## PART I DIFFERENTIATION AND ORGANIZATION OF REPRODUCTIVE PROCESSES

### CHAPTER 1

Sexual Organogenesis . . . . .	3
<i>Alfred Jost</i>	
Introduction . . . . .	3
Body Sex . . . . .	5
<i>Role of the Fetal Testis</i> . . . . .	5
<i>Dual Nature of the Testicular Chemical Signals</i> . . . . .	7
<i>Testicular Androgens</i> . . . . .	8
<i>Müllerian Inhibitor (or Anti-Müllerian Hormone)</i> . . . . .	11
<i>Estrogen Production by the Fetal Ovary</i> . . . . .	13
Gonadal Sex . . . . .	13
<i>Testicular Organogenesis</i> . . . . .	14
<i>Ovarian Morphogenesis</i> . . . . .	15
<i>Control of Gonadal Differentiation</i> . . . . .	15
References . . . . .	16

### CHAPTER 2

Gonadal Hormones during Sexual Differentiation in Vertebrates . . . . .	21
<i>John A. Resko</i>	
Introduction . . . . .	21
Steroid Hormone Production in Developing Birds and Amphibia . . . . .	22

<i>Morphology of the Embryonic Chick Testes</i> . . . . .	22
<i>Biosynthetic Capacity of Chick Gonads for Steroid Production</i> . . . . .	22
<i>Effects of Sex Steroids on Amphibian Development</i> . . . . .	23
<i>Steroid Production of Endocrine Tissues of Developing Amphibia</i> . . . . .	24
Steroid Hormones in Developing Rodents . . . . .	24
<i>Morphological Considerations</i> . . . . .	24
<i>Steroid Hormone Production by Fetal and Neonatal Gonads of Short-Gestation Rodents</i> . . . . .	25
<i>Steroid Hormone Production by Fetal Gonads in Long-Gestation Rodents</i> . . . . .	27
<i>Trophic Control of the Fetal Gonads in Rodents</i> . . . . .	28
Functional Considerations of Fetal Rabbit Gonads . . . . .	28
Fetal Hormones of Domestic Animals . . . . .	29
Production of Steroid Hormones in Primate Fetuses . . . . .	32
<i>Differentiation of the Fetal Testes</i> . . . . .	32
<i>Capacity of the Fetal Testes for Steroid Biosynthesis</i> . . . . .	33
<i>Androgens in the Systemic Circulation of Primate Fetuses</i> . . . . .	33
<i>Other Hormones and Sexual Differentiation</i> . . . . .	36
Summary . . . . .	37
References . . . . .	38

## CHAPTER 3

Nonmammalian Psychosexual Differentiation . . . . .	43
---	----

*Elizabeth Adkins-Regan*

Introduction . . . . .	43
Psychosexual Differentiation in the Domestic Chicken ( <i>Gallus gallus</i> ) . . . . .	44
<i>Sex Differences and the Reproductive Behavior of Chickens</i> . . . . .	44
<i>Effects of Hormonal Manipulations before Hatching on the Behavior of Chickens</i> . . . . .	45
<i>Neurobiological Mechanisms of Psychosexual Differentiation in Domestic Fowl</i> . . . . .	46
Psychosexual Differentiation in Japanese Quail ( <i>Coturnix coturnix japonica</i> ) . . . . .	48
<i>Sex Differences and the Reproductive Behavior of Quail</i> . . . . .	48
<i>Effects of Hormone Manipulations before Hatching on Reproductive Behavior</i> . . . . .	49
Psychosexual Differentiation in Zebra Finches ( <i>Poephila guttata</i> ) . . . . .	50
<i>Sex Differences and the Reproductive Behavior of Zebra Finches</i> . . . . .	50
<i>Effect of Early Hormone Manipulations on Zebra Finches</i> . . . . .	51
Psychosexual Differentiation in Other Avian Species . . . . .	53
Psychosexual Differentiation in Reptiles . . . . .	53
Psychosexual Differentiation in Amphibians . . . . .	54

Psychosexual Differentiation in Teleost Fish . . . . .	55
<i>Hermaphroditism in Teleost Fish</i> . . . . .	57
<i>Hormonal Mechanisms of Spontaneous Sex Reversal</i> . . . . .	59
Questions and Theoretical Issues . . . . .	60
<i>Are Paradoxical Effects of Early Hormone Treatments due to Conversion of Androgen to Estrogen?</i> . . . . .	60
<i>Are Early Hormones Responsible for the Differentiation of Ovulation Control Mechanisms?</i> . . . . .	61
<i>Does Any Behavior Not Directly Related to Reproduction Also Differentiate under the Influence of Early Hormones in Nonmammalian Species?</i> . . . . .	61
<i>How Useful Is the Organization/Activation Model for Understanding Nonmammalian Psychosexual Differentiation?</i> . . . . .	61
<i>Is the Empirically Determined Pattern of Hormone Secretion of Embryos or Young Consistent with Conclusions Derived from the Behavioral Data?</i> . . . . .	64
<i>Do Sex Chromosomes or Genes Have a Direct (Nonhormonally Mediated) Role in Psychosexual Differentiation?</i> . . . . .	65
<i>Are Patterns of Psychosexual Differentiation Correlated with Morphological Differentiation or with Sex Chromosome Type in the Different Vertebrate Classes?</i> . . . . .	65
Overview . . . . .	67
Conclusions . . . . .	68
References . . . . .	70

CHAPTER 4

Sexual Behavior Differentiation: Effects of Prenatal Manipulations in Rats . . . . .	77
<i>Ingeborg L. Ward and O. Byron Ward</i>	
Introduction . . . . .	77
<i>Sexual Differentiation Theory</i> . . . . .	78
<i>Aromatization Hypothesis</i> . . . . .	78
Critical Period: Postnatal or Pre-Plus Postnatal . . . . .	79
<i>Postnatal Effects</i> . . . . .	80
<i>Strategies for Manipulating Androgenic Hormone Levels in Fetuses</i> . . . . .	81
<i>Additive Effects of Pre-Plus Postnatal Manipulations</i> . . . . .	84
Exchange of Androgen among Fetuses . . . . .	85
Effects of Prenatal Stress on Sexual Differentiation . . . . .	86
<i>Behavioral Syndrome</i> . . . . .	86
<i>Alterations in Plasma Testosterone Levels and Testicular Enzyme Activity</i> . . . . .	86
<i>No Persisting Modification of Morphology</i> . . . . .	88
<i>Therapy for Prenatally Stressed Males</i> . . . . .	89

Prenatal Testosterone Synthesis Inhibition by Opiates . . . . .	90
<i>Prenatal Opioid Syndrome</i> . . . . .	90
<i>Effects on Fetal Plasma Testosterone and Testicular Enzyme Activity</i> . . . . .	91
<i>Possible Role of Endogenous Opiate Release in Mediating the Prenatal Stress Syndrome</i> . . . . .	91
Conclusions . . . . .	91
References . . . . .	92

## PART II HORMONAL ACTIVATION OF BEHAVIOR

### CHAPTER 5

Reproductive Physiology and Behavior Interactions in Nonmammalian Vertebrates . . . . .	101
---	-----

*David Crews and Rae Silver*

Introduction . . . . .	101
Teleost Fishes . . . . .	103
<i>The Hypothalamo-Pituitary-Gonadal Axis</i> . . . . .	103
<i>Hormone-Behavior Interactions in Teleost Fish</i> . . . . .	106
Amphibians . . . . .	114
<i>The Hypothalamo-Pituitary-Gonadal Axis</i> . . . . .	115
<i>Physiological Factors Controlling Amphibian Reproductive Behavior</i> . . . . .	119
Reptiles . . . . .	124
<i>The Hypothalamo-Pituitary-Gonadal Axis</i> . . . . .	124
<i>Endocrine and Neural Control of Reptilian Reproductive Behavior</i> . . . . .	128
Birds . . . . .	136
<i>The Hypothalamo-Pituitary-Gonadal Axis</i> . . . . .	137
<i>Endocrine and Neural Control of Avian Reproductive Behavior</i> . . . . .	146
Concluding Remarks . . . . .	156
References . . . . .	157

### CHAPTER 6

The Role of Gonadal Hormones in the Activation of Feminine Sexual Behavior . . . . .	183
--	-----

*Lynwood G. Clemens and David R. Weaver*

Historical Concepts of Feminine Sexual Behavior . . . . .	183
Structure and Biosynthesis of Gonadal Steroids . . . . .	185
<i>Structure of Gonadal Steroids</i> . . . . .	185
<i>Biosynthesis of Gonadal Steroids</i> . . . . .	187
Steroid Structure and Estrus Induction . . . . .	187

Estrous Cyclicity and Hormone Levels in Intact Females . . . . .	190
<i>Spontaneous Ovulation</i> . . . . .	190
<i>Induced Ovulation (Reflex Ovulation)</i> . . . . .	191
Analysis of Feminine Sexual Behavior . . . . .	196
<i>Attractivity</i> . . . . .	196
<i>Proceptivity</i> . . . . .	201
<i>Receptivity</i> . . . . .	208
Conclusions . . . . .	216
References . . . . .	217

CHAPTER 7

Maternal Behavior among the Nonprimate Mammals . . . . .	229
--	-----

*Jay S. Rosenblatt, Anne D. Mayer, and Harold I. Siegel*

Introduction . . . . .	229
Evolution of Modes of Reproduction among the Mammals . . . . .	231
Patterns of Maternal Care . . . . .	232
Onset of Maternal Behavior during Pregnancy and Near Term . . . . .	235
<i>Behavioral Changes during Pregnancy and Near Term</i> . . . . .	235
<i>Hormonal Basis of the Onset of Maternal Behavior</i> . . . . .	241
<i>Endocrine Control of Pregnancy and Parturition</i> . . . . .	241
<i>Endocrine Stimulation of Maternal Behavior</i> . . . . .	242
<i>Analytical Studies of the Hormonal Basis of Maternal Behavior</i> . . . . .	245
Postpartum Regulation of Maternal Behavior: Behavioral Synchrony between Mother and Young . . . . .	254
<i>Mother's Dependence on the Young to Maintain Her Maternal     Responsiveness</i> . . . . .	255
<i>Nonhormonal Basis of Postpartum Maternal Behavior</i> . . . . .	257
<i>Mother-Young Interaction</i> . . . . .	261
<i>Parturition: The Transition Phase</i> . . . . .	273
Lactation and Maternal Behavior . . . . .	282
Weaning . . . . .	285
Summary . . . . .	288
References . . . . .	290

CHAPTER 8

Peripheral Plasma Levels of Gonadal Steroids in Adult Male and Adult, Nonpregnant Female Mammals . . . . .	299
---	-----

*H. H. Feder*

Androgens in the Systemic Circulation of Adult Male Mammals . . . . .	299
<i>Insectivora and Chiroptera</i> . . . . .	300

<i>Nonhuman Primates</i> . . . . .	302
<i>Humans</i> . . . . .	305
<i>Lagomorpha</i> . . . . .	307
<i>Rodentia</i> . . . . .	308
<i>Cetacea</i> . . . . .	311
<i>Carnivora</i> . . . . .	311
<i>Proboscidea and Hyracoidea</i> . . . . .	313
<i>Perissodactyla</i> . . . . .	314
<i>Artiodactyla</i> . . . . .	315
Estrogens and Progestins in Adult, Nonpregnant Female Mammals . . .	318
<i>Insectivora and Chiroptera</i> . . . . .	319
<i>Nonhuman Primates</i> . . . . .	320
<i>Humans</i> . . . . .	324
<i>Lagomorpha</i> . . . . .	326
<i>Rodentia</i> . . . . .	326
<i>Cetacea</i> . . . . .	330
<i>Carnivora</i> . . . . .	330
<i>Proboscidea</i> . . . . .	332
<i>Perissodactyla</i> . . . . .	332
<i>Artiodactyla</i> . . . . .	333
Plasma Steroid Data: Uses and Limitations . . . . .	337
<i>Biochemical Factors That Complicate Interpretation of Plasma Steroid</i>	338
<i>Physiological Factors That Complicate Interpretation of Plasma Steroid</i>	
<i>Data</i> . . . . .	341
<i>Environmental and Psychological Factors That Complicate Interpretation of</i>	
<i>Plasma Steroid Data</i> . . . . .	342
Concluding Remarks . . . . .	344
References . . . . .	344

### PART III NEUROLOGICAL BASES OF MAMMALIAN REPRODUCTIVE BEHAVIOR

#### CHAPTER 9

Neurological Bases of Male Sexual Behavior: A Comparative Analysis . . . . .	373
--	-----

*Benjamin L. Hart and Mitzi G. Leedy*

Introduction . . . . .	373
Sensory Mechanisms . . . . .	374
<i>Main and Accessory Olfactory System</i> . . . . .	375
<i>Genital Sensory Mechanisms</i> . . . . .	378
Genital Effector Mechanisms . . . . .	380
<i>Penile Erection</i> . . . . .	380
<i>Ejaculation</i> . . . . .	383

Spinal Reflexes . . . . .	384
<i>General Comments</i> . . . . .	385
<i>Sexual Reflexes of Male Dogs</i> . . . . .	386
<i>Sexual Reflexes of Male Rats</i> . . . . .	388
Brain Mechanisms . . . . .	390
<i>Approaches and Problems</i> . . . . .	390
<i>Cerebral Cortex</i> . . . . .	394
<i>Limbic System</i> . . . . .	395
<i>Medial Preoptic-Anterior Hypothalamic Continuum</i> . . . . .	399
<i>Pathways Associated with the Output of the Medial Preoptic-Anterior Hypothalamic System</i> . . . . .	405
<i>Rostral Midbrain Area</i> . . . . .	406
<i>Neural Involvement in Heterotypical Behavior</i> . . . . .	407
Concluding Comment . . . . .	409
References . . . . .	410

## CHAPTER 10

Neural Mechanisms of Female Reproductive Behavior . . . . .	423
---	-----

*Donald Pfaff and Doan Modianos*

Approaches to the Neural Mechanisms of Behavior . . . . .	423
<i>Hormones and Reproductive Behavior</i> . . . . .	424
<i>The New Reflexology</i> . . . . .	424
<i>Organization of the Chapter</i> . . . . .	426
Mechanisms of Hormonal Control . . . . .	427
<i>Hormones Involved</i> . . . . .	427
<i>Binding of Sex Hormones in the Brain</i> . . . . .	427
<i>Behavioral and Physiological Effects of Estrogen in Brain Regions Where It Is Bound</i> . . . . .	431
<i>Result of Decreased Estrogen Binding</i> . . . . .	433
<i>Summary</i> . . . . .	434
Sensory Control of the Lordosis Reflex . . . . .	434
<i>Definition of Stimuli That Evoke Lordosis in Female Rats</i> . . . . .	434
<i>Peripheral and Central Sensory Pathways for Lordosis</i> . . . . .	438
Motor Components of Lordosis . . . . .	443
<i>Description of the Response</i> . . . . .	444
<i>Muscles</i> . . . . .	444
<i>Motoneurons</i> . . . . .	446
Descending Pathways Controlling Lordosis . . . . .	447
<i>Hypothalamic Mechanisms</i> . . . . .	447
<i>Brainstem Modules</i> . . . . .	460
<i>Pathways from Brainstem to Spinal Cord</i> . . . . .	461

Working Models of Female Reproductive Behavior Mechanisms . . . . .	474
<i>Reflex Nature of Lordosis Behavior</i> . . . . .	474
<i>Neural Circuitry and Dynamics Underlying Hormone Effects and Lordosis Mechanisms</i> . . . . .	477
References . . . . .	480

CHAPTER 11

Neuropharmacology, Neurotransmitters, and Sexual Behavior in Mammals . . . . .	495
<i>Bengt J. Meyerson, Carol Olof Malmnäs, and Barry J. Everitt</i>	

Introduction . . . . .	495
<i>Neuronal Interaction</i> . . . . .	495
<i>Chemical Transmission</i> . . . . .	496
<i>Neuropsychopharmacology</i> . . . . .	498
Neuropsychopharmacology of Sexual Behavior in the Female . . . . .	504
<i>Methods</i> . . . . .	504
<i>Monoamines and Copulatory Behavior in the Female</i> . . . . .	504
<i>Acetylcholine and Copulatory Behavior</i> . . . . .	509
<i>Monoamines and Noncopulatory Sexual Responses</i> . . . . .	511
Neuropsychopharmacology of Sexual Behavior in the Male . . . . .	512
<i>Methods</i> . . . . .	512
<i>Monoamines and Copulatory Behavior in the Male</i> . . . . .	514
<i>Acetylcholine and Copulatory Behavior in the Male</i> . . . . .	517
<i>Monoamines and Noncopulatory Sexual Responses</i> . . . . .	517
Neuropsychopharmacology of Heterotypical Copulatory Behavior . . . . .	518
Neuropeptides, Monoamines, and Sexual Responses . . . . .	518
Neuroanatomical Approaches to the Study of Monoamines in Sexual Behavior . . . . .	520
<i>Effects of Lesions to 5-HT Neurons Using 5,7-Dihydroxytryptamine</i> . . . . .	523
<i>Effects of Lesions to NA Neurons Using 6-Hydroxydopamine</i> . . . . .	524
<i>Effects of Lesions to DA Neurons Using 6-Hydroxydopamine</i> . . . . .	525
Summary and Conclusions . . . . .	526
References . . . . .	529

CHAPTER 12

Brain Mechanisms and Parental Behavior . . . . .	537
<i>Michael Numan</i>	

Introduction . . . . .	537
Sensory Mechanisms . . . . .	541
<i>The Development of the Concept of Multisensory Control</i> . . . . .	541

<i>Olfactory Input and the Role of the Olfactory Bulb</i> . . . . .	542
<i>The Role of Afferent Feedback from the Mammary Gland and Nipples</i> . . . . .	550
<i>Additional Afferent Input</i> . . . . .	551
<i>Comments and Conclusions</i> . . . . .	552
Neocortical Mechanisms . . . . .	553
<i>Experimental Findings</i> . . . . .	553
<i>Comments</i> . . . . .	555
Limbic Mechanisms . . . . .	556
<i>Cingulate Cortex</i> . . . . .	556
<i>Hippocampus</i> . . . . .	557
<i>Amygdala</i> . . . . .	559
<i>Septum</i> . . . . .	559
<i>Conclusions</i> . . . . .	561
Hypothalamic Mechanisms . . . . .	563
<i>The Lateral Hypothalamus</i> . . . . .	563
<i>The Medial Preoptic Area and Maternal Behavior in the Rat</i> . . . . .	565
<i>Comparisons between the Neurohormonal Mechanisms Underlying Female Maternal Behavior with Those Underlying Male Sexual Behavior and Female Sexual Behavior in the Rat</i> . . . . .	578
Neurochemical Correlates of Maternal Behavior . . . . .	580
A Neurobehavioral Model . . . . .	586
Appendix . . . . .	589
References . . . . .	595

## PART IV BIOCHEMICAL MODELS OF HORMONAL ACTION

### CHAPTER 13

The Role of Metabolism in Hormonal Control of Sexual Behavior . . . . .	609
<i>Richard E. Whalen, Pauline Yahr, and William G. Lutige</i>	
The Prohormone Concept . . . . .	609
Male Sexual Behavior . . . . .	614
<i>Circulating Androgens and Estrogens in Males</i> . . . . .	614
<i>Hypothesis: T Mediates Male Sexual Behavior via Metabolism to A</i> . . . . .	616
<i>Hypothesis: T Mediates Male Sexual Behavior via Metabolism to DHT</i> . . . . .	617
<i>Hypothesis: T Mediates Male Sexual Behavior via Metabolism to Other Androgens</i> . . . . .	624
<i>Hypothesis: T Mediates Male Sexual Behavior via Metabolism to Estrogen</i> . . . . .	625
<i>Hypothesis: T Mediates Male Sexual Behavior via Metabolism to Estrogen plus DHT</i> . . . . .	635
Female Sexual Behavior . . . . .	638
<i>Secretion Products of the Ovaries: Estrogens</i> . . . . .	638
<i>Secretion Products of the Ovaries: Progestins</i> . . . . .	641

<i>Progestin Metabolism</i> . . . . .	642
<i>Inhibitory Effects of Progestins</i> . . . . .	644
Sexual Differentiation . . . . .	645
<i>The Role of 5<math>\alpha</math>-Reduction</i> . . . . .	646
<i>The Role of Other Androgens</i> . . . . .	646
<i>The Role of Aromatization</i> . . . . .	647
Conclusions . . . . .	648
References . . . . .	649

## CHAPTER 14

Steroid Hormone Receptors in Brain and Pituitary: Topography and Possible Functions . . . . .	665
---	-----

*Victoria N. Luine and Bruce S. McEwen*

Introduction . . . . .	665
Cellular Mechanism of Steroid Hormone Action . . . . .	666
<i>Visualization of Genomic Effects of a Steroid Hormone</i> . . . . .	666
<i>Cellular Uptake and Retention of Radioactive Steroid Hormones</i> . . . . .	666
<i>Cell Nuclear Retention of Radioactive Steroid Hormones</i> . . . . .	667
<i>The Search for Cell Nuclear Acceptor Sites</i> . . . . .	667
<i>Effects of Steroid Hormones on Gene Transcription</i> . . . . .	669
<i>Criteria for "Receptors"</i> . . . . .	669
Properties and Topography of Putative Steroid Receptors in Brain . . . . .	670
<i>Estradiol</i> . . . . .	670
<i>Testosterone</i> . . . . .	674
<i>Progestins</i> . . . . .	682
<i>Glucocorticoids</i> . . . . .	684
<i>Mineralocorticoids</i> . . . . .	685
Neurochemical Consequences of Steroid Interactions with Putative Neural Receptors as Illustrated for Estradiol . . . . .	686
<i>Temporal Relationships of Receptor Occupation to Physiological Effects</i> . . . . .	686
<i>Alterations of RNA Formation</i> . . . . .	687
<i>Changes in Protein Formation</i> . . . . .	689
<i>Estrogen Effects on Pituitary Sensitivity to LHRH</i> . . . . .	691
<i>Hypothalamic Peptidases</i> . . . . .	693
<i>Oxidative Metabolism</i> . . . . .	694
<i>Catecholamines and Serotonin</i> . . . . .	695
<i>Acetylcholine</i> . . . . .	700
Enzymes as Neurochemical Markers for Estrogen Receptor Function . . . . .	701
Summary and Prospectus: A Model for Steroid Hormone Action on Neuronal Functioning . . . . .	704
References . . . . .	706

PART V SOCIAL AND EXPERIENTIAL INFLUENCES ON  
REPRODUCTION

CHAPTER 15

Neuroendocrine Consequences of Sexual Behavior . . . . .	725
<i>T. O. Allen and N. T. Adler</i>	
Introduction . . . . .	725
<i>Hormone–Behavior Interactions</i> . . . . .	725
<i>Patterns of Neuroendocrine Control: Ovulation and Luteal Function</i> . . . . .	726
Behavioral Effects on Ovulation . . . . .	727
<i>Reflexive Ovulation</i> . . . . .	727
<i>Spontaneous Ovulation</i> . . . . .	734
Behavioral Induction of Progestational Hormone Secretion . . . . .	739
<i>Components of Mating</i> . . . . .	740
<i>Receptors and Afferent Pathways</i> . . . . .	743
<i>Pituitary Involvement</i> . . . . .	744
<i>Storage of the Copulatory Stimulus</i> . . . . .	747
<i>CNS Mediation</i> . . . . .	749
Summary . . . . .	754
References . . . . .	755

CHAPTER 16

On Measuring Behavioral Sex Differences in Social Contexts . . . . .	767
<i>David A. Goldfoot and Deborah A. Neff</i>	
Introduction . . . . .	767
Objections to Behavioral-Sex-Differences Research in Animals . . . . .	768
<i>The Generalization Problem</i> . . . . .	769
<i>The “Assumed Biological Mediation” Problem</i> . . . . .	770
<i>Behavioral Endocrinology and Sex Differences Research</i> . . . . .	771
Measuring Behavioral Sex Differences . . . . .	773
<i>Definition of Behavioral Sex Differences</i> . . . . .	773
<i>Dimorphic Behavior Assessed Individually</i> . . . . .	774
<i>Dimorphic Behavior Assessed in Dyads</i> . . . . .	775
<i>Dimorphic Behavior Assessed in Groups</i> . . . . .	776
Conclusion . . . . .	780
References . . . . .	781
Index . . . . .	785
