

Contents

Series Foreword	viii
Acknowledgments	ix
Chapter 1	
A Computational-Representational Approach	1
Chapter 2	
Representations	15
Chapter 3	
Navigation	35
Chapter 4	
Dead Reckoning	57
Chapter 5	
The Cognitive Map	103
Chapter 6	
The Geometric Module in the Rat	173
Chapter 7	
Biological and Computational Foundations for the Representation of Time	221
Chapter 8	
Time of Occurrence	243
Chapter 9	
Temporal Intervals	287
Chapter 10	
Number	317
Chapter 11	
Rate	351

Chapter 12	
Classical Conditioning: Modern Results and Theory	385
Chapter 13	
Classical Conditioning: A Representational Model	421
Chapter 14	
Vector Spaces in the Nervous System	475
Chapter 15	
The Unity of Remembered Experience	523
Chapter 16	
The Search for the Engram	561
Chapter 17	
Synthesis	581
References	597
Index	623
