible Implementation of Aspect-Oriented Languages	21
Manfred Bortenschlager CorA: A Coordination Architecture for Collaboration in Pervasive Environments	31
Markus Chimani Computing Crossing Numbers	41
Thomas Deselaers Image Retrieval, Object Recognition, and Discriminative Models	51
Marcus Dittrich Assembly of the Interactome, Characterization of Functional Modules and Novel Approaches to the Analysis of Signaling Networks in Human Platelets	61
Sebastian Dörn Quantum Complexity of Graph and Algebraic Problems	71
Dominik Engel Media Encryption for Still Visual Data	81
Beat Fluri Change Distilling: Enriching Software Evolution Analysis with Fine-Grained Source Code Change Histories	91
Thomas Gottron Content Extraction: Bestimmung des Hauptinhaltes in HTML Dokumenten .	101
Martin Groher 2D-3D Registration of Vascular Images – Towards 3D-Guided Catheter Interventions	111
Daniel Große Quality-Driven Design and Verification Flow for Digital Systems	121

Jens Heidrich	
Goal-oriented Quantitative Software Project Control	131
Andreas Henschel	
A Structural Classification of Protein-Protein Interactions for Detection of Convergenly Evolved Motifs and for the Predictions of Protein Binding Sites on Sequence Level	141
Oliver Hummel	
Semantic Component Retrieval in Software Engineering	151
Lutz Ißler	
Informationsverarbeitung im Informationsmanagement	161
Amir Madany Mamlouk	
Computergestützte Analyse von Biologischen und Bioinspirierten Signalverarbeitungs- und Wahrnehmungsprozessen	171
Ilias Michalarias	
Multidimensional Data Management in Mobile Environments	181
André Platzer	
Differential Dynamic Logic: Automated Theorem Proving for Hybrid Systems	191
Florian Rabe	
Representing Logics and Logic Translations	201
Marco Reisert	
Group Integration Techniques in Pattern Analysis – A Kernel View	211
David Sabel	
Semantics of a Call-by-Need Lambda Calculus with McCarthy’s Amb for Program Equivalence	221
Felix Salfner	
Event-based Failure Prediction: An Extended Hidden Markov Model Approach	231
Thomas Sauerwald	
Randomized Protocols for Information Dissemination	241

Sven Schewe	
Synthesis of Distributed Systems	251
Jonathan Schmitt	
Modellierung und Verifikation medizinischer Leitlinien	261
Dominik Schultes	
Route Planning in Road Networks	271
Sören Sonnenburg	
Machine Learning for Genomic Sequence Analysis	281
Ulrike Thomas	
Automatisierte Programmierung von Robotern für Montageaufgaben	291
Melanie Volkamer	
Evaluation von Internetwahlsystemen	301
Tino Weinkauff	
Extraction of Topological Structures in 2D and 3D Vector Fields	311
Franz Weitz	
Document Verification with Temporal Description Logics	321
Arno Zinke	
Photo-Realistic Rendering of Fiber Assemblies	331
